PRESS RELEASE

20210726-PRESS RELEASE Mr G. H. Schorel-Hlavka O.W.B. ISSUE – 'INFLUENZA' used for 'COVID' LOCKDOWN scam

As a **CONSTITUTIONALIST** my concern is the true meaning and application of the constitution.

* Gerrit, how on earth would you know that 'INFLUENZA' was used as part of the PCR testing?

*****INSPECTOR-RIKATI**, let me refer back to the CDC (Centre for Disease Control (USA);

https://www.cdc.gov/csels/dls/locs/2021/07-21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html?fbclid=IwAR3IIN3P1HBTmmWaav0od-SKeIJ81c4G1VbmKqr090dknB5Hoo784OXj7sM

QUOTE

In preparation for this change, CDC recommends clinical laboratories and testing sites that have been using the CDC 2019-nCoV RT-PCR assay select and begin their transition to another FDA-authorized COVID-19 test. CDC encourages laboratories to consider adoption of a multiplexed method that can facilitate detection and differentiation of SARS-CoV-2 and **influenza** viruses. **Such assays can facilitate continued testing for both influenza** and SARS-CoV-2 and can save both time and resources as we head into **influenza** season. Laboratories and testing sites should validate and verify their selected assay within their facility before beginning clinical testing.

CDC withdraws fraudulent PCR testing protocol that was used to falsify covid "positives" to push the plandemic

As such, one can therefore hold:

'INFLUENZA' has been used for an elaborate 'COVID-19' scam to justify 'LOCKDOWNS', including 'DELTA' but like hay fever you cannot infect others with 'INFLUENZA' as research done way back in 1919 then already proved.

As I wrote in previous writings, during the 1919 so called Spanish Flu pandemic health soldiers in the USA were tested if they could become ill from 'INFLUENZA' when sitting close to a sick soldier. In fact they even injected healthy soldiers with what they took from sick soldiers and yet not a single soldier became ill during this experiment. It is like you got someone having hay fever and you can sit next to this person but not get it from this person as it is not transmissible. However, if you are also vulnerable for hay fever then you can end up sick not because of someone else but because as I understand it the pollen in the air causing this.

When then some Chief health officer is claiming that there are hundreds of sites in Victoria then this CHO is I view talking utter nonsense when it comes to COVID-19 as what he doesn't seem to understand is that he likely is talking about "INFLUENZA" sites. And that bring me back to the NEW WORLD ORDER scam to pretend there is a serious disease to justify the compulsory mask wearing, social distancing, lockdowns, etc, as part of the "**LOCK STEP SCENARIO**" that was prepared in 2010.

* If you are correct that 'INFLUENZA' cannot be transmitted from one person to another how do you explain the clusters?

**** As I have explained in the past, when you have the Legionnaires disease bacterium spread from water towers and heating units then this is not because of spreading it amongst people itself but simply using the same water, air, etc.

* Didn't the CHO make known that he wanted to have precise details before he could make any decision to extent or not the LOCKDOWNS?

**** One has to be a complete idiot to expect that PCR testing, that is found to be useless to detect COVID-19 then somehow can give any precise details about COVID-19. Even if hypothetically COVID-19 and INFLUENZA particles could be found using the PCR system then it still as I understand it would not be indicative if it was from many years ago or a current disease, etc. However, in the USA the PCR system was pursued for fraudulent purposes including to undermine the re-election of President Donald J Trump as to hype the number of cases, deaths, etc, but now that Fauci who I understood had made clear not going to be working for Joe Biden now however did so. And, to reduce the number of cases, deaths, etc, albeit artificially all the standard terms are altered to reduce the numbers. It is moving the goal post. And, this much has to do, as I understand it, with the financial benefits for Fauci and Co.

The_Fauci_COVID-19_Dossier

* Oh boy that is some revelation.

**** Regretfully the TGA and others have been going along as after all this is the "**LOCK STEP SCENARIO**" to be followed by them. They might be compromised because of blackmail or other reasons and have placed not just their own integrity in question but more over betrayed their own family members and the general population at large. They so to say have become the instrument of the "DEVIL" (No religious association intended) and willing to sacrifice their own flesh and blood for the quest of power.

They have betrayed their oath of office and I view must face reality that they cannot be excuse from any legal liability.

It may be noted that anyone who participated in this elaborate "**LOCK STEP SCENARIO**" **ONE WORLD ORDER** scam better check out:

Scheuer v. Rhodes, 416 U.S. 232 (1974)

It is a case that underlines that even a judge who acts in defiance of a constitutional right acts not as a judge but as a private person and can be personally sued.

Likewise with politicians, doctors, police, health care workers, journalist, etc.

Australian newspaper editor Barclay Crawford directing his journalists to ridicule anyone not supporting the COVID death-shot

In my view journalist (including television presenters) who are willing to bring their own family members to the slaughter cannot be provided with any compassion if they are convicted of their evil doing to assist in genocide and crimes against humanity. After all, they were ruthless to pursue whatever to keep a job and then as they made clear in the Nuremberg trials **“FOLLOWING ORDERS”** is no excuse.

I understand that numerous doctors and scientist have stood the test of time to maintain their exposure of the **“LOCK STEP SCENARIO” ONE WORLD ORDER** scam and at cost of jobs, etc, Those to me are the real hero's.

** Regardless what the scamming might be about surely they are to some extent succeeding in their quest for depopulation?*

**** Not in my view, if I can help it. After all, as I will indicate there are some ways to minimize the harm inflicted by the jabbing. However, we must not be over confident that there will be no harm resulting because many have already suffered and many more will be besides the many deaths, but if we are resilient in fighting the global terrorist in this **“LOCK STEP SCENARIO” ONE WORLD ORDER** scam then we might be able to minimize the harm inflicted to the best of our ability.*

Scientist Sounds Alarm: COVID Vaccines Producing Symptoms of Parkinson's, Other Neurodegenerative Disorders • Children's Health Defense

We need to combat the “fear” element. This as I try to do with my writings so people may realise they are deceived by the very politicians claiming to act in their best interest, by the medical profession willing to go along with the **“LOCK STEP SCENARIO” ONE WORLD ORDER** scam. The police which has I view totally destroyed any goodwill and will have to face that there will be a time of reckoning.

We will have to amend the constitution to pursue that never again politicians can wield such absurd unconstitutional powers and nevertheless remain in their jobs as if they have done no wrong.

The ongoing masks mandates, lockdowns, etc, underlines the need to hold them all legally accountable for the harm, etc, they inflicted.

After reading this, you will have a far better understanding about masks, mandatory mask regulations, safety concerns about sending children back to school and the Wuhan virus in general than very few, if any, of your friends or neighbors will possess.

*** I just wonder, how on earth can you assist in your writing to even seek to reduce the harm to those already jabbed with poison?**

******* Well, let me give you an example. Many may be unaware that even after the jabbing there might be ways to reduce as much as possible the harm flowing from it. I will below give an example how to possibly counteract certain possible harm. It might also work for those who were not jabbed but were nevertheless harmed by some swab or by the so called shedding.

SPANISH RESEARCHERS FIND A WAY TO REMOVE MAGNETIC GRAPHENE FROM THE BODY AFTER A COVID-JAB

Some of the text of the video (**RICARDO DELGADO BIOESTASTICO**) (www.orwell.city):

First of all, regardless of the brand, 750 mg NAC is good. Its most common format is 600 mg **N-acetylcysteine** causes the body to secrete glutathione endogenously. For me it's the most effective antioxidant. Take one capsule in the morning as a preventive treatment. People who're going through a more serious clinical condition will have to consult the dosage first. However, take one capsule in the morning. That's how it should be taken. Almost everything we're going to see here is taken in the morning. The reason is that after gastric emptying or fasting, everything that first enters the body is absorbed quite better. This is a rule in all types of supplementation lines. N-acetylcysteine is a must. In case you don't want to consume N-acetylcysteine, you also have glutathione to consume directly, and it's much safer because we are talking about the body will use 100% of the glutathione.

This is **glutathione**, which is also sold directly for oral consumption. One tablet or capsule in the morning. However, according to what I have read about it, the body doesn't assimilate it that well. Only 25% - 30% of it assimilated, depending on the individual and his gastric conditions. Therefore, the dosage needs to be higher to obtain the same effects as with N-acetylcysteine. Well, because we consume N-acetylcysteine for a week, we can cross-supplement and continue substituting it with glutathione. Okay? However, as I said, N-acetylcysteine is best because the body will endogenously secrete it. It will maintain optimal levels of glutathione endogenously.

Here's another must-have antioxidant. I told you the main one is N-acetylcysteine, but **zinc** is also. Okay? Specifically, these are 25 mg. You can also find it in 30 mg, 45 mg, and even 50 mg tablets. Or you simply take 2 tablets of 25 mg.

This is a trace element introduced and supplemented especially for athletes who take one zinc tablet a day. Okay? In the morning then, N-acetylcysteine and zinc. These two antioxidants are essential to degrade graphene oxide. With these two antioxidants, I have personally and particularly helped people affected by magnetism after inoculation. They had two doses of Pfizer, and after two weeks they no longer express it. See?

Now, since these are antioxidants, any kind of antioxidant is going to help them. Let's say glutathione is the master antioxidant. It's the best in terms of its antioxidation and degradation capacity. However, there are other very powerful antioxidants as well.

The second on the list is a bit more expensive. It is **Astaxanthin** 5 mg. That is the commercial dosage. It's a little bit more expensive than other antioxidants because I think it's 24 or 25 euros and it comes in 30 capsules. Many people who take it notice that it also improves their eyesight. Astaxanthin can be taken together with other two antioxidants already mentioned, the ones I told you are essential or indispensable. So you can take Astaxanthin along with them as well. Okay? Astaxanthin is what gives the orange color to

crustaceans and shellfish. Foods we were told not to consume once vaccinated. You know why. You know the reason. Astaxanthin is also usually extracted from algae.

Another quite important antioxidant is Quercetin. Remember that we read a study on this, and you can find it on La Quinta Columna's website. Regardless of the brand, choose those that offer this antioxidant in high doses. In La Quinta Columna's program, we saw studies that referred to cases of COVID-19 treated with quercetin, and with very good results. It's a very good antioxidant as well. You know why. What it does is raising the levels of glutathione and antioxidants in general that are going to deal with the recitative stress caused by the toxic graphene oxide. Although they say that it hasn't been on Spanish radio and television, graphene oxide has been introduced in vials and other routes of administration such as masks – which were withdrawn but are still marketed – PCR tests, compresses, by inhalation, etc. **Because all this is part of an agenda of extermination and death.** So, quercetin is very important as well. As I say, I'm talking about the ones that I have personally.

Another universal antioxidant, which is not powerful as astaxanthin or quercetin but which also helps a lot is vitamin D in its format as vitamin D3. Like the other antioxidants, you can take one pill in the morning. Or if you prefer: take half an hour of sun in the morning, which is quite healthy. In the Nordic countries, where there is hardly any sunshine, 80% of the population is supplemented with vitamin D3. One pill a day. The dosage instructions must be followed. Everything is taken in the morning.

This antioxidant that I am showing you now is the greatest liver and stomach protector out there. It's milk thistle, which is also very antioxidant. As you can see, most of these supplements are extracted from plants. Some are synthetic chemicals, but not chemicals from a pharmacological or medical point of view. Milk thistle is a very antioxidant supplement. You can also take it. It's also a stomach protector for all the rest, although they come nicely wrapped in capsules.

And, finally, we have her a supplement with radioprotective action. You know why. **Melatonin.** Okey? Pure melatonin. This format is 1 mg. There are formats up to 1.9 milligrams. That is, you can easily check the dosage you can take by googling. Melatonin is taken at night. Okay? In addition, it will help to reconcile the sleep cycles because precisely the electromagnetic fields inhibit melatonin. They prevent the body from naturally secreting melatonin. That is why they cause alteration of sleep cycles. Because melatonin is a hormone that is related to the regulation of these cycles. So, it's taken at night.

With all this, you ensure that you have a very high level of antioxidants. Under normal conditions, they're usually high, but they depend on variables such as age, exercise, obesity, youth. Young people have very high levels of glutathione. However, if they have a toxic substance in their bodies, they experience distinctive fatigue. It's a fatigue that people who have been vaccinated tend to feel. That happens because there is already an internal struggle between the oxidative stress caused by the toxicant and the body's reserves of glutathione and antioxidants. Therefore, if the balance raises in favour of the 'soldiers' that counteract the toxicant, then the balance is restored. It returns to normal within a few days, as we've seen in family members who took the shots. And they have also lost the magnetism, which is the most important thing.

Well, I think that's all. I was going to comment that graphene oxide is doing damages right now, but that it's doing now is not that much compared to the damage it'll do to body in a few days when **5G technology** has been activated. These bandwidth frequencies will allow the toxicity of graphene oxide to increase very considerably concerning the levels of antioxidants in the body. So, they quickly break that imbalance and trigger inflammatory syndrome, immune system collapse, altered oxidative stress within hours, cytokine storm, bilateral pneumonia, and everything that you know as severe COVID-19. On the neurological COVID-19 if you already have graphene in your head. That's a normal thing after vaccination because the magnetism moves from the arm to the head. So that is all. I hope that in some way it has helped you. I will share this video directly and also upload it to the Odyssey channel.

Leave in the comment any questions you have, and I will try to solve them to the best of my ability and knowledge. Well, that is all. Thank you all for watching this video and stay strong!

Remember that the essential antioxidants based on the scientific articles studied are N-acetylcysteine (NAC) and zinc.

Dosage: Everything should be taken in the morning (with breakfast), except melatonin which is to be taken in the evening (20 minutes before bedtime).

The above set out may or may not be exactly as to what **RICARDO DELGADO BIOESTASTICO** stated and merely is to indicate that there might be some way to counteract issues that arose from being jabbed. I do not in any way seek to indicate if I agree or disagree with what was stated.

* Would I be correct you demand that politicians and other health professions and anyone else promoting this scam are required to prove with precise details how they make their claims?

**** Indeed, let the Chief Health Officer prove that the so called PCR testing can differentiate between INFLUENZA and the so called COVID-19. Let him prove that the cycles are not more than 17Ct's. Let him prove that the PCR test can show the difference between particles of some disease of years ago versus newly acquired particles he claims are COVID-19 or are from INFLUENZA. Let him prove that INFLUENZA can be transmitted from one person to another! As such, let him stop drooling from the mouth with all kinds of nonsense and let him prove he knows what he is talking about and let him prove that compulsory masks wearing can show to reduce infections. Let him prove that lockdowns do reduce infections, and so on. Keep in mind that with the UK about totally abandoning restrictions suddenly the claimed infection rates is down from about 50,000 a day to 29,000 a day.

And this was also happening in Florida when they stopped restrictions.

We, the People must remain the masters of our destiny and those who violate our constitutional and other legal rights shall be caused to be held legally liable and I mean this to include the Big Tech who deliberately supported this "**LOCK STEP SCENARIO**" **ONE WORLD ORDER** scam. Let their assets be sold to go towards a victim fund. This is the way to ensure that never again they will get involved in this kind of gross deception of We, the People.

*. There are lots of people, in fact thousands who have been fined and what would you consider is the best way for them to challenge the fines?

**** every person would be in some unique circumstances but in my view the best way to start with is to OBJECT TO THE JURISDICTION of the court. Many judges haven't got a clue that when a person make such an objection that then they have no judicial powers to proceed with the case at hand as they first must hear why the person objects to the jurisdiction of the court. If the judge fails to do so then the party objecting better get a recording of the hearing as to prove that the judge never invoked jurisdiction and so any orders would be without legal force. If the judge does commence to hear the OBJECTION TO JURISDICTION then the objection I view should be based upon that the *Commonwealth of Australia /Constitution Act 1900* (UK) specifically provided for the Commonwealth to deal with infectious diseases and so the States have no legislative powers to base any legislation upon infectious diseases, etc. Anyone who were to go through my writings would get ample of information to be used for this. I have absolutely no doubt that a judge who holds his oath of office dearly will beyond doubt rule that in deed the court has no jurisdiction to enforce legislation that were unconstitutional in the first place. I am not going to try to explain all the ins and outs of it all, safe to say that I view a person pursuing this in a competent manner may very well succeed. Not just for his/her own case, but to set a legal precedent that then can be used to get rid of all fines.

*. Are you aware of any resistance by the medical profession as to being jabbed?

**** Actually, there was a survey, albeit limited, that seem to indicate that most medical doctors will not have themselves vaccinated.

<https://aapsonline.org/majority-of-physicians-decline-covid-shots-according-to-survey/>

Majority of Physicians Decline COVID Shots, according to Survey

I was also watching a video where a mother was presenting her case to a board, and explained that both she and her husband were medical doctors and encouraged their 12 year old daughter to be Vaccinated, only to find it went horrible wrong. As such, while both were medical doctors they simply never really bothered to check out all details and merely went along with the nonsense that was parroted by others. Just that now their daughter may likely be harmed for the rest of her life.

Then there was this video where when President Carter was in power they had this flu and well the husband encouraged his wife to be jabbed. Just that she ended up in leg braces, etc. It was revealed (60 Minutes report) that she really never was told about the dangers associated with the jabbing.

<http://www.youtube.com/watch?v=2MXCueMvukw>

CBS News 1976 60 Minutes Swine Flu Special with Mike Wallace

As such, the scam perpetrated way back then is being repeated time and time again and this is why this nonsense about indemnifying pharmaceutical companies must stop, as they hold no accountability for any wrongdoing and can actively promote depopulation.

The Vaccination That Is Not A Vaccination, But Gene Therapy

In a revealing [video conference](#) [9] with **Dr. Judy Mikovits, Robert Kennedy Jr. and Dr. David Martin**, **it is explained that the mRNA vaccine, by the legal definition, is not a vaccine at all. It is falsely called a vaccine to hide the fact that the purported vaccine is, in fact, a gene therapy.** Experienced physician and epidemiologist, **Dr. Wolfgang Wodarg**, stated in a censored [interview](#) with Rubikon, **“Actually, this ‘promising’ vaccine should be PROHIBITED for the vast majority of people because it is genetic engineering!”**

What used to be established terms with certain specific meanings now no longer is. For the sake of the **“LOCK STEP SCENARIO” ONE WORLD ORDER** they are changing it all. Never mind if some years later they will revert back to ordinary standards and meanings as in the meantime their evil deeds are done. This is why this should never be ignored and meanings must be secured in legislative provisions and not depending upon the intentions of some evil person or persons.

***. You obviously have not given up to reclaim constitutional and other legal rights, have you?**

**** People like myself who do not watch television are therefore free thinkers and the more people start to switch of their television and radio and start enjoying real life may then just discover that much of the propaganda will have no effect upon them. Obviously, people should keep in mind that when it comes to political elections it makes no difference which major political party a candidate is standing for as they generally are all bound by the pharmaceutical companies election funds contribution for all so to say sing from the same song book. Therefore, best is not to vote for any candidate standing for a major political party. I for one gained great respect for C Kelly PM having resigned from the Liberal party and now being an independent. He clearly didn’t want to sell himself to the devil. Well, let’s hope that people show their approval and overwhelmingly vote him back at the next federal election. I am also very impressed with Mark Latham, leader of the One Nation Party in the NSW State Parliament.
