 18 **Re Vaccination issues-Supplement 1**

19 Sir,
 20

21 <https://www.tga.gov.au/vaccines-overview>
 22 QUOTE

23 **Vaccines overview**
 24 14 May 2019
 25 The Therapeutic Goods Administration (TGA) is responsible for assessing vaccines and other medicines
 26 before they can be used in Australia. We only register a vaccine for use in Australia if its benefits are much
 27 greater than its risks.

28 END QUOTE
 29 Again:
 30

31 **We only register a vaccine for use in Australia if its**
 32 **benefits are much greater than its risks.**

33
 34 It is not for me to prove that the vaccines (for what they might be incorrectly named) are less
 35 dangerous then the harm they may cause but rather it is for the TGA to prove that the harm is
 36 lesser than the benefits they may provide.

37
 38 **In my view it would have been sheer impossible for the TGA to claim on its website**
 39 QUOTE

40 **We carefully assess the results of clinical trials and the way in which the trials were conducted.**
 41 We require well-designed trials of a sufficient length with a sufficient number of people who
 42 represent the people for whom the vaccine is intended. The results must demonstrate that the
 43 benefits of the vaccine greatly outweigh the risks.
 44 We also require vaccine manufacturers to meet manufacturing quality standards. As a further check,
 45 our laboratories assess the quality of every batch of a vaccine before it can be supplied in Australia.

1 END QUOTE
 2
 3 Again:
 4

5 **We carefully assess the results of clinical trials and the way in which**
 6 **the trials were conducted.**

7
 8 How on earth could the TGA have “**carefully assess the results of clinical**
 9 **trials**” when they were done in other jurisdictions totally remote from Australia? It may merely
 10 mean that that the TGA is provided with data which it unquestionably accepts. That to me is not
 11 “**carefully assess the results of clinical trials**” as it has absolutely no knowledge
 12 in what conditions and how those foreign trials were conducted.
 13

14 And to argue that it approved “**clinical trials**” for Australia on an unlimited
 15 number of persons totally remove of any real “**clinical trials**” limitations
 16 and in fact the Federal government shows to use it in a “compulsory” manner such as a
 17 “vaccination passport” even so ample of people may never be required or even permitted to be
 18 vaccinated then I view the TGA clearly overstepped its legal limits to approve any “vaccine” for
 19 “**clinical trials**” only by knowingly allow the misuse and abuse of “**clinical trials**”
 20 for pursuing all Australians to be subjected to such “**clinical trials**” .

21 For “**clinical trials**” the TGA must ensure that there are 3 stages involved and this AFTER
 22 already tests with animals have been successfully completed. I am not aware that the TGA has
 23 done any CONSIDERATION of results regarding animals as to my understanding no test with
 24 animals succeeded, unless we count the overseas deaths of animals as some purported test result.
 25 .

26 Hence, I view that on a legal basis the TGA had no legal position to even allow any “**clinical**
 27 **trials**” involving humans without having first been able to consider any successful testing
 28 involving animals with this kind of claimed “vaccine(s)”.

29 And once the TGA has properly supervised and considered any successful “**trials**” involving
 30 animals then and only then could the TGA permit “LIMITED” “**clinical trials**” in the first
 31 stage of testing. No one in his right mind could hold that a “**clinical trials**”

32 Would involve all Australians in a first stage of a “**trials**”. It must be involving a limited
 33 number of participants and they must all be screened beforehand as to any morbidities, etc, as to
 34 ensure the test results can be of some reliable bases to commence a second stage. The second
 35 stage then should involve a lot more participants but again a limited number. And if this is also
 36 successful than a third stage of “**clinical trials**” could involve yet a larger group of
 37 participants.

38 When we have about 26 million inhabitants in Australia and Prime Minister Scott Morrison is
 39 boosting about having about 150million vaccines acquired then obviously this isn’t an amount to
 40 do merely some stage “**clinical trials**” but to blatantly ignore and if anything abuse any
 41 TGA directions and limitations. This alone should result that the TGA **IMMEDIATELY**
 42 **WITHDRAW/ SUSPEND** any approval it may have made and that the federal government first
 43 must come to its senses to ensure that any “vaccination” is not used as some political power play
 44 but is used for the purpose it is supposed to be.

1 In my view were the TGA fail to reign in this misuse and abuse of any approval then it in my
 2 view could be held legally liable for any and all deaths that may result of the misuse/abuse of
 3 any "**clinical trials**" vaccinations.

5 <https://www.tga.gov.au/vaccines-overview>

6 QUOTE

7 **Vaccines overview**

8 14 May 2019

9 The Therapeutic Goods Administration (TGA) is responsible for assessing vaccines and other medicines
 10 before they can be used in Australia. We only register a vaccine for use in Australia if its benefits are much
 11 greater than its risks.

12 **On this page:** [What is a vaccine?](#) | [The TGA assesses vaccines before they can be used in Australia](#) | [TGA](#)
 13 [decisions are informed by independent advice](#) | [The TGA monitors vaccines after they are supplied in](#)
 14 [Australia](#) | [Where can I find more information?](#) | [Frequently asked questions](#)

15 **What is a vaccine?**

16 Vaccines are medicines that protect you against specific diseases, such as measles, influenza (flu) or
 17 whooping cough. Vaccination is the act of receiving a vaccine, which in most cases involves having the
 18 vaccine injected with a needle.

19 Vaccines can contain:

- 20 • dead viruses or bacteria
- 21 • severely weakened forms of viruses or bacteria
- 22 • small, purified components of viruses or bacteria.

23 After receiving a vaccine, your body's immune system can remember the virus or bacterium and
 24 fight off an infection much more effectively than if it was encountering the virus or bacterium for
 25 the first time.

26 Vaccines protect you and the people around you from serious and life-threatening diseases. There
 27 are some people in the community who cannot be vaccinated because they are too young or too sick.
 28 Widespread vaccination helps protect these people by making it more difficult for a disease to
 29 spread.

30 Some people experience minor side effects following vaccination, such as mild fever or pain,
 31 redness, or swelling at the injection site. Serious side effects, like allergic reactions, are very rare.

32 **The TGA assesses vaccines before they can be used in Australia**

33 The TGA rigorously assesses vaccines for safety, quality and efficacy before they can be used in
 34 Australia. Vaccines receive the same high level of scrutiny as other prescription medicines and
 35 related therapeutic goods.

36 We use the best available scientific evidence to assess the risks and benefits of each vaccine. Our
 37 evidence requirements are based on international guidelines developed by the European Medicines
 38 Agency.

39 Clinical trials are a key part of the scientific evidence that we review during the assessment of a new
 40 vaccine. A clinical trial is a scientific study where a promising new medicine is given to a group of
 41 people to assess its risks and benefits.

42 We carefully assess the results of clinical trials and the way in which the trials were conducted. We
 43 require well-designed trials of a sufficient length with a sufficient number of people who represent
 44 the people for whom the vaccine is intended. The results must demonstrate that the benefits of the
 45 vaccine greatly outweigh the risks.

46 We also require vaccine manufacturers to meet manufacturing quality standards. As a further check,
 47 our laboratories assess the quality of every batch of a vaccine before it can be supplied in Australia.

48 **TGA decisions are informed by independent advice**

49 The TGA's decision of whether to register a vaccine for use in Australia is informed by the advice of
 50 the [Advisory Committee on Vaccines \(ACV\)](#).

51 The ACV is an independent committee appointed by the Australian Government Minister for
 52 Health. It is composed of members with expertise in science, medicine and public health.

53 The ACV complements our expertise in the TGA, ensuring that our assessments of vaccines are as
 54 robust as possible.

55 **The TGA monitors vaccines after they are supplied in Australia**

56 The TGA monitors vaccines for safety after they are supplied in Australia. If you experience an
 57 adverse event (side effect) from a vaccine, you should seek assistance from a health professional and
 58 [report the adverse event](#) to the TGA.

We receive adverse event reports from consumers, health professionals, the companies who supply vaccines, and state and territory health departments. We publish these reports in the publicly available [Database of Adverse Event Notifications \(DAEN\)](#).

Reporting serious adverse events is mandatory for the companies who supply vaccines in Australia. These companies must also develop and implement risk management plans for their vaccines. Our laboratories also help monitor vaccine safety. Alongside assessing the quality of all vaccine batches before they are supplied in Australia, our laboratories may also test the quality of selected vaccine batches after they are supplied in Australia. [Laboratory testing results](#) are published on our website.

If we suspect there is a problem with a vaccine, we will launch an investigation. In some cases, this could mean suspending the use of a vaccine during the investigation. We notify the community of safety concerns through the publication of [alerts](#) on our website.

Where can I find more information?

- The Australian Government Department of Health [immunisation](#) page includes information on getting vaccinated, vaccine safety, the National Immunisation Schedule and other topics. You can also call the National Immunisation Hotline on 1800 671 811.
- The Australian Government Department of Health '[Get the facts](#)' website includes additional information about vaccinating your children.
- The NPS Medicinewise website includes [information about vaccines](#) and other medicines in the consumer information section. You can also call their [Medicines Line](#) on 1300 MEDICINE (1300 633 424).
- The [National Centre for Immunisation Research and Surveillance](#) (NCIRS) website includes a range of vaccine information, including [factsheets](#) on vaccine preventable diseases and vaccine safety.
- The Australian Academy of Science website includes information on [the science of immunisation](#).

Frequently asked questions

Does the TGA consider all of the ingredients in a vaccine before registering it for use?

Yes. The TGA considers the safety, quality and efficacy of every ingredient in a vaccine before we register the vaccine for use in Australia.

Vaccines contain an active ingredient from the target virus or bacterium. They also contain other ingredients for particular purposes, such as stimulating the body's immune response and stabilising the vaccine during storage. The TGA assesses all of these ingredients for safety, quality and efficacy before the vaccine can be used in Australia.

Show more information about Are there any differences in the registration process for seasonal flu vaccines?

Yes. The registration process has been customised to ensure timely availability of seasonal influenza (flu) vaccines.

The composition of seasonal flu vaccines changes every year because there are new strains of flu viruses every year. This short timeframe means that it is not practical to conduct clinical trials for annual virus updates to seasonal flu vaccines. To ensure timely availability of seasonal flu vaccines, the TGA does not require clinical trial data for annual virus updates for vaccines that are already on the Australian Register of Therapeutic Goods (ARTG). We take this approach because there have been many years of safe and effective use of seasonal flu vaccines in several million people. This registration process only applies for seasonal flu vaccines where the manufacturing process is the same as a previously registered vaccine and the only change is to the strains of virus.

The [Australian Influenza Vaccine Committee \(AIVC\)](#) provides advice to the TGA on the composition of the seasonal influenza vaccine to be supplied in Australia. [AIVC recommendations](#) are published on our website.

16 46 residents in Spanish nursing 17 home die after receiving COVID-19 18 vaccine

19 *Health authorities have reportedly halted the administering of the second*
 20 *shot of Pfizer's vaccine*

21 QUOTE
 22

23 SPAIN, February 15, 2021 ([LifeSiteNews](#)) —Forty-six nursing home residents who had received their
 24 first dose of Pfizer-BioNTech's fast-tracked vaccination against COVID-19 at the beginning of January
 had died by the end of the month, Spanish media have [reported](#).

25 Staff first reported a coronavirus outbreak at Nuestra Señora del Rosario (Our Lady of the Rosary), a
 26 nursing home in the province of Cadiz, Andalusia in Spain on January 12, in the wake of a vaccine
 27 distribution campaign.

28 The Ministry of Housing and Families intervened in the private facility which houses up to 145
 29 residents and where local media reported on February 4ththat a further 28 of 94 residents as well as 12
 30 staff members had tested positive for COVID-19.

31 At another nursing home in the same southwestern Spanish province, in Novo Sancti Petri, in
 32 Chiclani, [22 elderly residents died](#) and 103 were infected following a vaccination campaign.

33 Similar outbreaks and death clusters following vaccination have been reported across the globe,
 34 including:

- 35 • 29 elderly people died in [Norway](#) shortly after receiving Pfizer's vaccination.
- 36 • 13 deaths among 40 residents following vaccination at one nursing home in [Germany](#) were
 37 dismissed as “tragic coincidence.”
- 38 • 10 deaths in a [German palliative care patients](#) within hours to four days of COVID-19 vaccination
 39 were deemed a “coincidence.”
- 40 • 22 of 72 residents of a nursing home in [Basingstoke, England](#) have died following vaccination.

- 1 • 24 seniors at a nursing home in [Syracuse, NY](#) were reported to have died from COVID-19 as of
2 January 9, 2021 despite having been vaccinated beginning December 22, 2020.
- 3 • 4 10 cases of COVID-19 were [reported](#) on January 28 among seniors who had received both doses
4 of Pfizer's vaccine at one care home in Stockholm Sweden. The residents were vaccinated on
5 December 27 and again on January 19.
- 6 • 7 The COVID-19 death toll in the small British enclave of Gibraltar numbered 16 before it launched
8 its Pfizer vaccination campaign on January 10, 2021 and then shot up to 53 deaths 10 days later
9 and to 70 seven days after that. According to a [Reuters report](#), the Gibraltar Health Authority
10 declared there was "no evidence at all of any causal link" between 6 of the deaths that were
11 investigated and the Pfizer's vaccine, despite the individuals having tested negative for Covid-19
before vaccination, but positive "in the days immediately after."
- 12 • 13 4,500 COVID-19 cases in Israel occurred in patients *after* they had received one dose of Pfizer's
14 vaccine and 375 of those vaccinated patients required hospitalization, Israeli news
media [reported](#) on January 12.
- 15 • 16 Seven adults living in a care home in Saskatoon tested positive for coronavirus a week after
17 residents were vaccinated at the Sherbrooke Community Centre, the CBC [reported](#). There were no
positive cases at the time of vaccination.
- 18 • 19 Seven residents at a [Montreal](#) long-term care facility tested positive for Covid-19 within 28 days of
20 being vaccinated with Pfizer's vaccine, prompting the province of Quebec to delay the second
Pfizer dose.
- 21 • 22 Abercorn Care Home in Scotland, which began COVID-19 vaccinations on December 14, 2020
23 was home to an outbreak of the virus by January 10 and the National Health Service for the
region refused to comment on whether vaccinated residents were ill. A care home staff group
founder told the Scottish [Daily Record](#): "We have had members of our group whose parents have
had the vaccine and then two weeks later have tested positive for coronavirus."
- 24 • 25 All of the residents at a home in [Inverness, Scotland](#) were vaccinated against COVID-19 early in
26 January, but 17 became infected with the virus after the first dose.
27

To me with my self-professed “Crummy English” the word “rare could not be applied to “13 deaths among 40 residents following vaccination at one nursing home in Germany were dismissed as “tragic coincidence.” Neither would I hold this to be a “tragic coincidence” where this is eventuating all over the world.

And when one considers “All of the residents at a home in Inverness, Scotland were vaccinated against COVID-19 early in January, but 17 became infected with the virus after the first dose” then clearly as the CDC and WHO now appears to have finally acknowledged is that the vaccination doesn’t at all prevent any infection rather one could end up not only become infected but even die.

While the TGA may claim

13 QUOTE

14 Sharyl Attkisson CONTRIBUTOR February 10, 2021 Updated: February 11, 2021

15 Two small clusters of deaths after [COVID-19](#) vaccination have been reported among nursing homes in
 16 Kentucky and Arkansas.17 In Kentucky, [four seniors died the same day of their vaccination](#) on Dec. 30, 2020. Three of the four who
 18 passed away reportedly already had had coronavirus prior to getting vaccinated.19 In Arkansas, four seniors died at a long term care facility about a week after their vaccination. All tested
 20 positive for COVID-19 after vaccination.21 The deaths are reported in a federal database called VAERS, the [Vaccine](#) Adverse Event Reporting System.
 22 Deaths after vaccination don't necessarily mean the vaccine is to blame. Of those receiving coronavirus
 23 vaccines, many are elderly and frail, or already suffering from serious illnesses. That makes it difficult to
 24 know whether there's a connection.25

Kentucky Nursing Home Deaths

26 According to VAERS reports, the Kentucky deaths occurred on Dec. 30 after vaccinations with the Pfizer-
 27 BioNTech vaccine. An ill 88-year-old woman who was "14 + days post covid" was given the Pfizer-
 28 BioNTech shot while she was "unresponsive in [her] room." She died within an hour and a half ([914961-1](#)).
 29 An 88-year-old who was "15 days post covid" got the shot, was monitored for 15 minutes afterward, and
 30 passed away within 90 minutes ([914994-1](#)). A third report says an 88-year-old woman who was "14 + days
 31 post covid" vomited four minutes after receiving her shot, became short of breath, and passed away that night
 32 ([915562-1](#)). And an 85-year-old woman vaccinated at 5 p.m. was "found unresponsive" less than two hours
 33 later and died shortly after ([915682-1](#)).

34 END QUOTE

34 END QUOTE

35 Well this is a lot of links and information but I have no intention to include it all as any reader
36 can check out each link for himself/herself.37 If however the “**European Medicines Agency**” indicates that there are “medicine” that are
38 tested and found to be useful against COVID-19 then surely the TGA cannot merely “**assume**”
39 there are no alternatives to “vaccinations”.

40 QUOTE

41 **The TGA monitors vaccines after they are supplied in Australia**

1 The TGA monitors vaccines for safety after they are supplied in Australia. If you experience an adverse event
 2 (side effect) from a vaccine, you should seek assistance from a health professional and [report the adverse](#)
 3 [event](#) to the TGA.

4 END QUOTE

5 Now this shows how blatant absurd the TGA is as it claims “If you experience an adverse event
 6 (side effect) from a vaccine, “**you should seek assistance** from a health professional” which
 7 implies that even so the “**mRNA**” so called vaccines have never before been used for humans
 8 and scientist and doctors made clear that they do not know what end effect it will have upon the
 9 human body, we now have the TGA making known to “**you should seek assistance** from a
 10 health professional”. As such never mind if some girl filling the shelves in some pharmacy is to
 11 vaccinate you and then when any serious allergy eventuates well she simply calls for an
 12 ambulance and by the time the ambulance arrives the individual may already be death. I view
 13 this is highly and totally irresponsible for the TGA to provide this kind of
 14 “**DISINFORMATION**” to the general population as if the “**mRNA**” is like any other general
 15 vaccination.

16 QUOTE

17 Reporting serious adverse events is mandatory for the companies who supply vaccines in Australia. These
 18 companies must also develop and implement risk management plans for their vaccines.

19 END QUOTE

20 Well I wonder how many reports were lodged with the TGA as to overseas “**SERIOUS**
 21 **ADVERSE EVENTS**”. If the TGA will claim that it can only consider “**SERIOUS ADVERSE**
 22 **EVENTS**” that eventuates in Australia well then it neither can rely upon any “**trials**” done
 23 overseas where it had absolutely no ability to supervise any of those “**trials**”.

24 As for “**These companies must also develop and implement risk management plans for their**
 25 **vaccines**.” That to me also is a very deceptive statement as after all it unlikely will have any
 26 ambulance at stand-by wherever someone is vaccinated. Neither would it limit any vaccination
 27 to any particular location as those who are doing the vaccinations would need to be doing so in
 28 an appropriate condition that in the event of any adverse reaction immediately appropriate
 29 medical care can be provided.

30 <https://blog.nomorefakenews.com/2021/02/16/they-didnt-isolate-the-virus/>

31 QUOTE

32 “They didn’t isolate the virus,”

33 Feb16 by Jon Rappoport

34 Chief Chinese epidemiologist tells NBC 35 News—referring to samples taken from the 36 Wuhan market a year ago

37 END QUOTE

38 The TGA I view totally irresponsible has approved for “**clinical trials**” to be conducted
 39 albeit the TGA appears to me not even itself to know what really constitutes the virus. How then
 40 can it even monitor and supervise what is relevant if they do not know what the virus consists
 41 off?

1
2 <https://blog.nomorefakenews.com/2021/02/16/they-didnt-isolate-the-virus/>

3 QUOTE

4 The Chinese scientist's name is Dr. Wu Zunyou. He is the chief epidemiologist at the Chinese Center for
5 Disease Control and Prevention. NBC News reporter, Janis Mackey Frayer, conducted a brief interview with
6 Dr. Zunyou on January 23, 2021.

7 Frayer mentioned that "samples" were taken, a year ago, at the beginning of the "outbreak," from the
8 infamous Huanan market in Wuhan. She then asked Dr. Zunyou, "Why has the data not been shared?"
9 He answered, "They didn't isolate the virus." He was referring to tissue samples taken from animals sold at
10 the market.

11 That's an interesting answer. Why have researchers and scientists claimed SARS-CoV-2 crossed species
12 from animals to humans at that market, when no one ever isolated the virus from samples taken at the
13 market?

14 The next, and far bigger question, is: When Dr. Zunyou says, "They didn't isolate the virus," is he ONLY
15 referring to tissue samples taken from animals at the market? Or does his answer also apply to the first 40
16 human cases of pneumonia in Wuhan, which were claimed to result from a newly discovered coronavirus?
17 I've queried Dr. Zunyou. We'll see if he replies.

18 I've spent the last year demonstrating that no one has proved SARS-CoV-2 exists. I've also explained why
19 people are dying, why the PCR test is meaningless and useless and deceptive, why the case and death
20 numbers are meaningless, and why the con is being foisted on the global population.

21 Since the early days of the "pandemic," many scientists authoring papers have claimed they isolated the
22 virus. However, I've explained how, in Orwellian fashion, they torture and twist and reverse the meaning of
23 the word, "isolate," so it signifies the opposite of what it ACTUALLY means.

24 I've also explained that the so-called genetic sequencing of the virus is another con. It isn't the result of
25 looking through some sort of cosmic microscope at genes lined up like cars in a supermarket parking lot. It's
26 a process using a computer program to stitch together DATA—PRESUMED pieces of a virus—based on
27 speculation, bias, pretension, and sheer hype. Rather than science.

28 Based on no evidence of a new virus, the Chinese regime locked down 50 million citizens. Fairly soon, they
29 lifted the lockdowns and pushed their economy into high gear again.

30 END QUOTE

33
34
35 Doctors petition EU to stop all COVID vaccine studies due to grave risks | News | LifeSite
36 (lifesitenews.com)

37 Doctors petition EU to stop all 38 COVID vaccine studies due to 39 grave risks

40 The renowned doctors mention infertility in women, increased
41 vulnerability to the coronavirus, as well as allergic or even fatal
42 reactions as risks associated with COVID vaccine studies.

43 QUOTE

44 AMSTERDAM, Netherlands, December 4, 2020 ([LifeSiteNews](#)) — Due to significant safety concerns, a
45 former vice president and chief scientist for pharmaceutical giant *Pfizer*, has joined a prominent German
46 physician and past head of a local public health department in petitioning for the immediate suspension of all
47 COVID-19 vaccine studies in Europe.

48 Dr. Michael Yeadon, who held *Pfizer*'s most senior research position in the field of allergy and respiratory
49 medicines prior to his departure in 2011, and epidemiologist and pulmonary specialist Dr. Wolfgang Wodarg
50 have filed their petition with the European Medicines Agency (EMA), which is responsible for approving
51 drugs in the European Union at large.

1 According to a report from [2020News](#), the two doctors “demand that the studies — for the protection of the
 2 life and health of the volunteers — should not be continued until a study design is available that is suitable to
 3 address the significant safety concerns expressed by an increasing number of renowned scientists against the
 4 vaccine and the study design.”

5 The petitioners point out that PCR tests, which have been broadly used around the world as a means of
 6 detecting the COVID-19 virus, are [known](#) by [experts](#) to lack accuracy, and are thus unsuitable for a serious
 7 study. As an alternative, they demand that something called “Sanger sequencing” must be used.

8 Without such a change, “neither the risk of disease nor a possible vaccine benefit can be determined with the
 9 necessary [level of] certainty,” which is why, they affirm, due to this factor alone, “testing the vaccine on
 10 humans is unethical.”

11 They also demand that “risks already known from previous studies, which partly originate from the nature of
 12 the corona viruses,” must be excluded by means of animal experiments prior to tests being performed on
 13 human beings. Such dangers include:

- 14 1. **Infertility in Women:** These vaccinations are expected to produce anti-bodies to attack “spike proteins”
 15 such as COVID-19. However, “spike proteins also contain syncytin-homologous proteins, which are
 16 essential for the formation of the placenta in mammals such as humans.” Therefore, the petitioners demand
 17 that “[it] must be absolutely ruled out” that a coronavirus vaccine would not trigger an immune reaction
 18 against this protein, “as otherwise infertility of indefinite duration could result in vaccinated women.”
- 19 2. **Increased vulnerability to the virus:** “The formation of so-called ‘non-neutralizing antibodies’ can lead
 20 to an exaggerated immune reaction, especially when the test person is confronted with the real, ‘wild’ virus
 21 after vaccination.” Past experiments on cats using this technology revealed that all of them “that initially
 22 tolerated the vaccination well died after catching the wild virus.”
- 23 3. **Allergic or even fatal reactions:** “The mRNA vaccines from BioNTech/Pfizer contain polyethylene glycol
 24 (PEG). 70% of people develop antibodies against this substance — this means that many people can
 25 develop allergic, potentially fatal reactions to the vaccination.”
- 26 4. **Unacceptable risk of long-term effects:** “The much too short duration of the study does not allow a
 27 realistic estimation of the late effects.” As a hastily developed vaccine for the swine flu [caused](#) many cases
 28 of narcolepsy over the last decade, the doctors point out that if the vaccine is used without sufficient study,
 29 millions of healthy people will be exposed to unacceptable risks.

30 END QUOTE

12
 13 January 29, 2021 ([LifeSiteNews](https://www.lifesitenews.com)) — In an extraordinary recent [presentation](#) exposing “the serious and life-
 14 threatening disinformation campaign” being waged against the American people and the world, Dr. Simone
 15 Gold of the American Frontline Doctors (AFLD) laid out the [facts](#) on the Wuhan Virus, safe highly-effective
 16 treatments, and particularly what she calls “experimental biological agents,” otherwise referred to as the
 17 COVID-19 vaccines.

18 Dr. Gold referred listeners to [two AFLD websites](#) where they can access a [white paper](#) produced by the
 19 AFLD physicians that provides thorough explanations and references for her presentation. Gold concluded
 20 her presentation with a passionate appeal for everyone to sign and spread a [petition](#) against authoritarian
 21 movements aimed at [coercing individuals](#) into receiving these injections.

22 The group’s white paper brings an array of crucial information together and is clear, accessible and well-
 23 documented. It reflects not only a depth of competence and great facility on the topics but a resolute
 24 commitment to truth and a deep fidelity to the noble mission of providing sound medical care for patients
 25 while defending the common good at large.

26 Highlights of the paper and Dr. Gold’s presentation include the following:

27 Correct language is ‘critical’: Not COVID-19 ‘vaccines,’ but *experimental biological agents*

28 Dr. Gold insists that even the designation of the new products as vaccines is inappropriate.

29 “Definitely you should not be calling this the ‘COVID-19 vaccines,’” she says. “The reason is, whatever you
 30 call it, it’s experimental. It’s not been approved as a vaccine. It’s currently in its investigational stage.”

31 The initial FAQ of the white paper explains, “According to the Food and Drug Administration,
 32 ‘An **investigational** drug can also be called an **experimental** drug and is being studied to see if your disease
 33 or medical condition improves while taking it.’ Pfizer and Moderna and AstraZeneca applications properly
 34 identify their new agents as ‘investigational,’ which is normal at this very early stage of development.”

35 The paper goes on to confirm that this experimental status means that “adverse events will be settled under
 36 the legal standard for experimental medications.”

37 As part of this experimental status, Dr. Gold explained, “If you take the vaccine, you’re being enrolled in a
 38 pharmacovigilance tracking system. It means you have enrolled yourself in a medical trial … most people
 39 are not aware that that’s what they’re doing. This pharmacovigilance tracking system tracks you for (at
 40 least) two years, it’s set up by the Department of Defense, it was handed off to Oracle and Google to put the

1 data together. How is it that people want to sign up for this system on an experimental (biological agent)?"
 2 she asked.

3 Thus, the founder of AFLD affirmed these injected treatments are "most properly called experimental
 4 biological agents. ... We need to call this by its proper name. Never talk about this without the word
 5 'experimental.' That's critical," she said.

6 'Wuhan Virus' to 'COVID-19'

7 In the presentation, Dr. Gold called the massive "disinformation campaign" on these topics "a crime against
 8 humanity" and stated, "You must understand the magnitude of the lie in order to understand what they are
 9 trying to tell you about these experimental vaccines."

10 As the paper observed, "from the beginning of the COVID-19 pandemic," there has been "massive
 11 disinformation" beginning with its very name.

12 Initially, and naturally, the pandemic was referred to as the "Wuhan Virus" since "epidemics have
 13 historically been named for the location from where they arise or are associated. Consider: Rocky Mountain
 14 Spotted Fever, Spanish Flu, Middle East Respiratory Syndrome, Lyme Disease," they wrote.

15 But this name was massively "rebranded" to "COVID-19" due to the displeasure of the Chinese Communist
 16 Party with the original name.

17
 18 Greatest disinformation: Hydroxychloroquine

19 The paper documented in some depth the "(m)ost notable" disinformation regarding the pandemic, which
 20 "was selling the lie to the American and European people that hydroxychloroquine (HCQ) is an unsafe
 21 medication." They detailed how the lie was advanced by "Scientists," the "Media & The Elite," "Big Tech
 22 Censorship," and with "Government Punishment of Doctors."

23 As HCQ is "considered one of the safest medications in the world, safer than Motrin or Tylenol," it has been
 24 broadly used outside the west with great success. For example, in response to the virus, both China
 25 and India mandated or recommended HCQ for its population early last year, and at least India, "continues to
 26 enjoy a death rate a fraction (~10 percent) of the USA even in the most densely populated slums."

27 "So in America the death rates are in the 800 range per million," Dr. Gold explained. "In Africa, Sub-Saharan
 28 Africa, the poorest places in the world, no social distancing, no mask, no ICU's, they have a death rate of one
 29 percent the western nations. One percent!"

30 "Now I believe it is due to widely available HCQ. I don't think you can explain it for any other reason," she
 31 said.

32 The paper provided thorough documentation on how "(c)ountries where HCQ is widely available, which are
 33 typically third world countries that have malaria or citizens who travel to malaria-endemic regions, have 1-10
 34 percent of the death rates of first world nations where HCQ is severely restricted."

36 Extremely high survival rate / low infection fatality rate for Wuhan Virus

37 "The most enduring myth regarding COVID-19," the doctors wrote, "is that this is a highly lethal infection. It
 38 is not. The data is unequivocal:

- 39 • COVID-19 kills very rarely and is mostly limited to the medically fragile,
 40 • COVID-19 is less deadly than influenza in children,

- 1 • COVID-19 is similar lethality in the middle adult years and treatable.”
- 2 They went on to cite the Centers for Disease Control’s (CDC) own “[best estimate](#)” to demonstrate that the
3 infection fatality rate (IFR) is overall very low:
- 4 • 0-19 years old: 0.00003 (99.997 percent survival rate)
- 5 • 20-49 years old: 0.0002 (99.98 percent survival rate)
- 6 • 50-69 years old: 0.005 (99.5 percent survival rate)
- 7 • 70+ years old: 0.054 (94.6 percent survival rate)

8 Further, in the presentation, Dr. Gold emphasized that these very high survival rates reflect cases where
9 people have *not* received treatment with HCQ, or another “miracle” drug, [ivermectin](#), and thus with such
10 simple, inexpensive treatments, they would be much higher still. Gold referenced the [testimony](#) of doctors
11 before a U.S. Senate committee in November who said if such treatments had been available, very high
12 numbers of lives could have been saved.

13 In the paper, the doctors observed, “It is quite clear that young people are at a statistically insignificant risk of
14 death from COVID-19,” and for most people under 65, “the risk of dying from COVID-19 isn’t much higher
15 than from getting in a car accident driving to work.”

Safety concerns for experimental vaccines

16 In contrast to the utilization of safe treatments like HCQ and ivermectin, there are many significant safety
17 concerns with these experimental vaccines.

Brand new mRNA technology

18 First, what the doctors call the “largest experimental medication program in our history” uses a brand-new
19 technology utilizing messenger RNA. “No vaccine” based on this technology “has ever been approved for
20 any disease, or even entered final-stage trials until now, so there’s no peer-reviewed published human data to
21 compare how mRNA stacks up against older technologies,” AFLD said.

No independently published animal studies

22 Further, previous coronavirus vaccines developed over decades have consistently failed in animal trials with
23 the death of their subjects. Yet, these experimental vaccines have no independently published animal studies.

24 “Vaccine safety requires proper animal trials and peer-reviewed data,” the paper stated, “neither of which has
25 occurred” with these experimental biological agents.

Recipient may become *more* vulnerable to virus

26 The AFLD White Paper stated that one of the greatest safety concerns relates to how “(p)rior coronavirus
27 (and other respiratory) vaccines have failed due to the scientific phenomena known as pathogenic priming
28 that makes the vaccine recipient **more** likely to suffer a sudden fatal outcome due to massive cytokine storm
29 when exposed to the wild virus.”

30 Of note, current reports revealed that [hundreds](#) of individuals injected with COVID-19 experimental vaccines
31 have been [admitted](#) to the hospital, and the shots have so far been [linked](#) to [at least](#) 181 [deaths](#) in the United
32 States.

Neurological diseases, long-term effects

1 The paper listed many other possible complications, including neurological diseases, and cited from the
 2 “extremely limited COVID-19 vaccine data” instances of them already occurring.

3 There is also no data on sub-categories of the population, including the elderly, women who desire to get
 4 pregnant, those who have had the Wuhan Virus already, and since these experimental agents are brand new,
 5 “we cannot know any long-term effects.”

6 Infertility

7 In addition, these chemicals may impact a woman’s fertility. The paper explained that the “mechanism of
 8 action of the experimental mRNA vaccines includes a possible auto-immune rejection of the placenta. In
 9 layman’s terms, the vaccine may permanently interfere with a woman’s ability to maintain a pregnancy.”

10 “The vaccine companies themselves acknowledge the possibility of ill effects on a pregnancy on the vaccine
 11 bottle, which says the following: ‘it is unknown whether COVID-19 mRNA VaccineBNT162b2 has an
 12 impact on fertility,’” the doctors wrote.

13 Dr. Gold emphasized, “I would never let a woman of child-bearing age take this. I would fight tooth and nail
 14 (to prevent it), under no circumstances, until this placenta question is answered.”

15 Manufactures have no liability

16 Of great concern as well is the fact that the companies that produce these experimental biological agents “are
 17 immune from all liability” due to the 1986 National Childhood Vaccine Injury Act. Therefore, those who
 18 are injured or even the families of those who suffer death due to these injections will have no claim on the
 19 manufacturers themselves.

20 Experimental vaccines are ‘not safer’ than the Wuhan Virus

21 AFLD then drew from common sense to conclude that taking an experimental vaccine “is not safer” than a
 22 very low IFR for the Wuhan Virus. Besides the “extraordinarily low” mortality rates, doctors are “getting
 23 better and better at treating COVID-19: the death rate in terms of population continues to fall, hospital stays
 24 for COVID-19 get shorter and hospital mortality from COVID-19 plummets.”

25 While not directly asserting that the experimental vaccines are unsafe, AFLD clarified that “We are saying
 26 that by definition it is unsafe to widely distribute an experimental vaccine, because taking a vaccine is
 27 completely different than taking an ordinary medication.”

28 “In contrast to taking a medication for an actual disease,” they explained, “the person who takes a vaccine is
 29 typically completely healthy *and would continue to be healthy without the vaccine*. As the first rule of the
 30 Hippocratic Oath is: do no harm, vaccine safety must be *guaranteed*. That has not yet happened.”

31 No proof that the experimental vaccines stop transmission of the virus

32 The doctors highlighted that there is no data on whether or not these experimental agents are actually capable
 33 of stopping the transmission of the virus. They affirmed that the “scientists are very upfront about the fact
 34 that they don’t know if the vaccine even stops the spread of the virus!”

35 They cited a Medscape article that quotes a former FDA official who said, “(w)e don’t know if people can
 36 become infected and thus also transmit even with vaccination.” For this reason, “people can expect to still be
 37 wearing masks, still be asked to follow non-pharmaceutical public health measures that we’ve all come to
 38 know so well.”

39 In dismay, Dr. Gold explained this point in her presentation, saying, “What is super shocking is that there is
 40 no proof that this biological agent actually stops the transmission among people. It’s like a joke, this is like
 41 the punch line to a joke, ‘let’s take a vaccine, and by the way it doesn’t actually stop transmission.’ I mean, I
 42 don’t even know what to say to that!”

AFLD recommendations regarding COVID-19 experimental vaccines

Based on the IFR by age, along with real potential dangers, AFLD came up with recommendations for who should not submit themselves to these experimental biological agents and who may have an option to.

In summary, they stated, that such injections are “**Prohibited** for the young, **Discouraged** for the healthy middle-aged and **Optional** for the co-morbid and elderly.”

Dr. Gold commented, “If you are under age 20, the experimental vaccine is prohibited, in our opinion, absolutely prohibited. We simply don’t know enough about its effects on fertility, and we do know that this virus, essentially does not affect young people. Essentially,” with regards to young people, COVID-19 is “irrelevant!”

“From age 20 to 50, if you are healthy, we strongly discourage,” your receiving this experimental agent, she said. “There is an exceedingly low risk,” as well.

In their white paper, the AFLD summarized their advice to different sections of the population regarding the vaccines.

a. 0-20: **prohibited**(exceedingly low risk from COVID, unknown risk of auto-immune disease, unknown risk of pathogenic priming, risk of lifelong infertility)

b. 20-50 healthy: **strongly discouraged** (exceedingly low risk from COVID, unknown risk of auto-immune disease, unknown risk of pathogenic priming, risk of lifelong infertility)

c. 50-69 & healthy: **strongly discouraged** (low risk from COVID, unknown risk of auto-immune disease, unknown risk of pathogenic priming, unknown effect on placenta and spermatogenesis)

d. 50-69 & co-morbid: **discouraged** (experimental vaccine is higher risk than early or prophylactic treatment with established medications)

e. >70 & healthy: **personal risk assessment** (experimental vaccine is higher risk than early or prophylactic treatment with established medications)

f. >70 & co-morbid: **personal risk assessment & advocacy access** (experimental vaccine early or prophylactic treatment with established medications)

The doctors concluded, “In medicine, the guiding principle is ‘First, do no harm.’ Widely distributing a COVID-19 experimental vaccine before adequately addressing and clinically evaluating the above concerns is reckless.”

Indeed, they charge that it is, in fact, “unethical to advocate for the vaccine to persons under 50. The risk and safety evidence based upon trials cannot be justified in younger persons. It is therefore prohibited.”

They also promised to do everything they can to assist injured plaintiffs who sue pharmaceutical companies, private businesses or government agencies who mandate or coerce “persons to comply with unethical policies for which there is substantial evidence of likely harm.”

Call to action: Sign and spread the petition

In response to projected vaccine mandates, Dr. Gold announced, “We intend to fight the urge that’s sweeping the globe to mandate people taking an experimental biological agent.”

AFLD is not primarily concerned with the government, but with private businesses mandating these injections, particularly schools and airlines.

“We intend to talk to the decision-makers in the airline industry,” she said. “One of our tools in that battle will be to go in armed with at least, at least, one million signatures of human beings who are going to say ‘no,

1 we are not going to do business with anybody, and we are not going to fly with anyone who is going to
 2 mandate (experimental vaccines).””

3 She encouraged everyone to “go to StopMedicalDiscrimination.org and sign the petition. You also must
 4 share that petition with everyone. Do not be shy! … it is your obligation. I’ve done my part, my doctors have
 5 done their part, you must do your part.””

6 “Not only do you sign it, (but) each of you should take it on yourself to say, ‘I’m going to make sure I get a
 7 thousand signatures’,” she said.

8 Gold also encouraged those who are in a union to build advocacy against these injections within their union.

9 And finally, she reminded her audience, “ALWAYS use the word ‘EXPERIMENTAL’ when you talk about
 10 this. Always!””

 39 allowances;

40 **END QUOTE**

1 Meaning, that the Government cannot force any medical doctor to perform some kind of
 2 "medical service" the medical practitioner may not agree with.

3
 4 In my view dealing with "DNA" issues require trained specialist in this field to deal with
 5 matters. An ordinary GP (General Practitioner) may have little or no knowledge/understanding at
 6 all as to the specifics of "mRNA" issues and cannot be permitted to interfere with this as such.
 7 Let alone some shelving stacker at a pharmacy, as now seems to be proffered by politicians.

8 Therefore, only specialist in "DNA" issues can be permitted to authorize the injection of any
 9 "mRNA" matter that affects the "DNA" of a person.

10
 11 In my view you seem to have a major problem that so called "EXPERTS" advising the TGA
 12 somehow seems to be blind from reality. I do not know how much the TGA is funded, if at all,
 13 by the pharmaceutical companies albeit I understand this might be a relevant issue to be
 14 considered. Likewise, those advising the TGA may very well have a financial interest in it all.
 15 That is not what I am now seek to pursue in detail. However, there ought to be no doubt that it is
 16 absurd that there are medical advisors who are recommending the lockdown of an entire state
 17 because of some person(s) allegedly having COVID-19, when I view it might be merely some
 18 kind of flu.

19
 20 **As I have not used a single moment any mask during 2020 and 2021 then obviously I am**
 21 **living proof that this COVID-19 is not some deadly disease that without a mask you be**
 22 **instantly dead.**

23 .

38 Thu Oct 29, 2020 - 1:18 pm EST

39 QUOTE

40 WASHINGTON, D.C., October 29, 2020 ([LifeSiteNews](#)) — A rapidly growing group of doctors critical of
 41 the government's and the media's response to the coronavirus crisis characterized mask wearing as
 42 "completely irrelevant to blocking the ... virus."

43 America's Frontline Doctors (AFLD), a "diverse, exceedingly well-credentialed" group of physicians,
 44 gathered in the nation's capital on October 16 and 17 for a second "White Coat Summit" aimed at countering
 45 "the massive disinformation campaign regarding the [COVID-19] pandemic," according to the
 46 official [website](#).

1 Physician, attorney, and founder of AFLD, [Dr. Simone Gold](#), began their [press conference](#) affirming the
 2 event's purpose to bring to "the American people truth ... hope ... optimism" and more reasons "to not live
 3 in fear" of the coronavirus.

4 She affirmed that there "continues to be a great deal of disinformation and outright censorship," which since
 5 July "has [only] gotten worse."

6 In response, the emergency doctor announced that AFLD had established a [website](#) where all can access
 7 information on these issues which "is not censored," and will serve to "dispel the myths" created by the
 8 media who has "lied to" the American people. (NOTE: article continues below the video).

9 The website even provides [practical help](#) for finding a physician who may prescribe hydroxychloroquine
 10 (HCQ), a pharmacy that would likely fill the prescription and a map of US states where HCQ use for COVID
 11 is not restricted.

12 There is also [detailed information](#) to give to a physician who may need convincing information about the
 13 effectiveness of HCQ. The website has a page that provides the simple details of the most
 14 effective [protocols](#) for using HCQ and lists other medications and supplements for both prevention and
 15 treatment of coronavirus infection.

Masks as "lucky charms"

17 With regards to masks, Gold did not mince her words, [stating](#), "The facts are not in dispute: masks are
 18 completely irrelevant to blocking the SARS-CoV-2 virus."

19 Encouraging all to do their own research, she affirmed they would "discover that prior to masks becoming
 20 political in March 2020, there was never even an attempt at a pretense that masks, let alone bandanas, stop a
 21 virus. It's a complete fabrication. A virus is 1/1000 the size of a hair."

22 Gold referred to Dr. Anthony Fauci, a key member of the White House Coronavirus Task Force
 23 who [confirmed](#) the same about masks in a March 2020 interview, as "Emperor Fauci."

24 She then cited the [New England Journal of Medicine](#) which acknowledged that "masks serve symbolic roles"
 25 and are thus mere "lucky charms that may help increase" a person's "perceived sense of safety."

26 In addition to having no effect on curbing the spread of the virus, Gold also made strong arguments that
 27 masks are "socially divisive," "cause an insurmountable civil libertarian issue," and even threaten national
 28 security.

29 Illustrating the absurdity of the dominant narrative, she said, "Notice that what the 'experts' have said for
 30 months has been wrong — there are not two million dead, our healthcare system was not overwhelmed, there
 31 were 10x the ventilators we needed, nearly everyone survives, and early treatment works."

32 "You must not ignore your own life experience!" she exclaimed. "If all you had to do to stop a virus is hold a
 33 tissue paper to your face, our ancestors would have learned this centuries ago and your grandmother would
 34 have taught you this!"

35 "The tiny Emperor Has No Clothes!" she concluded.

The deleting of history

37 In his brief statement, [Dr. James Todaro](#), an investigative physician with a medical degree from Columbia
 38 University in New York City, emphasized not "the censorship of the present," but "the deletion and rewriting
 39 of history" which is being committed by news organizations on a routine basis.

1 "Unbeknownst to many, news organizations are deleting articles from the past that no longer fit the narrative
 2 today ... of fear, panic and lockdown," Todaro said. "Case in point, earlier this week I tweeted-out a Forbes
 3 article ... called 'Why the World Health Organization faked a pandemic.' It was a scathing review of the
 4 WHO's overexaggerated response to the swine flu ten years ago. [It was] a 10-year-old article."

5 "About 12 hours after I tweeted out that article, Forbes deleted it from their database," he continued. "Forbes
 6 actually deleted their own story from ten years ago, overnight, when I drew attention to it. And that is going
 7 on unnoticed, continually. News organizations are deleting history."

8 "The pandemic is over"

9 Dr. Richard Urso, an ophthalmologist and graduate of the University of Texas Houston School of Medicine,
 10 explained how "early on" he realized that "we had a treatment for this virus," and thus, the "lockdown ...
 11 never made sense." Viruses involve infection, and often "inflammation, blood clots, and breathing
 12 problems," he stated. Since "every doctor" knows how to treat these issues, successful treatment was always
 13 available.

14 And, if anybody "tells you different, that is science fiction ... not science," he affirmed.

15 In using a chart to describe current statistics with regards to "cases" and deaths, Urso demonstrated that "we
 16 don't have a pandemic any longer."

17 Viruses, he explained, act in a consistent way. They have "a large peak early on," with many people "getting
 18 cases (and) a lot of people dying." Then, "about 110 days later ... You get a small peak follow-up," and next,
 19 the curve diminishes and flattens.

20 On his chart, Urso showed where the two peaks were, in March and July, and then pointed out the very low
 21 death rate in September despite a high number of reported "cases," emphasizing again, "the pandemic is
 22 over."

23 He also charged the media with "driving" what he referred to only as a "casedemic" with "fear and ... trying
 24 to make us believe that we need to stay locked down."

25 "Masks don't control viruses, they control you"

26 A graduate of the University of Rochester Medical School, Dr. Lee Merritt, served for 10 years as a military
 27 surgeon and also on a congressional committee investigating technology for the U.S. Navy.

28 As a spine surgeon, she explains, "I spent 40% of my life in a mask. And I can tell you in my entire career ...
 29 nobody was talking about masks as a control mechanism for viruses."

30 Viruses are passed by tiny ".12 micron" particles "that sneak out through the mask and around the mask ...
 31 Even the very best medical masks cannot screen out, cannot protect, from this type of small particle virus."

32 Indeed, "the atmosphere and the whole air fluidity is filled with viruses. We have it around us all the time.
 33 You can't mask that away."

34 Therefore, Merritt affirms, "masks don't control viruses, they control you." She calls the notion that they are
 35 not damaging to individuals, children and society, "a myth."

36 "Besides what they're doing to society as a whole, separating us, isolating us, think about what they're doing
 37 to our children," she said. "Children need to look at faces to learn how to be a human. Reading faces is part
 38 of humanity — interacting with people. We are creating a generation of children that have an inchoate fear of
 39 things ... children who are afraid of their environment."

"The masks may look like they are not much ... just a little soft piece of cloth over your face. What's the big deal? The big deal is, they may be soft, and they may look okay, but this is George Orwell's boot on a human face forever if we don't get this off," she concluded.

Hydroxychloroquine and dramatically better results

Having studied COVID-19 death rates in Africa, [Dr. Geoff Mitchell](#), a medical doctor and an attorney, discovered that “a person is 35 times more likely to die from a coronavirus in the United States than in the malaria endemic in sub-Saharan Africa.”

In his individual [presentation](#) on the subject, he affirmed that the “evidence strongly suggests this is due to travelers universally taking hydroxychloroquine-related prophylactic anti-malarial drugs” in those regions, which the FDA regulated in the U.S.

Schools in U.S. must be open

Certified primary care physician, and former 12-year elected school board member, [Dr. Jeffrey Barke](#), made a strong case that there remains no scientific justification for the closing of schools in the U.S.

"The data is clear from the CDC's own website," he affirmed. "If you're less than 20 years old the survivability of COVID-19 is 99.997%."

Giving examples, he showed that while “every death is a tragedy,” a child is about 5 times more likely to die from drowning, 8.3 times more likely to die in a traffic accident, and 25 times more likely to die from cancer, than from the coronavirus.

Secondly, he addressed “the notion that somehow our children spread this virus to at-risk adults,” confirming that this “just isn’t true.”

Demonstrating the point, he cited a [study](#) from *The Atlantic*, which “looked at 200,000 kids in 47 states,” and concluded that “kids barely get ill and they don’t spread this virus to at-risk adults.” Similarly, a German study of “over 2,000 students in 13 schools” concluded “that in fact children act as a break upon the virus spreading to adults.”

“Schools in United States must be open,” he said. “The fear of this virus is causing more harm than the virus itself: with increased anxiety, increased suicide, and increased depression. We must open the schools and we must stop spreading unnecessary fear to our children.”

Early treatment and “zero deaths”

Coming from El Centro, CA, [Dr. Brian Tyson](#), a board-certified family medicine doctor, explained how he rejected the directives of public health officials who advised doctors to send COVID-19 patients home until their symptoms had reached a certain level of severity.

Instead, using hydroxychloroquine, “[w]e treated this virus early. We treated this virus aggressively.” And in what he described as being “one of the highest-risk populations in the nation,” with patients ranging between the ages of 11 months to 90 years old, they treated “over 1,900 positive patients,” and “had only one hospitalization and zero deaths. Zero deaths!”

"I'm here to tell you, at the beginning of this, we were all afraid," he said. But "we're no longer afraid," since excellent early treatment is available. "We can go back to school again. We can go back to work again ... And we can go back to being Americans, again. We do not need to let fear take our freedom."

"The media has lied, and people have died"

Certified internal medicine physician from Texas, Dr. Robin Armstrong, told a story of the contrast between treating his patients in the hospital and those in the nursing home. In the former case he used a treatment regimen including "dexamethasone and convalescent plasma," with limited success. "We've seen a lot of patients die" in these circumstances, "and we've seen some of those patients get better."

By contrast, in his nursing home practice, he explained, they had "the opportunity to ... successfully treat" these "frail patients, very sick, the elderly patients," with "hydroxychloroquine, azithromycin and zinc, and those patients got better."

"Now the media, and a lot of fake doctors on television will tell you that hydroxychloroquine is not safe," he said. "And I'm here to tell you, that is an absolute lie! The media has lied, and people have died."

"Early treatment is the key and there is an inexpensive alternative. We are here today to say that COVID-19 does not have to kill. COVID-19 has therapeutics that you can be treated with if you're treated early, and that you do not need to walk in fear any longer," he concluded.

"A pandemic of hysteria"

Child and adolescent psychiatrist [Dr. Mark McDonald](#) discussed his experience with children over the last several months. "I've seen hundreds and hundreds of children since early 2020. They are all afraid," he said.

Decrying the environment of fear in which children are being raised today, he stated, "Not only have Americans become afraid, they have become infected by ... a pandemic of hysteria ... a delusional psychosis. A delusion is a fixed false belief contrary to reality. Americans today believe that we must keep our businesses closed, that we must keep our children at home, that we must wear masks over our faces and isolate ourselves from human beings in order to keep us alive. That is false. That is a lie. And it is killing us. It is killing us physically, mentally, socially, psychologically, it is killing our country, and it must stop."

A call to physicians

Capping off the press conference, Dr. Gold again stepped to the microphone to speak directly to her physician peers across the nation.

"Fellow doctors, our country is in a crisis, and there are forces at work using doctors as tools in their war games," she said. "I say to you now, my doctor peers, that the evidence that early treatment works is overwhelming. You are a physician. You must look at the science yourself. You are not allowed by the oath that you took yourself to follow the orders of another person saying it does not work, not the CDC, not the NIH, not the FDA, not Dr. Fauci, not Dr. [Deborah] Birx, not Dr. [Robert] Redfield."

"There is no reason to be living in fear," Gold exclaimed. "Even patients over 70 have a 95% success rate with a virus but the truth is it could be virtually 100% with the early treatment."

Addressing all Americans, she said, "To all Americans, when you are sick, who do you call? Do you call the CDC? The NIH? The FDA? No, you call your doctor. Don't believe a bureaucratic agency that is censoring your doctor. Go to our website. Become informed. Then go to your doctor knowing that early treatment works, masks do not. And if your doctor responds with fear, you need a new doctor, one who honors the Hippocratic oath."

Big tech censorship

In late July, America's Frontline Doctors met for their first "White Coat Summit." [Video](#) of the press conference went viral on social media, garnering 17 million views "within 8 hours," including "185,000 concurrent viewers at the time it was streamed," Breitbart News [reported](#).

1 The video was, however, swiftly removed from YouTube, Twitter, and Facebook for violating the sites'
 2 respective COVID-19 "misinformation" policies, even though the tech giants made no attempt to present any
 3 evidence for where these board-certified physicians provided "misinformation."

4 The tech companies have been heavily censoring any information that does not completely align with the
 5 World Health Organization. The WHO has been severely criticized by President Trump and many others for
 6 false information they gave on the coronavirus, their close connection to China's Communist Party, and
 7 many other reasons.

8 Multiple AFLD presentations related to COVID-19 can be accessed [here](#).

 20 because there was no food truck, and it had to close," Fox News reported.

21 As we all know, the coronavirus will not dare show its face if a food truck is in proximity. A brewery
 22 without a food truck, on the other hand, is undoubtedly an enormous breeding ground for the virus.

23 In addition to the fact that this rule makes no logical sense, the inspector happened to be wrong. Since the [brewery](#) was only selling to-go drinks, **they were actually not required to have a food truck present.**

24 Avery said that he is not sure why the inspector was dancing, but "the perception really sucks."

25 END QUOTE

26 Video: Brewery Owner Says He Caught Health Inspector Dancing After Telling His Business to
 27 Close (westernjournal.com)

28 QUOTE

29 The problem is that the responses to the virus have been overtly political. Lockdowns in California
 30 haven't slowed the spread, but state Democrats continue to pursue them.

31 Widespread transmission in schools is non-existent, but many counties still refuse to [reopen them](#). A brewery
 32 without a food truck is no more dangerous than a brewery with a food truck, and yet lawmakers continue to
 33 put these arbitrary measures in place.

1 **If lawmakers really cared about public health, their regulations would be backed by science — they're
2 not.**

17 Dr Lee Merit: The Vaxx is preparing the world for a MASS DEATH EVENT

18 <https://fromrome.info/2021/01/31/dr-lee-merit-coronavirus-vaccines-are-lethal/>

19 The things revealed in this video are explosive. The Covid Vaccines will allow future coronaviruses to enter
20 your body and multiply without resistance. Thus when the Chinese Military weaponizes the next coronavirus
21 EVERYONE VACCINATED WILL DIE.

22 This current mRNA vaccine is preparing the world for a mass DEATH EVENT when BILLIONS WILL DIE
23 ALL WITHIN A FEW WEEKS. — This is their intent. All the Vaxx companies are infiltrated by Chinese
24 Military Agents and are compromised to prepare this.

25 Dr. Merit explains the medicine behind the warfare method. And gives a lot of details about this new form of
26 warfare.

27 I believe that this diabolic scenario is what Our Lady of Akita, Japan, warned the world about: a future war in
28 which 2/3 of the world's population will die. Now it makes sense why She warned us from Japan, because
29 She knew the threat was Communist China.

21
22 **VACCINATION by COERCION AUSTRALIA**

23 **Please Read This Urgent Message the real flag . not the fake . worn on politicians lapel!**

24 Dear Kindred Souls,

25 Covid-19 vaccine is being rolled out **22 February** in Australia, for a virus which has claimed less Aussie
26 lives the past 12 months than a bad flu season.

27 We encourage you, to join us and our children at the peaceful protest march this coming Saturday the 20th of
28 February from 12 noon to 2pm.

29 We are meeting at Hyde Park . walking to Parliament House where there will be talks by some people, about
30 the dangers of the proposed coercive policies.

31 There is a march in every capital city. They have one focus and one focus only . to give us the right to say
32 yes or no to these new Covid-19 vaccines.

33 The march has been officially approved by the Council and the Police and therefore is a bone-fide, legal
34 protest.

35 There will be no arrests, no force and it will have the support of the police.

1 The issue we are protesting about is the coerced, mandatory covid-19 vaccinations which WILL happen
 2 unless we demonstrate that we do not consent.

3 Already Qantas has stated that their policy is No Shot, No Fly.

4 State governments will be imposing their own mandates as will other industries like entertainment and
 5 dining.

6 It will then extend to include things like supermarkets, hairdressers etc.

7 If we don't protest about this now, things like your driver's license could also be contingent upon
 8 vaccination, as Health criminal Hunt stated.

9 The faux government . via the Public Health authorities aim is to make it so difficult to live without having
 10 your vaccination, without them calling it

11 compulsory, that people submit against their will.

12 If that is something you do not want, please join us at the march. Every person counts.

13 We know it is inconvenient, and we would rather be doing something else, but we are now in the fight of our
 14 lives for our health freedom.

15 Also keep in mind that when vaccination becomes mandatory, you are then being **injected twice a year for**
 16 **the rest of your life,**

17 as each vaccine has 2 shots per year at least.

18 If you or your loved ones get injured or die, God forbid, the **drug companies have been granted complete**
 19 **immunity from liability.**

20 This is no different from how it is now with vaccines.

21 Also, keep in mind these facts:

22 * these vaccines are not properly tested. The quickest a vaccine has ever been made is 4 years. The current
 23 ones were done in **months.**

24 The m-RNA vaccines from Pfizer . Moderna are not really vaccines . but gene technology delivery systems,
 25 something never ever having been used before in public on this scale.

26 The term used officially is “post-marketing surveillance”, which means we become guinea pigs and test
 27 subjects for these experimental injections;

28 * these vaccines have resulted in 10 times the allergic reactions and anaphylaxis than the flu vaccine.

29 One of the ingredients in both m-RNA vaccines is polyethylene glycol, a chemical to avoid, and some of the
 30 vaccines contain aborted foetal cell lines;

31 * there have been 653 deaths and 12,044 injuries associated with the newly released experimental vaccines in
 32 the past 8 weeks up until Feb 4th,

33 according to CDC data. Because the USA rolled them out first, 602 of these deaths have come from America.

34 The average age of those who died after the injection was 77 and the youngest was 23.

35 By comparison, in the full year of 2009, 112 deaths followed the flu vaccine in the USA, as reported to
 36 VAERS (Vaccine Adverse Event Reporting System);

37 * Israel have experienced a 400% increase in deaths since the vaccines were released a few weeks ago, while
 38 nearby Palestine have NOT released the vaccine, have had a 70% decline in deaths;

39 * the authorities have openly admitted that the vaccines will not stop you from getting, or transmitting the
 40 virus, so all measure like quarantining, social distancing etc will remain, even with the vaccine;

1 * these experimental vaccines have **never** been tested on people with things like Guillain- Barre Syndrome,
 2 Multiple Sclerosis, or those taking strong biological drugs for auto-immune disease, and yet they have been
 3 encouraged to get the shot;

4 * in a few days, the drug companies overseas start testing these experimental, poorly tested vaccines on
 5 children – yes that's right.

6 **Stay For a Picnic:**

7 After the walk and talks this Saturday, there will be a picnic in Hyde Park.

8 It's a great way to catch up and meet people of like-mind who really care about retaining bodily autonomy
 9 and the future health of our citizenry.

10 Bring some food and drink . Many people we know are traveling far from country areas . staying overnight.

11 We apologize if some of you receive this email more than once.

12 Hope to see you all this Saturday . please could you all send this email or encourage as many as possible to
 13 attend with you.

14 We are at the crossroads and it's now or never. If the authorities and private industries see a huge turnout we
 15 have a good chance of stopping this before

16 the vaccines become mandatory, just as happened in Denmark recently where thousands protested against the
 17 very same thing and the government repealed the vaccine-mandatory law.

18 Yours for health freedom,

19 Solutions Empowerment

19 END QUOTE email received on 18 January 2021 from one of my readers

22 People often make conclusions regardless of the facts. A clear example is the USA Presidential
 23 election theft that so many claim is an imagination of President Donald J Trump rather than to be
 24 facts. They dare to refer to more than 60 court decisions just that about all of them used
 25 “technicalities” with a total disregard of any “evidence”. I am a person who generally does his
 26 own investigation and the issue of there was any fraud in the 2020 USA Presidential election can
 27 be shown with ease.

28 It should be understood that as similar voting systems are used in NSW and WA and faculty
 29 Members of the Melbourne University appears to have established those voting machines
 30 likewise are vulnerable to the same voting fraud, then this is relevant to Australia also.

31 While I was in various elections and have a background knowledge that there are more ways to
 32 be the victim of a fraudulent election I nevertheless will keep it simple for any ordinary person to
 33 understand there was ELECTION FRAUD.

1 This image shows that one person's vote was divided between 3 candidates in fractions. No such
 2 system, at least officially, exist in vote counting. It may be noticed that underneath there are 25
 3 voted which also have been split in fractions. As such, the voting machines were using algorism
 4 to ensure that one candidate was receiving part of another candidates votes, in this case Joe
 5 Biden more than twice of President Donald J Trump votes. And this was when the deliberate
 6 algorism to ensure no matter how many voted President Donald J trump was provided with the
 7 algorism would ensure the 2.0046589 ratio would be maintained for Joe Biden versus 0.716172
 8 for President Donald J Trump for several hours, even if about all votes were to be for President
 9 Donald J Trump. As such, the voting machines were set that the number of votes for candidate
 10 President Donald J Trump would always be partly assigned to Joe Biden to ensure he would
 11 always have the majority of the votes.

2
3
4 This image is clear that in a mere “**5 seconds somehow**” 4,258 persons voted for Joe Biden and a
5 mere 5,968 for President Donald J Trump. By this the total count for Joe Biden from being
6 behind President Donald J Trump suddenly he was in front.

7 The following may underline the statistically impossibility that no matter how votes number
8 changed over an 8 hour period from a few to over 800.000 in the end the ratio was always the
9 same.

1 It should therefore be very clear that the evidence shows that fractions of votes cannot be correct
 2 this as a persons 1 (one) vote must always be and remain to be 1 (one) vote. Within the
 3 ***Commonwealth of Australia Constitution Act 1900*** (UK) provides:

4 **QUOTE**

5 **8 Qualification of electors**

6 The qualification of electors of senators shall be in each State that which is prescribed by this
 7 Constitution, or by the Parliament, as the qualification for electors of members of the House of
 8 Representatives; but in the choosing of senators each elector shall vote only once.

9 **END QUOTE**

10 ***Commonwealth of Australia Constitution Act 1900*** (UK) provides:

11 **QUOTE**

12 **30 Qualification of electors**

13 Until the Parliament otherwise provides, the qualification of electors of members of the House of
 14 Representatives shall be in each State that which is prescribed by the law of the State as the
 15 qualification of electors of the more numerous House of Parliament of the State; but in the
 16 choosing of members each elector shall vote only once.

17 **END QUOTE**

18 While the electoral system may provide for numbering candidates in order of preference, an
 19 elector cannot vote for two or more candidates to be first. Therefore, no fraction of the vote can
 20 be tolerated. However, with NSW and WA it appears that nevertheless this is now being done by
 21 the fractioning of a single vote for more than one candidate

22 As my writings have referred to that even politicians and judges are involved in the buying of
 23 votes schemes of about \$ 10 a vote in the USA and this alone may underline why many judges
 24 use their kind of technicalities to avoid President Donald J Trump or others to succeed in any
 25 litigation to expose the FRAUD in elections.

26 **Likewise, in my view we have similar kind of interest at hand with politicians, judges,
 27 scientist and those in the medical profession where they might be so corrupt that they are
 28 willing to put the lives not only of themselves but also of their family members at risk for
 29 the sake of the financial support of Big Tech, etc.**

30 It may be noted that my previous FOI request to Premier Daniel Andrews was never responded
 31 upon. Hence I then in my “**20200829-G. H. Schorel-Hlavka O.W.B. to Mr Daniel Andrews
 32 Premier of Victoria-legal notice-supplement 1**” stated the following also.

33 **END QUOTE 14-8-2020 CORRESPONDENCE to Premier Daniel Andrews**

34 **I demand THAT ALL AND ANY UNCONSTITUTIONAL REQUIREMENTS by the
 35 State Government or any of those acting for and on its behalf to enforce a CURFEW
 36 are seize and desist doing so immediately.**

37 **I demand THAT ALL AND ANY UNCONSTITUTIONAL REQUIREMENTS by the
 38 State Government or any of those acting for and on its behalf to enforce a LOCKDOWN are seize and desist doing so immediately.**

39 **I demand THAT ALL AND ANY UNCONSTITUTIONAL REQUIREMENTS by the
 40 State Government or any of those acting for and on its behalf to enforce a “social
 41 distancing” are seize and desist doing so immediately.**

42 **I demand THAT ALL AND ANY UNCONSTITUTIONAL REQUIREMENTS by the
 43 State Government or any of those acting for and on its behalf to enforce “compulsory
 44 mask wearing” are seize and desist doing so immediately.**

1 **I demand THAT ALL AND ANY UNCONSTITUTIONAL REQUIREMENTS by the**
 2 **State Government or any of those acting for and on its behalf to enforce “compulsory**
 3 **vaccination” are seize and desist doing so immediately.**

5 Failure to seize and desist leaves me no alternative but to petition the High Court of Australia for
 6 this.

7 END QUOTE 14-8-2020 CORRESPONDENCE to Premier Daniel Andrews

9 No response was received on this either.

11 On 10 September 2020, I emailed to the Registry of the High Court of Australia my application,
 12 which due to the Victorian “**DECLARATION OF DISASTER**” and “**DECLARATION OF**
 13 **EMERGENCY**” could not be filed in an ordinary manner. The Registrar of the Court however
 14 refused to list the Application upon the argument it was not according to the Rules of the Court.
 15 Again, we had in place a Victorian “**DECLARATION OF DISASTER**” and
 16 “**DECLARATION OF EMERGENCY**” and as such in my view this must be considered then
 17 by a judge of the Court. However, the Registrar who is not an Officer of the Court and neither
 18 has any legal authority to unilaterally prevent a person’s Application nevertheless refused to
 19 place the matter before a judge of the High Court of Australia as is legally applicable.

21 Despite my various writings including to “**20200919-G. H. Schorel-Hlavka O.W.B. to The**
 22 **Honourable Susan Mary Kiefel Chief Justice of the High Court of Australia-**
 23 **COMPLAINT**” nothing has been resolved. Nevertheless unless and until if ever at all a judge of
 24 the Court makes a decision the matter remains outstanding, so its replacement 11 October 2020
 25 Application.

27 On 11 October 2020 I then lodges with the High Court of Australia my replacement Application
 28 via email and this too remained in limbo.

29 QUOTE

30 **IN THE HIGH COURT OF AUSTRALIA**

31 **MELBOURNE OFFICE OF THE REGISTRY**

No. M of 2020

13 Minister for the Coordination of Environment, Land, Water and Planning: COVID-19 Defendant 5

**ON THE MATTER OF AN (EX PARTE) APPLICATION FOR
WRIT OF PROHIBITION AND CERTIORARI AND MANDAMUS**

DRAFT ORDER NISI

20 The plaintiff applies for the relief set out in Part 1 on the grounds set out in Part II

23 Justice :
24 DATE and PLACE of hearing;
25 Date of orders ;
26 Where made ;

Part I: ORDERS SOUGHT

- 29 1. The defendants DO SHOW CAUSE why a **WRIT OF PROHIBITION** should not be
30 issued out of this court directing the defendants

31 (i) not to commence and/or continue with conduct in violation of the *Biosecurity*
32 *Act 2015 (Cth)* including but not limited to S.60, S.83, S.87, S.88, S.90, S.91,
33 S.92, S.474, S.475, S.477(4), S. 477(5), S. 477(6), S.478(3)

34 (ii) not to engage in compulsory vaccination programs in regards to any citizen in
35 the State of Victoria in violation of *Biosecurity Act 2015 (Cth)*

36 (iii) not to use any State of Emergency / State of Disaster for the State of Victoria
37 regarding an alleged disease(s) in violation of the *Biosecurity Act 2015 (Cth)*

38 (iv) to cease creating a standing army including the hiring or utilising the services
39 of a private police/ protection force known as ‘Strong Cities Network’, or any
40 similar organisation whatsoever in violation of S. 114 of the *Commonwealth*
41 *of Australia Constitution Act 1900 (UK)*

42 (v) not to violate S.92 of the *Commonwealth of Australia Constitution Act 1900*
43 *(UK)*

44 (vi) not to violate S.114 of the *Commonwealth of Australia Constitution Act 1900*
45 *(UK)*

46 (vii) not to violate S.117 of the *Commonwealth of Australia Constitution Act 1900*
47 *(UK)*

48 (viii) not to violate S.119, of the *Commonwealth of Australia Constitution Act 1900*
49 *(UK)*

- 1 (ix) not to compel individuals and citizens of Victoria to wear a face mask or other
 2 such covering in violation of S.88 of the *Biosecurity Act 2015 (Cth)*
 3 (x) not to compel individuals and citizens of Victoria to ‘social distance’ by a
 4 minimum 1.5m or there about
 5 (xi) not to impose a curfew and/or lockdown or other limits of distances on
 6 individuals and citizens of Victoria other then by a order of a competent court
 7 of law
 8 (xii) not to prevent individuals and citizens of Victoria from trading in their usual
 9 manner in violation of Common Law and in violation of Public Health and
 10 Wellbeing Act and/or other Commonwealth and/or State legislation for so far
 11 applicable
 12 (xiii) not to compel individuals and citizens of Victoria to undergo medical testing
 13 for SARS-CoV-2 in violation of the *Biosecurity Act 2015 (Cth)*
 14 (xiv) not to prevent individuals and citizens of Victoria from peaceful protest in
 15 violation of articles 21 and 22 *International Covenant on Civil and Political*
 16 *Rights (ICCPR)*
 17 (xv) not to prevent individuals and citizens of Victoria from peaceful gathering in
 18 violation of articles 21 and 22 of the *International Covenant on Civil and*
 19 *Political Rights (ICCPR)*
 20 (xvi) not to restrict individuals and citizens of Victoria from freely moving within
 21 and/or outside the State of Victoria in violation of *Biosecurity Act 2015 (Cth)*
 22 (xvii) not to prevent individuals and citizens of Victoria from leaving the State in
 23 contravention of *Commonwealth of Australia Constitution Act 1900 (UK)* S.
 24 92 and *Biosecurity Act 2015 (Cth)*
 25 (xviii) not to prevent any individual from entering the State in contravention of
 26 *Commonwealth of Australia Constitution Act 1900 (UK)* S.92, S.117 and
 27 *Biosecurity Act 2015(Cth)*
 28 (xix) not to provide false and/or misleading reports of SARS-CoV-2 infections to
 29 any person or media
 30 (xx) not to provide false and/or misleading reports of SARS-CoV-2 deaths to any
 31 person or media
 32 (xxi) not to publish exaggerated and /or misleading information and/or reports
 33 regarding SARS-CoV-2 in the media
 34 (xxii) not to instruct or encourage website hosts / domain hosts / social media to
 35 censor, delete, block, hinder or otherwise, any websites and/or social media
 36 users on their freedoms of speech and expression in violation of common law
 37 and relevant human rights

38
 39 2. The defendants DO SHOW CAUSE why a Writ of CERTIORARI should not be
 40 issued out of this court directing the defendants to

- 41 (i) provide all the information upon which they relied to reach their decision and
 42 take the subsequent actions that led to violations of the *Biosecurity Act 2015*
 43 (*Cth*) including but not limited to Sections S.60, S.83, S.87, S.88, S.90, S.91,
 44 S.92, S.474, S.475, S.477(4), S.477(5), S.477(6), S.478(3)
 45 (ii) to provide all the information upon which they relied to reach their decision
 46 and take the subsequent actions, directives and/or programs to initiate
 47 compulsory vaccination in regard to any citizen in the State of Victoria
 48 (iii) to provide all the information upon which they relied to reach their decision
 49 and take the subsequent actions and declare a State of Emergency / State of
 50 Disaster for the State of Victoria regarding SARS-CoV-2
 51

- 1 (iv) to provide all the information upon which they relied to reach their decision
 2 and take the subsequent actions to justify their actions in creating a standing
 3 army, including the hiring or utilising the services of a private police/
 4 protection force known as ‘Strong Cities Network’, or any similar
 5 organisation whatsoever, in the State of Victoria
- 6 (v) to provide all the information upon which they relied to reach their decision
 7 and take subsequent actions in violation of S.92 *Commonwealth of Australia*
 8 *Act 1900 (UK)*
- 9 (vi) to provide all the information upon which they relied to reach their decision
 10 and take subsequent actions in violation of S.114 *Commonwealth of Australia*
 11 *Act 1900 (UK)*
- 12 (vii) to provide all the information upon which they relied to reach their decision
 13 and take subsequent actions in violation of S.117 *Commonwealth of Australia*
 14 *Act 1900 (UK)*
- 15 (viii) to provide all the information upon which they relied to reach their decision
 16 and take subsequent actions in violation of S.119 *Commonwealth of Australia*
 17 *Act 1900 (UK)*
- 18 (ix) to provide all the information upon which they relied to reach their decision
 19 and take the subsequent actions to compel individuals and citizens of Victoria
 20 to wear a face mask
- 21 (x) to provide all the information upon which they relied to reach their decision
 22 and take the subsequent actions to compel individuals and citizens of Victoria
 23 to ‘social distance’ by a minimum 1.5m
- 24 (xi) to provide all the information upon which they relied to reach their decision
 25 and take the subsequent actions to impose a curfew on individuals and
 26 citizens of Victoria
- 27 (xii) to provide all the information upon which they relied to reach their decision
 28 and take the subsequent actions to prevent individuals and citizens of Victoria
 29 from trading in their usual manner
- 30 (xiii) to provide all the information upon which they relied to reach their decision
 31 and take the subsequent actions to compel individuals and citizens of Victoria
 32 to undergo medical testing for SARS-CoV-2
- 33 (xiv) to provide all the information upon which they relied to reach their decision
 34 and take the subsequent actions to prevent individuals and citizens of Victoria
 35 from peaceful protest
- 36 (xv) to provide all the information upon which they relied to reach their decision
 37 and take the subsequent actions to prevent individuals and citizens of Victoria
 38 from peaceful gathering
- 39 (xvi) to provide all the information upon which they relied to reach their decision
 40 and take the subsequent actions to restrict individuals and citizens of Victoria
 41 from freely moving within the State of Victoria
- 42 (xvii) to provide all the information upon which they relied to reach their decision
 43 and take the subsequent actions to prevent individuals and citizens of Victoria
 44 from leaving the State
- 45 (xviii) to provide all the information upon which they relied to reach their decision
 46 and take the subsequent actions to prevent any individual from entering the
 47 State
- 48 (xix) to provide all the information upon which they relied to reach their decision
 49 and take the subsequent actions to provide false and/or misleading reports of
 50 SARS-CoV-2 infections to the public and media

- 1 (xx) to provide all the information upon which they relied to reach their decision
 2 and take the subsequent actions to provide false and/or misleading reports of
 3 SARS-CoV-2 deaths to the public and media
- 4 (xxi) to provide all the information upon which they relied to reach their decision
 5 and take the subsequent actions to publish exaggerated and /or misleading
 6 information and/or reports regarding SARS-CoV-2 on government websites
- 7 (xxii) to provide all the information upon which they relied to reach their decision
 8 and take the subsequent action to instruct or encourage website hosts / domain
 9 hosts / social media, to censor, delete, block, hinder or otherwise, any
 10 websites and/or social media users on their freedoms of speech and expression
- 11 (xxiii) to assist the plaintiff to be able to execute/conduct/perform any and all
 12 requirements as provided for by the Rules of the Court and avoid any undue
 13 delays/obstruction to the plaintiff in that regard.
- 14
- 15 3. The defendant DO SHOW CAUSE why a Writ of MANDAMUS should not be issued
 16 out of this court directing the defendants
- 17 (i) to cease violations of Sections S.60, S.83, S.87, S.88, S.90, S.91, S.92, S.474,
 18 S.475, S.477(4), S. 477(5), S. 477(6), S.478(3) of the *Biosecurity Act 2015*
 19 (*Cth*)
- 20 (ii) to retract the declaration of State of Emergency / State of Disaster for the
 21 State of Victoria regarding SARS-CoV2
- 22 (iii) to cancel all agreements between them and any standing army, including the
 23 services of a private police/ protection force, including any group known as
 24 ‘Strong Cities Network’, or any similar organisation whatsoever, and prevent
 25 their entry into the State of Victoria
- 26 (iv) to cease violation of S.92, S.114, S.117, S.119, of the *Commonwealth of*
 27 *Australia Act 1900 (UK)*
- 28 (v) to revoke the compulsory order for healthy citizens of Victoria to wear a face
 29 mask
- 30 (vi) to revoke the order compelling individuals and citizens of Victoria to ‘socially
 31 distance’ by a minimum 1.5m (or such distance that may be directed)
- 32 (vii) to revoke the order imposing a curfew on individuals and citizens of Victoria,
 33 and/or preventing any further such curfew to be implemented/enforced
- 34 (viii) to revoke any orders or directives to prevent any individuals or citizens of
 35 Victoria to trade in their usual manner
- 36 (ix) to revoke any order or directives compelling individuals and citizens of
 37 Victoria to undergo medical testing for SARS-CoV-2
- 38 (x) to revoke any orders or directives prohibiting individuals and citizens of
 39 Victoria from peaceful protest
- 40 (xi) to revoke any orders or directives prohibiting individuals and citizens of
 41 Victoria from peaceful political and/or other gathering
- 42 (xii) to revoke any order or directive restricting the movement of individuals and
 43 citizens of Victoria who are uninfected with SARS-CoV-2 from freely
 44 moving within the Commonwealth
- 45 (xiii) to present true and accurate figures of SARS-CoV-2 infections to the public
 46 and media
- 47 (xiv) to present true and accurate figures to the public and media of individuals
 48 whose deaths arise primarily from SARS-CoV-2 and not merely detecting the
 49 presence of antibodies in the blood
- 50 (xv) to amend all government websites and any other affiliated public forums, and
 51 all media outlets, which have inaccurate or misleading reports concerning
 52 SARS-CoV-2

- 1 (xvi) to retract and/or revoke any direct and/or indirect demands, conditions,
 2 request or instruction to any website hosts / domain hosts / social media, to
 3 censor, delete, block, hinder or otherwise, any websites and/or social media
 4 users on their freedoms of speech and expression
- 5 (xvii) to order the state and federal police to cease persecuting individuals on the
 6 grounds of ‘incitement’ to ignore any of the Chief Health Officer’s directives
 7 referred to in these proceedings
- 8 (xviii) to provide written notice to comply with any order in accordance with their
 9 obligations under *Public Health and Wellbeing Act 2008* and *Biosecurity Act*
 10 *2015 (Cth)*

11

12 **Part II: Statement of grounds**

13 The grounds upon which the application is based relies on the powers and restrictions
 14 conferred on the defendants via the following Acts and the defendants’ breach, failure
 15 to comply with, and/or, misfeasance and malfeasance of said Acts, being;

- 16 (i) *Commonwealth of Australia Act 1900 (UK)*
 17 In particular, section 92, 114, 116, 117, 119
- 18 (ii) *Biosecurity Act 2015 (Cth)*
 19 In particular, those dealing with personal rights and legal requirements
 20 applicable by the Federal Minister for health directions/decisions
- 21 (iii) *Public Health and Wellbeing Act 2008*
 22 In particular, those purportedly used regarding “man-kind” diseases violating
 23 the Commonwealth of Australia legislative powers including ***the Biosecurity***
 24 ***Act 2015 (Cth)***
- 25 (iv) *International Charter of Human Rights*
- 26 (v) Such further and other legal provisions that may be applicable, including
 27 Authorities

28

29 **Part III: Appropriate Jurisdiction**

30 The matters raised in this application include constitutional ruling and require the
 31 matter to be listed and heard in the High Court.

32

33 **Part IV: Brief statement of the factual background**

34 Between October 2019 and December 2019, the World Health Organisation (W.H.O)
 35 released information to governments throughout the world concerning an influenza-
 36 type virus referred to as SARS-CoV-2, together with recommendations.

37 In January 2020, Scott Morrison PM, announced to the Australian population the
 38 country was in the midst of a ‘pandemic’.

39 In March 2020, Daniel Andrews, Premier of Victoria, declared a State of Emergency.
 40 Contemporaneously, Brett Sutton, Victorian Chief Health Officer (C.H.O), was
 41 martialled to oversee and direct the operations under the powers vested in him under
 42 the *Biosecurity Act 2015* and/or *Public Health and Wellbeing Act 2008*.

43 In that capacity, the C.H.O and the Victorian Premier, amongst others, announced
 44 certain restrictions upon Victorians between March 2020 and September 2020. These
 45 restrictions include but are not limited to;

- 46 (i) Closure of businesses

- 1 (ii) Restrictions on free movement of individuals throughout the State
- 2 (iii) Restrictions on peaceful gatherings
- 3 (iv) Requiring individuals to remain at least 1.5m apart from others
- 4 (v) Mandatory requirement of citizens to wear face coverings / masks
- 5 (vi) Mandatory and forced testing of citizens for infection of SARS-CoV-2
- 6 (vii) Restriction of movement of citizens across State borders
- 7 (viii) Gave instructions to medical practitioners and coroners to include information about SARS-CoV-2 on death certificates
- 8 (ix) Published via mainstream media and others, information about alleged infections and alleged deaths from SARS-CoV-2
In particular, see Affidavit and Exhibit(s)

Part III: Appropriate Jurisdiction

The matters raised in this application include constitutional ruling and require the matter to be listed and heard in the High Court.

Part IV: Brief statement of the factual background

Between October 2019 and December 2019, the World Health Organisation (W.H.O) released information to governments throughout the world concerning an influenza-type virus referred to as SARS-CoV-2, together with recommendations.

In January 2020, Scott Morrison PM, announced to the Australian population the country was in the midst of a ‘pandemic’.

In March 2020, Daniel Andrews, Premier of Victoria, declared a State of Emergency. Contemporaneously, Brett Sutton, Victorian Chief Health Officer (C.H.O), was martialled to oversee and direct the operations under the powers vested in him under the *Biosecurity Act 2015* and/or *Public Health and Wellbeing Act 2008*.

In that capacity, the C.H.O and the Victorian Premier, amongst others, announced certain restrictions upon Victorians between March 2020 and September 2020. These restrictions include but are not limited to;

- 33 (i) Closure of businesses
- 34 (ii) Restrictions on free movement of individuals throughout the State
- 35 (iii) Restrictions on peaceful gatherings
- 36 (iv) Requiring individuals to remain at least 1.5m apart from others
- 37 (v) Mandatory requirement of citizens to wear face coverings / masks
- 38 (vi) Mandatory and forced testing of citizens for infection of SARS-CoV-2
- 39 (vii) Restriction of movement of citizens across State borders
- 40 (viii) Gave instructions to medical practitioners and coroners to include information about SARS-CoV-2 on death certificates
- 41 (ix) Published via mainstream media and others, information about alleged infections and alleged deaths from SARS-CoV-2

- (x) Imposed curfews
 - (xi) Quarantined large sections of healthy citizens
 - (xii) Quarantined large sections of Victoria
 - (xiii) Closure of schools
 - (xiv) Imposed fines for non-compliance and implored the Police to enforce their edicts and arbitrary rules
 - (xv) Incurred billions of dollars of debt by way of loans
All the while concealing from the public, and any lay enquirers, the information upon which they relied in making these decisions.
 - (x) Restricting directly/indirectly medical services which has prevented my 87 year old wife who suffers heart failure and other underlying health problems to have appropriate medical care where physical face to face appointments has to be conducted via telehealth consultations and other in person appointments cancelled causing considerable distress to my wife that in her medical/health situation aggravates her conditions.
 - (xi) That in my view the issue of interim EX PARTE orders are justified as to avoid a protracted hearing that might be too late for my wife to obtain any benefits such as appropriate medical care she now requires.
 - (xii) Such further and other issues as outlined in my Affidavit in support of this Application

Part V: A brief statement in support of the application

That this is a matter of extreme urgency and of "**PUBLIC INTEREST**".

The *Commonwealth of Australia Act 1900* (UK) together with the *Public Health and Wellbeing Act 2008* and *Biosecurity Act 2015* (Cth) impose strict protocol and limitations on the governments' powers in the event of a biosecurity health risk, and in the general day-to-day monitoring of public health and safety.

The defendants' actions in declaring a State of Emergency, then State of Disaster, then ordering 'social distancing', compulsory mask wearing, curfews, lockdowns, restrictions of movement, medical testing, and the preparation and dissemination of false and misleading information concerning the

- (i) number of infections of SARS-CoV-2
 - (ii) number of deaths directly caused by SARS-CoV-2
 - (iii) impinging on the rights of individuals to report evidence to the contrary constitutes misfeasance and malfeasance of their duties, and an abuse of their position.
The actions of the defendants directly caused financial harm to hundreds of thousands of citizens through job loss and forced business closures.
The compulsory imprisonment of citizens in their homes and the forced wearing of face masks and undergoing of medical testing / procedures is a

1 gross impingement on individuals' human rights, civil rights and common
 2 law rights, which caused physical and psychological harm to recipients of
 3 the governments' dictates.

4 The misfeasance and malfeasance of the defendants further diminish the
 5 social and financial standing of the State and Commonwealth and its citizens
 6 by taking hundreds of billions of dollars in loans under the pretext of
 7 'supporting and stimulating the economy' which was not in need of any
 8 such support or stimulation prior to the defendants forced lockdowns and
 9 closures.

10 END QUOTE
 11

12 Obviously, this Application shows not to be full of my self professed “Crummy English”, this as
 13 I had assistance to reformulate the Application.

14 Again, we had in place a Victorian “**DECLARATION OF DISASTER**” and
 15 “**DECLARATION OF EMERGENCY**” and as such in my view this must be considered then
 16 by a judge of the Court.
 17

18 It must be clear that with the passing of time I was able to collate a lot more material in support
 19 of the Application and while regrettably in the meantime numerous innocent persons succumbed,
 20 at least I know I tried to avoid it.

44 Failure to seize and desist leaves me no alternative but to petition the High Court of Australia for
 45 this.
 46

47 END QUOTE 14-8-2020 CORRESPONDENCE

48 I in 2001 disputed the legal validity of the 2001 federal election in which I actually was a
 49 candidate. I refused to vote on constitutional grounds and the Commonwealth in *AEC v Schorel-*
Hlavka decided to take me on. A legal battle of about 5 years followed albeit representing
 50 myself on 19 July 2006 I succeeded in both Appeals. This even so various lawyers had given me
 51 the understanding that no one could ever defeat the Commonwealth. Well I proved them all
 52 wrong. This, because so to say I do my homework and this involved a considerable research also.
 53

I had “**20200408-Mr G. H. Schorel-Hlavka O.W.B. to Deborah Glass-Victorian Ombudsman**” lodged a **COMPLAINT** regarding the misuse and abuse of COVID-19 only to be advised she had no jurisdiction. And, while it was referred to IBAC that to me ended up a sheer waste of time.

As for my “**20200410-Mr G. H. Schorel-Hlavka O.W.B. to Victoria's Human Rights Commissioner Kristen Hilton**” **COMPLAINT** that too ended up nowhere.

I am used to politicians and their advisers to band together and misuse and abuse their powers and while they claim they are acting for the interest, safety and wellbeing of the constituents their real goal is anything but that, at least to my experiences.

I at least have put my money where my mouth is as the slogan goes as I have not even once worse a face mask. I did however recognize my wife’s right to make her own decision and she tried times and then decided to follow my example as after all she has a medical condition that she didn’t need to wear a face diaper but did so in fear of being assaulted and could then be killed where she was aware I had been assaulted and also harassed by the Victorian Police, albeit my challenge to take me to court they never took up. And, when I walked into a police station and spend some time in there they wisely left me alone. Still reality is that we have what I consider this lunatic of a Victorian Premier who uses lockdowns and other form of terrorism that in the end will result in considerable harm.

Obviously I am going to pursue also all those advisors and officials who have negligently pursued this draconic terrorism conditions.

QUOTE TGA website

If we suspect there is a problem with a vaccine, we will launch an investigation. In some cases, this could mean suspending the use of a vaccine during the investigation. We notify the community of safety concerns through the publication of alerts on our website.

END QUOTE TGA website

Well, in my view my various writings alone quoting numerous articles, etc, should have been more than sufficient to ring alarm bells and revoke any “**clinical trials**” while matters are sorted out. While it may be argued that this could result in vaccinations supplies to become worthless, but that is not my concern as my concern is to try to save lives. In my view had the TGA done a better job it would not have ended up in this set of circumstances.

QUOTE TGA website

Does the TGA consider all of the ingredients in a vaccine before registering it for use?

Yes. The TGA considers the safety, quality and efficacy of every ingredient in a vaccine before we register the vaccine for use in Australia.

Vaccines contain an active ingredient from the target virus or bacterium. They also contain other ingredients for particular purposes, such as stimulating the body’s immune response and stabilising the vaccine during storage. The TGA assesses all of these ingredients for safety, quality and efficacy before the vaccine can be used in Australia.

END QUOTE TGA website

It is beyond me that the TGA somehow could allow any kind of “**clinical trials**” that includes “**mRNA**” without having a clue how this may likely work out in the end. So let the Federal government vaccinate the entire Australian population and well we see afterwards how many persons died as result of it.

Our Funeral Home is Overwhelmed With Bodies

1 Those who live in reality will be well aware that spikes in deaths can eventuate in particular
 2 when there is a Flu/"common cold" going around.

3 In California there was for air-pollution also that cremations could not be done, with dead bodies
 4 piling up everywhere. This underlines that politicians were not the least concerned as to their
 5 abuse of power and the total failure to prepare for any dramatic increase in those affected in
 6 illnesses, as they are willing to misuse and abuse their powers big time. Scientist and those in the
 7 medical profession who stand to gain financially or otherwise will be eager supporters of this
 8 rather than to make clear they are not going along.

9 I understand from reports that India may have so to say kicked out **Pfizer**. I have not checked out
 10 what might be behind all this. Safe to say if politicians were indeed more concerned about the
 11 precious lives that are now destroyed then they could and would have been more on the point to
 12 avoid any undue harm.

13 Going by the conduct of persons like the Prime Minister Scott Morrison and the various Premiers
 14 I have little doubt they will continue their misuse and abuse of powers regardless of how many
 15 innocent lives in the process might be lost. As in the end they will claim that their advisors were
 16 telling them it was all appropriate to do so.
 17 .

18 **Hansard 1-3-1898 Constitution Convention Debates**

19 **QUOTE Sir JOHN DOWNER.-**

 21 the substance of the legislation, but beyond the form of the legislation, of the different colonies, and say
 22 that there shall be embedded in the Constitution the righteous principle **that the Ministers of the**
 23 **Crown and their officials shall be liable for any arbitrary act or wrong they may do, in the same way as**
 24 **any private person would be.**

25 END QUOTE

26
 27 **QUOTE Padfield v Minister of Agriculture & Fisheries and Food** (1968) AC 997 (1968) 1 ALL ER 694 House
 28 of Lords - Lord Upjohn and Lord Hodson Upjohn: - (Irrelevant consideration)

29 Here let it be said at once, he and his advisers have obviously given a bona fide and
 30 painstaking consideration to the complaints addressed to him; the question is whether the
 31 consideration was sufficient in law.

32 END QUOTE

33 Let every adviser who blatantly disregarded relevant details and provided incorrect advice be
 34 held legally liable and accountable. That may just then be a warning to others that if you are
 35 willing to screw with the lives of innocent Australians then well accept the legal consequences
 36 for this.

37 When my wife now trust me more than any medical professional, then surely this should be a
 38 wake up call that the trust in the medical profession is going down the chute. How on earth can I
 39 have any respect for a medical doctor who mumbles behind some face diaper and constantly
 40 touched it to keep it up and by this contaminating everything around him. It is much safer to be
 41 without a mask. As a store manager gave me the understanding, that people come with a face
 42 diaper and gloves touching everything and by this spread the germs from other stores around her
 43 store. They are not cleaner, even so may think so, but rather filthier in their conduct.

44
 45 **We need to return to the organics and legal principles embed in of our federal constitution!**

46
 47 **This correspondence is not intended and neither must be perceived to state all issues/details.**

48 Awaiting your response,  G. H. Schorel-Hlavka O.W.B. (Gerrit)
