**20210404-Mr G. H. Schorel-Hlavka O.W.B. to PM Mr SCOTT MORRISON & Ors
Re FOI, CORONAVIRUS, DNA, etc -Suppl 5**

Including **FREEDOM OF INFORMATION ACT** request

(Replies can be forwarded via email where appropriate.)

Any request for “details” must be considered to include document(s), information, etc.
(I am the holder of an age pension health card.)

QUESTION 19 commences page **33**

Sir,

further to my 3 March 2021 FOI & 7-3-2021 Supplement 1 & 21-3-2021 Supplement 2 & 25-3-2021 Supplement 3 & 29-3-2021 Supplement 4 request I provide this supplement 5.

As a constitutionalist, Author and retired professional advocate to mention some of my abilities I am always conscious that I need to provide appropriate references when I quote something of someone else, hence I provide links and/or other details as to ensure any reader will be aware I do not intend to plagiarise any persons work. Also, by providing relevant details the reader can so to say Fact-Check that I do not take out of context some statement.

My research indicates that we are dealing with what I consider either grossly incompetent so called “leaders” and/or that they are deliberately concealing relevant details as to flog the so called “vaccines” (regardless that some may not be “vaccines” at all) and in the process are not just placing at risk the health and wellbeing but even the lives of those getting “jabbed”.

[15 million Johnson & Johnson vaccines unusable in US after production error \(brusselstimes.com\)](https://www.brusselstimes.com)

15 million Johnson & Johnson vaccines unusable in US after production error

Thursday, 01 April 2021

QUOTE

1 The American pharmaceutical company Johnson & Johnson had to dispose of 15 million doses of its
2 coronavirus vaccine meant for the United States as they were unusable due to an accident in the production
3 process.

4 The production of the vaccine has now been delayed because the American regulator has to carry out extra
5 checks on the production line at the US factory in Baltimore, reports [The New York Times](#).
6 In a [statement](#), Johnson & Johnson confirmed that a batch of vaccines was found not to comply with quality
7 requirements, **adding that it had not yet reached the filling and finishing stages when the error was**
8 **discovered**. Employees at the Baltimore plant reportedly **accidentally mixed ingredients from two**
9 **different vaccines**.

10 END QUOTE

11
12 [https://www.westernjournal.com/15-million-doses-covid-vaccine-trashed-crucial-](https://www.westernjournal.com/15-million-doses-covid-vaccine-trashed-crucial-mixup/?ff_source=Email&ff_medium=WJBreaking&ff_campaign=breaking&ff_content=wester)

15 **15 Million Doses of COVID Vaccine Trashed After Crucial Mixup**

16 QUOTE

17 **The Biden administration knew about the contaminated coronavirus vaccine batch that forced 15**
18 **million doses to be trashed last month but hid the debacle from the public, according to high-level**
19 **insiders.**

20 “Senior Biden administration health officials, including some within the White House, knew two weeks ago
21 that a Johnson & Johnson contractor’s production problems could delay delivery of a significant number of
22 future vaccine doses,” three top administration officials told Politico.

23 While the revelation about the supply disruption went public on Wednesday, the report said Biden
24 administration officials were aware of the crisis last month — all while publicly bragging that it was meeting
25 its vaccine deadlines.

26 Emergent BioSolutions is a Maryland-based contractor for Johnson & Johnson, a government-endorsed
27 supplier of a COVID-19 vaccine.

28 Last month, workers at Emergent ruined 15 million doses of the J&J vaccine by accidentally mixing
29 ingredients from two separate coronavirus vaccines together.

30 END QUOTE

31
32 [https://www.baltimoresun.com/coronavirus/bs-md-emergent-biosolutions-vaccine-issue-](https://www.baltimoresun.com/coronavirus/bs-md-emergent-biosolutions-vaccine-issue-20210331-ob3qro64srhmlko57jg4hl6nym-story.html)
33 [20210331-ob3qro64srhmlko57jg4hl6nym-story.html](https://www.baltimoresun.com/coronavirus/bs-md-emergent-biosolutions-vaccine-issue-20210331-ob3qro64srhmlko57jg4hl6nym-story.html)

34 QUOTE

35 **The Emergent BioSolutions manufacturing plant in East Baltimore that has been making coronavirus**
36 **vaccine for months** has not yet received emergency use authorization from the federal government, a
37 spokesperson confirmed Wednesday, and the delay is reportedly due to a potentially egregious human error.
38 [A mix-up of two vaccines’ ingredients](#) several weeks ago ruined about 15 million doses of Johnson &
39 Johnson’s vaccine and forced regulators to delay authorization of the plant’s production lines, The New York
40 Times reported Wednesday. Emergent’s mistake does not affect Johnson & Johnson doses that are currently
41 being delivered and used nationwide, The Times reported, but does affect future shipments.
42 Emergent, which contracted with Johnson & Johnson as well as AstraZeneca, is an experienced vaccine
43 maker, producing its own products such as a smallpox vaccine kept in U.S. stockpiles.

44 END QUOTE

45
46 It seems to be clear “**The Emergent BioSolutions manufacturing plant in East Baltimore that has been**
47 **making coronavirus vaccine for months** has not yet received emergency use authorization from the federal
48 government,” that as like in Australia there is an “UNREGULATED” production of liquid to be
49 used as so called “vaccine” and then when it becomes approved then well just throw in the
50 unauthorised batches. And when then such as the infected polio vaccination health officials hold
51 they might as well use it then who cares about the health and wellbeing of the children. Well, ask
52 those children then injected about possible trauma they suffered over all those years if they were
53 harmed by it!

54
55 What appears to be clear is that unauthorised production is eventuating and this to me proves
56 also that the TGA lacks to clamp down on this when it was occurring in Australia.

1 While the TGA may claim that it inspects every batch, this to me has absolutely no meaning
2 where TGA head John Skerritt made known not to know about what was in the vaccine when
3 asked by Leigh Sales on 17 February 2021.

4
5 What is so strange on this story is that it refers to “**15 million Johnson & Johnson vaccines**
6 **unusable in US after production error**” which to me indicates that the doses were already in
7 vials. To explain in a simplified manner, when a person is going to mix the wrong dough to
8 make little cakes you do not refer to how many little cakes there were when it is still dough. As
9 such, more than likely the incorrect mixture was already in the vials. But, there is more to it. If
10 there was proper quality control then I assume the following should have been occurring:

11
12 *The laboratory places an order with a manufacturer for certain goods to be supplied.

13 *The manufacturer supplies the goods marked appropriately to the laboratory, which upon
14 receiving enters it on the records.

15 *The production office, once aware all required items for production have been received
16 then issue an order accompanied by all relevant details and required requisitions to the
17 person in charge (production manager) for the manufacturing of the vaccine.

18 *The production manager now issue the requisitions to the store manager to be supplied
19 with all the relevant items.

20 *The store manager checking the computer listing ensures that all relevant items are indeed
21 in stock and only then issue the relevant requested items.

22 *The production manager now check each and every item provided by the store manager
23 that each and everyone correspond to the requestion, of which he retained a copy.

24 *The production manager now arrange that all items remain together and are delivered to
25 the site where the particular production of the vaccine is commenced.

26 *The mixer now is required to check each and every item as to corresponding to the
27 required items listed on the order, as to be able to ascertain which how much of each
28 particular item need to be added to the mixture. Then add the required volume to the
29 mixture.

30
31 So far, it should be clear that even before any QUALITY CONTROL gets involved there is a
32 strict protocol in place to be adhered to as to what is to be used for production.

33 During the process of mixing, but before the mixture is released for filling vials QUALITY
34 CONTROL inspects the mixture for all kinds of requirements. For example, are all required
35 items in the mixture or by human error one item was left out or too much or too little is in the
36 mixture, etc. It would then be that QUALITY CONTROL may detect that something is in the
37 mixture that should not be and then has to reject the entire mixture. This being so the entire
38 system would need to be decontaminated before any new mixture can be prepared. At this stage
39 one cannot talk about “**15 million Johnson & Johnson vaccines unusable in US after**
40 **production error**” because there are not and neither can be any “vials” having been filled as the
41 report stated “**adding that it had not yet reached the filling and finishing stages when the**
42 **error was discovered.**”. To claim there were “**15 million**” must indicate to me that the filling
43 process already had been in process and a considerable amount had been already packed. Which
44 would indicate that the QUALITY CONTROL during the mixing process failed.

45
46 While this is about so-called “vaccinations” I will first highlight personal experiences I had in
47 manufacturing.

48
49 Let me no for a moment get back some decades before I retired. I was a QUALITY CONTROL officer, and I
50 may state a very good one. If I had a suspicion something was wrong I would delve in every little detail and
51 so often exposed something that on the face appeared to be correct. I ended up with promotion after
52 promotion and then in charge of factories. It was then that the company made clear that while I was

1 responsible for the output (production) of the factories I was also responsible for QUALITY CONTROL, in
2 view of my knowledge and experiences.

3 There I was a young man dealing with workers who had been on the machinery for 30 years or more and well
4 I decided to do my thing. As a QUALITY CONTROL officer I had repeatedly rejected certain products that
5 were manufactured, and well I was not going to get to continue the same problems but get to the needy
6 greedy of it all. I announced that I would require all and any gauges that were used on the machines. Well,
7 those old times quickly made clear I was wet behind the ears, and I better let someone do the job as obviously
8 I lacked to understand what managing a factory was about. I didn't worry because after all I had a job to do.
9 So, I collected all gauges and requested the tool-room to check each and every gauge and report back to me if
10 they were all correct. As my experienced setters made clear they had been working with those gauges for
11 years and I somehow was going to be smart that somehow there might be something wrong with them, I
12 simply made a complete idiot of myself. After some hours I had a report back that about half of the gauges
13 had been wrongly marked and were as such faulty. OK now the setters who had so much entertained
14 themselves about me being a fool now discovered that after all they were the fools. After all for all those
15 years their work was rejected for being faulty it had cost them their bonuses. Now with the correct gauges to
16 be used only their bonuses went up. As such, I knew that when I had a guts feeling something was wrong I
17 always would do whatever to pursue to discover what was relevant and correct what was wrong.
18

19 Because I was in management of factories and also was involved in production planning, etc, I
20 am well aware that regardless if it are factories or laboratories certain procedures are generally
21 applicable as to the ordering, storage and requesting items as well as QUALITY CONTROL
22 during manufacturing/mixing.
23 .

24 What I view now should ring alarm bells is if this kind of problem can eventuate then how often
25 has this previously occurred and then slipped through QUALITY CONTROL and perhaps
26 deadly so called "vaccines" were injected into individuals (humans) and caused severe harm if
27 not death? Then again the TGA on its website (and so the Department of Health underlining this)
28 that the TGA rigorously check items.

29 Well, let us look as what John Skirrett heading the TGA claimed!

30
31 [https://www.health.gov.au/news/therapeutic-goods-administration-adj-professor-john-skerritts-](https://www.health.gov.au/news/therapeutic-goods-administration-adj-professor-john-skerritts-interview-on-abc-730-on-17-february-2021)
32 [interview-on-abc-730-on-17-february-2021](https://www.health.gov.au/news/therapeutic-goods-administration-adj-professor-john-skerritts-interview-on-abc-730-on-17-february-2021)

33 **Therapeutic Goods Administration Adj. Professor John Skerritt's interview on ABC 7:30**
34 **on 17 February 2021**

35 **QUOTE**

36 **LEIGH SALES:**

37 Some churches have told parishioners to ask for the Pfizer jab, not the AstraZeneca one, because the
38 AstraZeneca one reportedly uses aborted fetuses. What's your view on that and would religious objection be
39 grounds for an exemption to get the vaccine you wanted?

40 **JOHN SKERRITT:**

41 When the vaccine was developed, quite a range of vaccines were produced in embryonic kidney cells, and
42 these cells came originally from - and we don't know the personal situation - from a termination that was
43 done, we think, in the Netherlands in the early 1970s. So a very long time ago. And those cells are many
44 generations old now. What we do know is that even at the highest levels from the Vatican down, they've said
45 that the source of this vaccine is not a reason not to be vaccinated. So, churches have come out quite strongly,
46 emphasising the importance of vaccination.

47 **END QUOTE**

48
49 To me the answer "When the vaccine was developed, quite a range of vaccines were produced in
50 embryonic kidney cells, **and these cells came originally from - and we don't know the**
51 **personal situation** - from a termination that was done, we think, in the Netherlands in the early
52 1970s." is totally unacceptable. It appears to me he deliberately avoided to where it was from
53 ("and these cells came originally from - and we don't know the personal situation -") as I

1 QUOTE

2 **However, children have been complaining that they feel as though they were**
 3 **inhaling cat hair while wearing them. It turns out they've been inhaling an**
 4 **asbestos-like substance**

5 END QUOTE

6
 7 Well, most people in Australia may recall “Bernie” who died as result of asbestos related health
 8 issues. So now those supposing leaders in charge of the governments in Australia make masks
 9 compulsory from time to time so that all those doing so can end up like Bernie, in the grave a lot
 10 sooner than otherwise. And, this even so the Danish research showed that masks wearing makes
 11 little to no difference at all to become infected with COVID-19! As such, it is to deliberately
 12 force people to engage in unhealthy conduct but promoting it as “doing it for others”. Obviously
 13 such a claim is utter and sheer nonsense unless you mean that it is so others can divide your
 14 estate and financial benefit from your death.

16 **Moving Black Strands on Face Mask - Similar Videos Appearing Daily Now**

17 QUOTE

18 A new genre of video is cropping up about the microscopic black strands that are
 19 being found in both the swabs used in COVID testing and in the disposable face
 20 masks.

21
 22 Seeing these strands, I was reminded of the strange microscopic objects that have
 23 been found in skin lesions of those suffering from Morgellons disease.

24
 25 What's even creepier is that these strands exhibit the characteristics of very small-scale [micro-robots](#), in that
 26 they move in response to heat and moisture. Are these
 27 approved swabs and masks being used to deliver synthetic biology into their human
 28 hosts? Is that why Joe Biden issued an Executive Order that disallows bandannas on public transport, in favor
 29 of Chinese PPEs?

30
 31 Synthetic biology combines genetics, robotics and nano-technology with artificial intelligence, hybridizing
 32 natural forms and engineering tissues beyond our wildest dreams. In 2011, [Sofia Smallstorm](#) gave
 33 presentations on "The Dark Agenda of
 34 Synthetic Biology", in which she discussed nano fibers: moving, growing
 35 nano-bots integrating themselves with man.

36
 37 Smallstorm and others believe these high-tech substances are being released via
 38 secretive high aerosol spraying programs, causing her to ask whether
 39 geoen지니어ing was only about experimenting with weather?

40 END QUOTE

41
 42 I recall that when my wife had to attend to Genesis in Bundoora, she had temporary put on a
 43 facemask (I had purchased in case she wanted to use one) but she was informed that she had to
 44 wear a facemask (face diaper) that Genesis handed out. Well within minutes my wife started to
 45 pass out and removed the mask and threw it onto the floor. Clearly my wife at 88 and with Heart
 46 Failure problems and other comorbidities and actually excused from wearing a face mask by the
 47 hospital due to medical issues, was somehow forced to use a masks or denied the test regarding
 48 her heart. Now my wife is worried that she might have been in the process have been forced one
 49 of those contaminated/dangerous face masks. What is clear is that as I already made clear early
 50 2020 we lack to have “leadership” and because of this police and health care workers are each
 51 dictating their own regime as if we are under NAZI SS storm-troopers conditions. I was referred
 52 to a hospital in August 2020 but the hospital refuses to attend to me unless I wear a face
 53 masks/face diaper, regardless I actually have a medical certificate that I have a medical condition
 54 to be excused from wearing a face mask. As such, this medical tyranny is exploited upon both

1 myself as well as my wife, as despite her Hearth Failure and other comorbidities no eye-to-eye
2 hospital visits are permitted and so both are denied appropriate medical care.

3

4 But it get worse.

5

6 QUOTE 1-4-2021 EMAIL

7

Book your flu vaccination today!

From [Club Member at Discount Drug Stores](#) 
To admin@inspector-rikati.com 
Date Thu 17:26

8

QUOTE 1-4-2021 EMAIL

9

And

10

QUOTE 1-4-2021 EMAIL

11

This email was sent by Discount Drug Stores Head Office, 56–58 Jephson Street, Toowong, QLD 4066.

12

QUOTE 1-4-2021 EMAIL

13

14

This is an unsolicited email to a DO NOT CALL number.

15

16

Moreover, I view it is totally irresponsible for some out of state drug organisation to promote a
17 flu jab without even knowing if the person concerned should or should not be jabbed.

18

19

AND WORSE IS YET TO FOLLOW:

20

21

Considering that both my wife and are I are senior citizen one would have expected that “proper
22 leadership” would have ensured that where there were restrictions than at least alternative
23 services would be provided such as in regard of medication supply, etc. Well, we now have
24 seemingly a system in place where whoever desire to jab a person send out a message for this:

25

26

QUOTE Email 1-4-2021

27

Dear Olga,
28 Your reserved COVID Vaccine – Phase 1b [Dose 1] has arrived.

29

30

Please book within the next 48 hours at
31 Automedsystem.com.au/online/vl/886 to avoid forfeiting your reserved vaccine.

32

33

Kind regards.
34 Research Medical Centre.

35

END QUOTE Email 1-4-2021

36

37

It should be noted that the last mentioned email doesn’t include any details as to what kind of
38 “jab” is referred to and as such prevent the receiver (me and my wife) to even check out
39 publications as to any pro’s and con’s about such a “jab”.

40

41

Clearly you as Prime Minister has failed miserably if not totally as to ensure that before any
42 person was advised to be eligible to have some kind of a “jab” you should have provided to each
43 person a literature setting out all relevant details.

44

Givi9ng a person 48 hours when not providing any relevant details surely prevents a person to
45 make an “informed” decision.

46

47

Moreover, where the Department of Health fails to properly disclose all relevant details
48 regarding the dangers of any ‘jab’ then in my view, so to say, “informed’ consent by anyone
49 could be deemed legally valid.

1
2 <https://www.ahpra.gov.au/News/2021-03-09-vaccination-statement.aspx>

3 **Registered health practitioners and students: What you need to know about the COVID-**
4 **19 vaccine rollout**

5 QUOTE

- 6 • As the national vaccination program gets underway, registered health practitioners and students
7 remain critical to this success by:
- 8 ○ being vaccinated against COVID-19 unless medically contraindicated
 - 9 ○ being appropriately qualified and trained to administer COVID-19 vaccines if authorised, and
 - 10 ○ **providing accurate information and advice about COVID-19 vaccination including in social**
11 **media and advertising.**

12 END QUOTE

13
14 Well the text message of 1-4-2021 hardly could be considered to be “**providing accurate**
15 **information**”! And this is what is being transmitted as a basis to claim it contains “**accurate**
16 **information**”?

17
18 <https://www.ahpra.gov.au/News/2021-03-09-vaccination-statement.aspx>

19 QUOTE

20 As part of the national vaccine rollout program, practitioners authorised to administer COVID-19
21 vaccines must complete specific COVID-19 vaccine training, as required by Australian, and State
22 and Territory Governments. Training in the handling and administration of COVID-19 vaccines
23 protects the public by supporting the vaccination program to be rolled out safely.

24 END QUOTE

25
26 Again: “**Training in the handling and administration of COVID-19 vaccines protects the public by**
27 **supporting the vaccination program to be rolled out safely**”

28 Well to me sending a text message of the kind quoted I view is showing that whatever “training”
29 there is provided certainly is “CRAP”.

30
31 <https://www.ahpra.gov.au/News/2021-03-09-vaccination-statement.aspx>

32 QUOTE

33 **Read the joint statement**

34 **The regulators’ role**

35 While Ahpra and the National Boards regulate individual health practitioners, **we don’t regulate the**
36 **rollout of vaccines. That is being managed by the Australian, and State and Territory governments**
37 **across Australia.**

38 END QUOTE

39
40 Excuse me, the TGA requires that the “sponsor” (being the pharmaceutical company concerned)
41 deals with the “clinical trial” details, etc, as such where is the part that the “**Australian, and State**
42 **and Territory governments**” are dealing with it. They are politicians and not health care providers.
43 Little wonder it is “CRAP” that is provided to individuals. But then again the Department of
44 health stated “**Our COVID-19 Vaccination Policy**”, as such instead of the TGA we now have a
45 ‘**political science**’ policy that governs the TGA and not “**medical science**”!

46
47 [https://www.health.gov.au/node/18777/australias-covid-19-vaccination-](https://www.health.gov.au/node/18777/australias-covid-19-vaccination-policy?utm_source=health.gov.au&utm_medium=redirect&utm_campaign=digital%20transformati&utm_content=australias-covid-19-vaccination-policy)

41 **COVID-19 vaccines – Is it true**

42 <https://www.health.gov.au/covid19-vaccines-is-it-true>

43 QUOTE

1 [Are COVID-19 vaccines a bigger risk than contracting the virus? Is there anything wrong](#)
2 [with this page?](#)

3 **Are COVID-19 vaccines a bigger risk than contracting the** 4 **virus?**

5 Globally, the COVID-19 pandemic has had devastating effects on individuals and
6 countries.

7 To date, more than [115,600 million people](#) have contracted the illness and more than 2.5
8 million people have died. Health systems and frontline medical staff are stretched beyond
9 capacity.

10 Any vaccine can cause some mild side effects. **The main side effects from vaccines** are
11 some soreness, redness or swelling where you had the injection, a headache or mild fever
12 and fatigue. Most of these can be managed with some mild pain relief and are no cause for
13 alarm.

14 It's important to know that the [Therapeutic Goods Administration \(TGA\)](#) – Australia's
15 independent medicines regulator – will not approve a vaccine that is not safe and
16 effective. It did not approve an mRNA vaccine.

17 When they talk about safety, one of the things they are looking at very closely is severe
18 side effects.

19 Australia has one of the best approval processes in the world and any medication that
20 would cause severe negative side effects would not be approved in this country.

21 Read the TGA's approval statements for the [AstraZeneca](#) and [Pfizer](#) vaccines.

22 The TGA's job does not stop with approval. It also keeps a close eye on the data coming in
23 from overseas and the vaccine rollout here. Nothing is left to chance.

26 •
27 [Do people who have had COVID-19 and recovered need to get vaccinated? Is there](#)
28 [anything wrong with this page?](#)

29 **Do people who have had COVID-19 and recovered need to get** 30 **vaccinated?**

31 People who have had COVID-19 and recovered should still be vaccinated.

32 The protection someone gains from having COVID-19 varies from person to person.

33 Because this virus is new, experts don't yet know how long any natural immunity might
34 last.

35 Even if you have already had COVID-19, you should still get the [COVID-19 vaccine](#) when
36 you can.

37 You should discuss any treatments you had with your doctor before you get vaccinated.

38 Australia has also been fortunate in having low numbers of COVID-19 infections and this
39 means that the community as a whole has no immunity.

1 This is why vaccination is so important to protect people from severe disease.

8 [**Attacking Ourselves: Top Doctors Reveal Vaccines Turn Our Immune System Against Us**](#)

9 **QUOTE**

10 *The research is hard to ignore, vaccines can trigger autoimmunity with a laundry list of diseases to follow.*
11 *With harmful and toxic metals as some vaccine ingredients, who is susceptible and which individuals are*
12 *more at risk?*

13 No one would accuse Yehuda Shoenfeld of being a quack. The Israeli clinician has spent more than three
14 decades studying the human immune system and is at the pinnacle of his profession. You might say he is
15 more foundation than fringe in his specialty; he wrote the textbooks. **The Mosaic of**
16 **Autoimmunity, Autoantibodies, Diagnostic Criteria in Autoimmune Diseases, Infection and**
17 **Autoimmunity, Cancer and Autoimmunity** – the list is 25 titles long and some of them are cornerstones of
18 clinical practice. Hardly surprising that Shoenfeld has been called the "Godfather of Autoimmunology" – the
19 study of the immune system turned on itself in a wide array of diseases from type 1 diabetes to ulcerative
20 colitis and multiple sclerosis.

21 But something strange is happening in the world of immunology lately and a small evidence of it is that the
22 Godfather of Autoimmunology is pointing to **vaccines** – specifically, some of their ingredients including the
23 toxic metal aluminum – as a significant contributor to the growing global epidemic of autoimmune diseases.
24 The bigger evidence is a huge body of research that's poured in in the past 15 years, and particularly in the
25 past five years. Take for example, a recent **article** published in the journal **Pharmacological Research** in
26 which Shoenfeld and colleagues issue unprecedented guidelines naming four categories of people who are
27 most at risk for vaccine-induced autoimmunity.

28 "On one hand," vaccines prevent infections which can trigger autoimmunity, say the paper's authors,
29 Alessandra Soriano, of the Department of Clinical Medicine and Rheumatology at the Campus Bio-Medico
30 University in Rome, Gideon Neshet, of the Hebrew University Medical School in Jerusalem and Shoenfeld,
31 founder and head of the Zabudowicz Center of Autoimmune Diseases in the Sheba Medical Center at Tel
32 Hashomer. He is also editor of three medical journals and author of more than 1,500 research papers across
33 the spectrum of medical journalism and founder of the International Congress on Autoimmunology. "On the
34 other hand, many reports that describe post-vaccination autoimmunity strongly suggest that **vaccines can**
35 **indeed trigger autoimmunity**. Defined autoimmune diseases that may occur following vaccinations include
36 arthritis, lupus (systemic lupus erythematosus, SLE) diabetes mellitus, thrombocytopenia, vasculitis,
37 dermatomyositis, Guillain-Barre syndrome and demyelinating disorders. Almost all types of vaccines have
38 been reported to be associated with the onset of ASIA."

39 ASIA – or Autoimmune/inflammatory Syndrome Induced by Adjuvants (also known as Shoenfeld's
40 syndrome) -- first appeared in the **Journal of Autoimmunology** four years ago. It is an umbrella term for a
41 collection of similar symptoms, including Chronic Fatigue Syndrome, that result after exposure to an
42 adjuvant – an environmental agent including common vaccine ingredients that stimulate the immune system.
43 Since then an enormous body of research, using ASIA as a paradigm, has begun to unravel the mystery of
44 how environmental toxins, particularly the metal aluminum used in vaccines, can trigger an immune system
45 chain reaction in susceptible individuals and may lead to overt autoimmune disease.

46 Autoimmune disease results when the body's system meant to attack foreign invaders turns instead to attack
47 part of the body it belongs to (**auto** is Greek for self). If the immune system is like a national defence system,
48 antibodies are like drones programmed to recognize a certain type of invader (a bacteria say) and to destroy
49 them or mark them for destruction by other special forces. Autoantibodies are like drones that are
50 misidentifying a component of the human body and have launched a sustained attack on it. If they mistakenly
51 target a component of the conductive sheath around neurons, for example, nerve impulses stop conducting
52 properly, muscles go into spasm and coordination fails; multiple sclerosis results. If autoantibodies
53 erroneously focus on joint tissue; rheumatoid arthritis results. If they target the islets of Langerhans in the
54 pancreas, Type 1 diabetes, and so on

1 "Throughout our lifetime the normal immune system walks a fine line between preserving normal immune
2 reactions and developing autoimmune diseases," says the paper. "The healthy immune system is tolerant to
3 self-antigens. When self-tolerance is disturbed, dysregulation of the immune system follows, resulting in
4 emergence of an autoimmune disease. Vaccination is one of the conditions that may disturb this homeostasis
5 in susceptible individuals, resulting in autoimmune phenomena and ASIA."

6 Who is "susceptible" is the subject of the paper entitled, "Predicting post-vaccination autoimmunity: Who
7 might be at risk?" It lists four categories of people: 1) those who have had a previous autoimmune reaction to
8 a vaccine, 2) anyone with a medical history of autoimmunity, 3) patients with a history of allergic reactions,
9 4) anyone at high risk of developing autoimmune disease including anyone with a family history of
10 autoimmunity, presence of autoantibodies which are detectable by blood tests and other factors including low
11 vitamin D and smoking.

Authorities Investigating After COVID-19 Vaccine Recipients Develop Rare Blood Disorder (ntd.com)

Authorities Investigating After COVID-19 Vaccine Recipients Develop Rare Blood Disorder

QUOTE

A woman prepares to give a blood sample at a medical facility before receiving a dose of vaccine or placebo of **Johnson & Johnson's** COVID-19 vaccine clinical trial at Colina area, Santiago, Chile, on Nov. 20, 2020. (Ivan Alvarado/Reuters)

Federal authorities are investigating after some COVID-19 vaccine recipients have developed the rare blood disorder thrombocytopenia, with at least several cases resulting in death.

A Food and Drug Administration (FDA) spokesperson told The Epoch Times via email that the agency is investigating and assessing the reported cases.

“At this time, we have not found a causal relationship,” the spokesperson said. “We will update the public as we learn more about these events.”

The blood disorder was listed by the FDA last year as a possible adverse event outcome from getting a COVID-19 vaccine, alongside other serious adverse events like Guillain-Barré syndrome and death.

Several dozen case reports of post-vaccination thrombocytopenia have been submitted to the Vaccine Adverse Event Reporting System (VAERS), a passive reporting system managed by the FDA and the Centers for Disease Control and Prevention. Approximately 44.7 million doses of COVID-19 vaccines have been administered in the United States as of Feb. 10.

In one case, a 56-year-old male in Florida was injected with **Pfizer's** vaccine and rushed to the hospital, several days after noticing “small blood tinged spots.” He was diagnosed with thrombocytopenia.

In another, a 36-year-old Pennsylvania woman said she woke up in early January, about two weeks after getting **Pfizer's** vaccine, with blood blisters all over her mouth and went to the emergency room. She was admitted and diagnosed with idiopathic thrombocytopenic purpura (ITP), a version of the disorder.

The most high-profile instance involved Dr. Gregory Michael, a 56-year-old Miami doctor who died 16 days after receiving a vaccination against the **CCP (Chinese Communist Party) virus**, which causes COVID-19.

Michael's wife, Heidi Neckelmann, wrote on Facebook that the doctor was admitted to the emergency room, where medical workers found his platelet count to be zero. Thrombocytopenia causes a low platelet level and in adults typically requires medical treatment.

Michael was taken to an intensive care unit with a diagnoses of acute ITP caused by a reaction to the vaccine, his wife said.

END QUOTE

Italy Opens Manslaughter Probe as Teacher Dies Hours After Getting AstraZeneca Vaccine (theepochtimes.com)

QUOTE

Tognatti's death came just days after a 60-year-old Danish woman suffered highly “unusual symptoms” and died after receiving the vaccine, the Danish Medicines Agency said this week. **The woman had a low number of blood platelets and clots in small and large vessels, as well as bleeding, it said, reported Reuters.**

“It was an unusual course of illness around the death that made the Danish Medicines Agency react,” it said in a statement late on March 14.

Norway said on March 13 that three people, all under the age of 50, who had received the AstraZeneca vaccine **were being treated in hospital for bleeding, blood clots, and a low count of blood platelets, which were labeled “unusual symptoms”** by health authorities.

END QUOTE

Again the Department of Health claimed:

21 Published: 8:27 PM CST March 9, 2021

22 Updated: 8:27 PM CST March 9, 2021

23
24 ROCKVILLE, Md. — A Rockville man said he nearly died after getting the Pfizer vaccine.

25 Sartaj Sing Dhami, 43, said he struggled through a rare blood disorder that flared two days after he got the
26 shot.

27
28 It left the father of two with blood platelet levels so low he had a severe risk of brain hemorrhage.

29
30 In the small number of similar cases that have been reported, doctors are unsure if the vaccine caused the
31 body to react or if it was just a coincidence.

32 "FDA is aware of reports of a serious condition called thrombocytopenia, or low levels of platelets in the
33 blood, occurring in a few individuals following receipt of the authorized COVID-19 vaccines," said Food and
34 Drug Administration spokeswoman Abby Capobianco. "Thrombocytopenia can have many different causes.
35 At this time, we are continuing our investigation and assessment of these cases."

36 **"You can argue it's a coincidence. You can argue it's a fluke. But when it's your life, it's very real,"**

37 Dhami said. The cybersecurity analyst was diagnosed with thrombocytopenia when he was in his 20s, but it
38 was under control until he was vaccinated for COVID-19.

36 COVID-19: US FDA Lists 27 Expected Adverse Reactions to New Vaccines, Including Death

37 [ERBN](#) December 8, 2020

38 ERBN – According to the US FDA’s [Vaccines and Related Biological Products Advisory Committee](#) the novel
39 COVID-19 vaccines are not as harmless as the public is being told by their governments, the mainstream media
40 and the alleged ‘experts’ that they have on their shows or who they interview for their newspaper articles.
41 In fact, the FDA’s Committee, in an [October 22, 2020 meeting](#), agreed that the agency expects 27 adverse
42 reactions to the novel vaccines, including death. On [page 17](#) of their meeting report the Committee lists the
43 following adverse reactions:

44 **FDA Safety Surveillance of COVID-19 Vaccines :**
45 **DRAFT Working list of possible adverse event outcomes**

46 *** Subject to change***

- | | |
|---|--|
| 47 * Guillain-Barré syndrome | * Deaths |
| 48 * Acute disseminated encephalomyelitis | * Pregnancy and birth outcomes |
| 49 * Transverse myelitis | * Other acute demyelinating diseases |
| 50 * Encephalitis/myelitis/encephalomyelitis/ | * Non-anaphylactic allergic reactions |
| 51 meningoencephalitis/meningitis/ | * Thrombocytopenia |
| 52 encephalopathy | * Disseminated intravascular coagulation |
| 53 * Convulsions/seizures | * Venous thromboembolism |
| 54 * Stroke | * Arthritis and arthralgia/join pain |
| 55 * Narcolepsy and cataplexy | * Kawasaki disease |
| 56 * Anaphylaxis | * Multisystem Inflammatory Syndrome |
| 57 * Acute myocardial infarction | in Children |
| 58 * Myocarditis/pericarditis | * Vaccine enhanced disease |

10 QUOTE

11 But what do these listed adverse reactions mean? Because many people have no idea what all these terms are
12 actually saying.

13 **Guillain-Barré Syndrome:** A disorder in which your body’s immune system attacks your nerve system. This
14 may eventually paralyze your whole body.

15 **Acute Disseminated Encephalomyelitis:** An inflammation that affects the brain and spinal cord, usually in
16 children. It damages the coating that protects nerve fibers, called myelin. Symptoms may be severe.

17 **Transverse Myelitis:** An inflammation of both sides of one section of the spinal cord. This neurological
18 disorder often damages the insulating material covering nerve cell fibers (myelin). Transverse myelitis
19 interrupts the messages that the spinal cord nerves send throughout the body.

20 **Encephalitis:** An inflammation of the brain.

21 **Myelitis:** An inflammation of the spinal cord which can disrupt the normal responses from the brain to the
22 rest of the body, and from the rest of the body to the brain.

23 **Meningitis:** An inflammation of the meninges. The meninges are the three membranes that cover the brain
24 and spinal cord.

25 **Encephalopathy:** A damage or disease that affects the brain. It happens when there’s been a change in the
26 way your brain works or a change in your body that affects your brain. Those changes lead to an altered
27 mental state.

28 **Convulsions/Seizures:** Seizures cause rapid, rhythmic and sometimes violent shaking movements of the
29 body, often with loss of consciousness.

30 **Stroke:** A stroke is a sudden interruption in the blood supply of the brain. Most strokes are caused by an
31 abrupt blockage of arteries leading to the brain. Other strokes are caused by bleeding into brain tissue when a
32 blood vessel bursts.

33 **Narcolepsy:** A sleep disorder characterized by excessive sleepiness, sleep paralysis and hallucinations.

34 **Cataplexy:** A sudden loss of voluntary muscle tone. The condition is often associated with narcolepsy.

35 **Anaphylaxis:** A serious, life-threatening, allergic reaction.

36 **Acute Myocardial Infarction:** A heart attack. Occurs when blood flow to the heart muscle is abruptly cut
37 off, causing tissue damage.

38 **Myocarditis:** An inflammation of the heart muscle. Symptoms can include shortness of breath, chest pain,
39 decreased ability to exercise and an irregular heartbeat.

40 **Pericarditis:** An inflammation of the pericardium (the fibrous sac surrounding the heart). Symptoms
41 typically include sudden onset of sharp chest pain, which may also be felt in the shoulders, neck or back.

42 **Autoimmune Disease:** A condition in which your immune system attacks your body because a drug or
43 vaccine that was received contains human cells foreign to your own.

44 **Pregnancy and Birth Outcomes:** Preterm delivery (premature birth), growth restriction, low birth weight,
45 stillbirth (dead baby) and long-term chronic diseases.

46 **Acute Demyelinating Diseases:** Any condition that results in damage to the protective covering (myelin
47 sheath) that surrounds nerve fibers in your brain, optic nerves and spinal cord. This includes multiple
48 sclerosis (when your immune system attacks the myelin sheath or the cells that produce and maintain it),
49 optic neuritis (inflammation of the optic nerve in one or both eyes) and
50 adrenoleukodystrophy/adrenomyeloneuropathy (inherited metabolic disorders).

51 **Non-Anaphylactic Allergic Reactions:** Failure of an organ system.

52 **Thrombocytopenia:** A condition in which you have a low blood platelet count.

53 **Disseminated Intravascular Coagulation:** A condition in which blood clots form throughout the body,
54 blocking small blood vessels.

55 **Venous Thromboembolism:** A condition in which a blood clot forms most often in the deep veins of the leg,
56 groin or arm and travels in the circulation, lodging in the lungs.

57 **Arthritis and Arthralgia:** Joint pain.

58 **Kawasaki Disease:** An illness that causes inflammation in arteries, veins and capillaries. It also affects your
59 lymph nodes and causes symptoms in your nose, mouth and throat. It’s the most common cause of heart
60 disease in children.

Multisystem Inflammatory Syndrome: A condition where different body parts can become inflamed, including the heart, lungs, kidneys, brain, skin, eyes and gastrointestinal organs. Children who suffer from this condition may have a fever and various symptoms, including abdominal (gut) pain, vomiting, diarrhea, neck pain, rash, bloodshot eyes and feeling extra tired.

Vaccine Enhanced Disease: When the disease that you have is worsened by the vaccine that is supposed to protect you.

They Know These Vaccines Are Dangerous!

Because these novel vaccines have not been sufficiently tested, and clearly are dangerous, the UK government’s Department of Health awarded a special contract to Genpact (UK) Ltd in September.

The procurement, of which that contract is the result, stated: *“The MHRA urgently seeks an Artificial Intelligence (AI) software tool to process the expected high volume of Covid-19 vaccine Adverse Drug Reaction (ADRs) and ensure that no details from the ADRs’ reaction text are missed.”*

Again, the UK’s Department of Health *“expects a high volume”* of adverse reaction reports coming from the public. They know that these vaccines are not safe and that tens of thousands of people, in the UK alone, will want to report these adverse reactions and perhaps demand compensations for their vaccine injuries. But it will be the governments that are going to be held accountable for this. Not the pharma companies, that’s specifically stated in all the contracts between governments and vaccine manufacturers that have been signed so far.

Last month, ERBN [reported](#) about how these novel vaccines are not properly being tested for their short-term effects and since these vaccines have been rushed through much too fast, no tests have been conducted for the long-term (side) effects of these vaccines. No one knows what else could (and will) go wrong months and years from now, after these vaccines have been administered.

Squalene and Vaccines

According to [the New York Times](#) at least 2 pharmaceutical companies, GlaxoSmithKline and Seqirus, produce COVID-19 vaccines that contain squalene as an adjuvant.

END QUOTE

4.5 Vaccination error groups and MedDRA Preferred Terms (PTs) for COVID-19 vaccination errors

Administration Errors

- Accidental exposure to product
- Accidental exposure to product by child
- Drug administered in wrong device
- Exposure via direct contact
- Exposure via eye contact
- Exposure via skin contact
- Inadequate aseptic technique in use of product
- Incorrect product administration duration
- Incorrect product formulation administered
- Incorrect route of product administration
- Intercepted drug administration error
- Lack of administration site rotation
- Lack of injection site rotation
- Lack of vaccination site rotation
- Multiple use of single-use product
- Occupational exposure to product
- Paravenous drug administration
- Product administration error
- Product administered at inappropriate site
- Product commingling
- Product leakage
- Product use complaint
- Product use in unapproved indication
- Unintentional use for unapproved indication
- Wrong technique in device usage process
- Wrong technique in product usage process

Contraindication to vaccination

- Contraindication to vaccination
- Contraindicated product administered
- Contraindicated product prescribed
- Documented hypersensitivity to administered product
- Labelled drug-disease interaction medication error
- Labelled drug-drug interaction medication error
- Labelled drug-food interaction medication error

Equipment

- Device connection issue
- Device breakage
- Device defective
- Device difficult to use
- Device dislocation
- Device failure
- Device leakage
- Device issue

- Device malfunction
- Device use issue
- Device use error
- Expired device used
- Exposure to contaminated device
- Exposure via contaminated device
- Incorrect dose administered by device
- Injury associated with device
- Medical device complication
- Needle issue
- Poor quality device used
- Syringe issue
- Wrong device used

General

- Medication error
- Intercepted medication error
- Product use issue
- Vaccination error
- Unintentional use for unapproved indication

Inappropriate schedule of drug administration

- Inappropriate schedule of product administration
- Product administered to patient of inappropriate age
- Wrong schedule

Incorrect dose

- Accidental overdose
- Accidental underdose
- Booster dose missed
- Dose calculation error
- Extra dose administered
- Incomplete course of vaccination
- Incorrect dose administered
- Incorrect dosage administered
- Incorrect product dosage form administered
- Overdose
- Product dose omission
- Single component of two component product administered
- Underdose
- Wrong dose
- Wrong strength

Prescribing and dispensing

- Drug dispensed to wrong patient
- Inappropriate prescribing
- Intercepted drug dispensing error
- Intercepted drug prescribing error
- Intercepted product selection error

- Prescribed overdose
- Prescribed underdose
- Product dispensing error
- Product preparation error
- Product prescribing error
- Product prescribing issue
- Product selection error
- Transcription medication error

Product quality

- Expired product administered
- Discarded product administered
- Incorrect product storage
- Poor quality product administered
- Product contamination
- Product contamination microbial
- Product contamination physical
- Product expiration date issue
- Product quality issue
- Product quality control issue
- Product preparation issue
- Product reconstitution issue
- Product reconstitution quality issue
- Product sterility lacking
- Product storage error

Product labeling/packaging

- Product barcode issue
- Product design confusion
- Product name confusion
- Product name confusion
- Product packaging confusion
- Product packaging issue
- Product identification number issue
- Product label confusion
- Product label issue
- Product label on wrong product
- Product lot number issue
- Product name confusion
- Product packaging confusion
- Product packaging issue
- Product outer packaging issue
- Product packaging confusion

Wrong Product

- Interchange of vaccine products
- Intercepted wrong patient selected
- Product substitution error
- Wrong patient received product
- Wrong product administered
- Wrong drug
- Wrong product procured

Vaccination Error groups shown on this list were updated to include several new PT codes that became available in MedDRA. Reports of exposure during pregnancy, fetal exposure during pregnancy, maternal exposure during pregnancy are not included. A review of pregnancy coded reports revealed that many reports were documenting that the patient was pregnant without an error occurring. A contraindication to vaccination code has captured true vaccine contraindication reports in pregnant women.

While most reports are documenting a medical error, some reports that use the MedDRA PT codes are not necessarily vaccination errors (e.g., product quality issue, needle issue, syringe issue).

* Draft case definitions for some conditions under development by the Brighton Collaboration

When the Department of Health as I view is publishing disinformation/misinformation and make FRAUDULENT claims then how can anyone trust it to appropriately investigate any serious health issues appropriately and not seek to conceal relevant details about harm (including death) individuals suffered.

Again the Department of Health claimed:

QUOTE

Any vaccine can cause some mild side effects. **The main side effects from vaccines** are some soreness, redness or swelling where you had the injection, a headache or mild fever and fatigue. Most of these can be managed with some mild pain relief and are no cause for alarm.

END QUOTE

It just omitted to list the dangers the FDA referred to! No one in his right mind would accept that those dangers only relate to the USA and somehow Australians do not face similar risk.

Subject: Gerrit to Anne Marie Boulton, Practice Leader

Anne Marie,

I earlier today (10.15am 31-3-2021) received a text message as to COVID-19 jab and this really caused an upset with Olga.
I request that the mobile number is not used for any such messages to avoid upsets to Olga.

Olga doesn't desire any kind of "jab's", and as such I urge you to respect her right to make her own "informed" decision in that regard.

The mobile number was provided for relevant communication as to medical care Olga desires and it should not be misused for ulterior issues not desired by Olga to deal with.

The "The Nuremberg Code-Hippocratic Oath" is that no one can be forced to be "jabbed" merely to suit some government mantra. As the TGA has only provided for "provisional approval" for Pfizer and AstraZeneca then both are in trial mode where participants must be provided with a opportunity to make an "informed" decision as to the kind of "jab" and also what is associated with it, such as the risks, etc. It is not merely to make some kind of appointment where the person is left totally unknown as to any risk to be "jabbed" and what kind of "liquid" will be used.

As Olga suffers from Hearth Failure, comorbidities, etc, then I view it is totally irresponsible for even to suggest she arrange for any kind of "jabbing" where the Pfizer is not a "vaccination" but a "medical treatment" and as such would require a 'mRNA' specialist medical doctor to first have a blood test done before he/she could assess if the person to be "jabbed" is actually suitable for this.

The pharmaceutical companies so far did screen "participants" to exclude anyone with comorbidities" as to avoid any risk to the participants. I am not aware any "clinical trail" has mbeen completed as the information I obtained was that the TGA in 2023 is to assess the items if they can be approved for ordinary usage. As such, currently only "clinical trail" usage appears to be permitted.

While the Federal Government may desire to pursue the "jabbing" this however cannot be accepted and neither should be resulting to medical doctors participating to place "patients" needlessly at risk not just of their general wellbeing but even death.

I understand that currently there have already been instituted litigation in some countries as well as in Italy the court order manslaughter investigation regarding the deaths of a person against the 2 doctors and a nurse.

1
2 My FOI Act request to the Federal Government, the TGA and the Department of Health
3 exposes how the Department of Health has what appears to be stated on its website
4 deceptive/misleading statements and John Skerritt the head of the TGA on 17 February
5 2021 when interviewed by ABC Leigh Sales claimed to follow "government policy".
6

7 Well, the TGA is bound to follow the "science" and not "political science".
8

9 In my view, no amount of legislation by the Commonwealth can prevent anyone who
10 becomes a victim (so their families) to sue the medical profession and so their staff for any
11 health and wellbeing, including death as result of any "jabbing".

12 We have special laws in place such as the **Commonwealth of Australia Constitution Act**
13 **1900** (UK) and the **Biosecurity Act 2015** (Cth) and it is in my view important that those in
14 the medical profession do not whatsoever violate those legal provisions merely for the sake
15 of some "government policy".
16

17 You can always request the TGA (better do so in writing to have the evidence) if the TGA
18 did give "final" approval to Pfizer and/or AstraZeneca or merely "provisional approval" for
19 "clinical trials". If it is merely "provisional approval" then why not ask what parameters are
20 there regarding the "clinical trails" and how many "placebo's" participants are there
21 involved.

22 You may just discover that the Federal government and others are leading the medical
23 profession by the nose as to "jab" as many persons outside the parameters of any "clinical
24 trails".
25

26 Dr Aubrey Cunnington a UK scientist and expert in malaria I understand indicated that
27 people infected by the parasite can show altitude sickness.

28 A New York doctor in trauma centre of NY Hospital already about a year ago warned that
29 ventilators not properly programmed for the particular patient may in fact kill the patient.
30 As the doctor explained that those who came in with COVID_19 showed high altitude
31 sickness.

32 Dr Andrew Kaufmann already about a year ago warned that what appears to be the SARS-
33 CoV-2 virus appears to be a misidentification of exosomes.
34

35 It may be stated that to my knowledge the SARS-CoV-2 virus has not been "isolated" but
36 merely created on a computer!
37

38 It may very well turn out that SARS-CoV-2 virus is actually a exosomes infected by a
39 parasite or bacterium (such as eventuate with Legionnaires disease) and many scientist and
40 members of the medical profession with their tunnel vision have ignored the real issues.
41

42 I will not now go into details as to blood cloths, etc, safe to state that there is ample of
43 literature and videos that are explaining it all.
44

45 Nothing of the above is intended and neither be perceived to be some scientific/medical
46 advice but merely to seek to draw your attention that Olga has absolutely no intention to
47 join some "suicide cult" but rather make her own individual "informed" decision and I urge
48 you to respect her for this and avoid any further undesired invitations to join some "suicide
49 cult" by being "jabbed".

THE MORAL OF A SOCIETY CAN BE MEASURED BY HOW IT PROVIDES FOR THE DISABLED

END QUOTE Email 1-4-2021

It doesn't matter how much or how little one might know, never dismiss out of hand a suggestion someone makes.

We have 2 schools of thoughts, which is one that there is a virus that causes SARS-CoV-2 and another that it is a infection of the exosomes which is misidentify as being SARS-CoV-2. The latter one might possibly include that exosomes could be infected by mosquito having enjoyed a feast on the bat dung then injects a human being and by this may have caused the spread. If this is the cause then Australia's spraying (decontamination) of airplane and their passengers may be a reason why there may have been fewer infections into Australia. However, other then having every passenger and crew stripping naked in the plane before leaving and decontaminating every piece of what comes of them plane one may have a hard time to prevent the spread of any mosquito infection.

With SARS-CoV-2 there is to some degree scientific and other medical documentation that SARS-CoV-2 was originating in Wuhan China. Indeed, from reports I understand that SARS-CoV-2 is having parts in it where the virus is not a natural virus but created in a laboratory. And, Dr A Fauci (USA) in fact as I understand it was using USA taxpayers monies so that in Wuhan the laboratory could create a virus. The question is was it accidentally released from the laboratory or was it deliberately done? Some (now the W.H.O. may claim that it was it was from an animal (bat) via another animal and then carried over to humans. However, this would not explain the reported non-natural part in SARS-CoV-2. As such, it could in that regard be claimed that it was manufactured in a laboratory. It is also known that there are reports that the CCP hold allegedly a million or more religious/political prisoners and some have been killed to harvest their organs. I understand that some who received organs subsequently had COVID-19 as allegedly the organ(s) was/were from a person or persons infected with COVID-19. It may be that as the NAZI's did in WWII that the CCP is using prisoners for medical experiments and well possible laboratory staff then went down to the prison to check on those prisoners and in the process may have become infected themselves. In September 2019 reportedly 3 laboratory staff members were deemed to be infected. However, already in July 2019 the CCP allegedly requested citizens with any kind of fly systems to report to hospitals. This may indicate that SARS-CoV-2 was already then doing its rounds in china well in the early part of 2019. As I understand it in October 2019 in France they had a mystery case in hospital infected with something unknown, this later turned out to be SARS-CoV-2.

QUOTE MY POST

Even so I have certain reservations about this article of Alexandra Panaguli (such as that masks really are not so protective as a Danish research as an example proved) and being very much Anti-Trump disregarding this the article I view is well worth reading and considering. While much is made about bats, AstraZenaca actually had 2 scientist in Malaria involved to create its "vaccine" and we may have to consider if a "parasite" or a bacterium (such as with Legionnaires Disease) may be a culprit. I do not know if mosquito's do draw anything from bats or are around bats at all, but if so then they could perhaps be the intermittent host? Then again, we cannot ignore Dr Andrew Kaufman that SARS-CoV-2 might be exosomes which having been infected are wrongly labeled being SARS-CoV-2.

I also understand that in August 2019 people around Fort Detrick Maryland town of Frederick had fallen ill with symptoms now referred to as COVID-19. While in July 2019 the Chines Government then already was asking citizens in Wuhan to attend to a hospital if they had flu like symptoms. Where so many people are transit then one may also ask if perhaps SARS-CoV-2 may have originated in Africa and then people travelling the world spread it out to other countries. What this article shows is that Alexandra certainly did a formidable job in early 2020 and I for one look forwards to seeing any update. After all, by sharing information between each other may just assist to possibly find the origin. We all may have our own personal views but in totality we may working together even so being individually researching to accomplish the mystery of its origin. My concern is that too much is put on the so called "vaccine" which experts themselves are making known may only reduce symptoms but doesn't prevent anyone from becoming infected. And that is already proven to be so. The claim "do it for others" I view is nonsense, as regardless of any jabbing you can still be a "super spreader" and a so called "vaccine passport" is dangerous as someone already jabbed can still become infected and be a "super spreader". Also, why risk your health and wellbeing and even death to be jabbed when you are denied to make an "informed" decision as the Government and its cohorts are concealing the risk and again it should have published literature setting out the pro's and con's to be jabbed and not by concealment spread falsehood that jabbing is to protect others when this clearly is not so. When people discover that the Government is using deception and the TGA (Australia) is following not "medical science" but following "government policy" meaning "political science" then "Houston we got a problem". If politicians concentrate on building appropriate quarantine facilities that itself would go a long way. Also to pursue proper testing and not misuse PCR unchecked testing with mostly "false positives". A "blood test" prior to any jabbing could have avoided many "blood cloths" to eventuate as then a specialist medical doctor can assess the individual before any jabbing. So much more to state but for the moment it is plenty.

18 INVESTIGATIONS JAN. 4, 2021

19 The Lab-Leak Hypothesis

20 **For decades, scientists have been hot-wiring viruses in hopes of preventing a pandemic, not
21 causing one. But what if ...?**

22 **QUOTE**

23 This was just a note to self — at the time, I hadn't interviewed scientists about SARS-2 or read their research
24 papers. But I did know something about pathogens and laboratory accidents; I published a book last
25 year, Baseless, that talks about some of them. The book is named after a Pentagon program, Project Baseless,
26 whose goal, as of 1951, was to achieve “an Air Force-wide combat capability in biological and chemical
27 warfare at the earliest possible date.”

28 A vast treasure was spent by the U.S. on the amplification and aerial delivery of diseases — some well
29 known, others obscure and stealthy. America's biological-weapons program in the '50s had A1-priority
30 status, as high as nuclear weapons. In preparation for a total war with a numerically superior communist foe,
31 scientists bred germs to be resistant to antibiotics and other drug therapies, and they infected lab animals with
32 them, using a technique called “serial passaging,” in order to make the germs more virulent and more
33 catching.

34 And along the way, there were laboratory accidents. By 1960, hundreds of American scientists and
35 technicians had been hospitalized, victims of the diseases they were trying to weaponize. Charles Armstrong,
36 of the National Institutes of Health, one of the consulting founders of the American germ-warfare program,
37 investigated Q fever three times, and all three times, scientists and staffers got sick. In the anthrax pilot plant
38 at Camp Detrick, Maryland, in 1951, a microbiologist, attempting to perfect the “foaming process” of high-
39 volume production, developed a fever and died. In 1964, veterinary worker Albert Nickel fell ill after being
40 bitten by a lab animal.

41 His wife wasn't told that he had Machupo virus, or Bolivian hemorrhagic fever. “I watched him die through a
42 little window to his quarantine room at the Detrick infirmary,” she said.

43 In 1977, a worldwide epidemic of influenza A began in Russia and China; it was eventually traced to a
44 sample of an American strain of flu preserved in a laboratory freezer since 1950. In 1978, a hybrid strain of
45 smallpox killed a medical photographer at a lab in Birmingham, England; in 2007, live foot-and-mouth
46 disease leaked from a faulty drainpipe at the Institute for Animal Health in Surrey. In the U.S., “more than
47 1,100 laboratory incidents involving bacteria, viruses and toxins that pose significant or bioterror risks to
48 people and agriculture were reported to federal regulators during 2008 through 2012,” reported USA
49 Today in an exposé published in 2014.

50 In 2015, the Department of Defense discovered that workers at a germ-warfare testing center in Utah
51 had mistakenly sent close to 200 shipments of live anthrax to laboratories throughout the United States and
52 also to Australia, Germany, Japan, South Korea, and several other countries over the past 12 years. In 2019,
53 laboratories at Fort Detrick — where “defensive” research involves the creation of potential pathogens to
54 defend against — were shut down for several months by the Centers for Disease Control and Prevention for
55 “breaches of containment.” They reopened in December 2019.

1 High-containment laboratories have a whispered history of near misses. Scientists are people, and people
 2 have clumsy moments and poke themselves and get bitten by the enraged animals they are trying to nasally
 3 inoculate. Machines can create invisible aerosols, and cell solutions can become contaminated. Waste
 4 systems don't always work properly. Things can go wrong in a hundred different ways.

5 Hold that human fallibility in your mind. And then consider the cautious words of Alina Chan, a scientist who
 6 works at the Broad Institute of MIT and Harvard. "There is a reasonable chance that what we are dealing with
 7 is the result of a lab accident," Chan told me in July of last year. There was also, she added, a reasonable
 8 chance that the disease had evolved naturally — both were scientific possibilities. "I don't know if we will
 9 ever find a smoking gun, especially if it was a lab accident. The stakes are so high now. It would be terrifying
 10 to be blamed for millions of cases of COVID-19 and possibly up to a million deaths by year end, if the
 11 pandemic continues to grow out of control. The Chinese government has also restricted their own scholars
 12 and scientists from looking into the origins of SARS-CoV-2. At this rate, the origin of SARS-CoV-2 may just
 13 be buried by the passage of time."

1 unethical practices and dangerous drug operations, leading us to 2021 when the company fudged testing results
 2 data and released a deadly vaccine that has already been suspended in at least 25 countries.
 3 This is **business as usual** in the pharma / vaccine industry, where it has always been about profits over people.
 4 Those taking the vaccine are shockingly ignorant of all the relevant facts

5 **Nearly everyone taking covid vaccines does so out of stunning ignorance:**

- 6 • They have zero knowledge of the history of criminal behavior by Big Pharma and foolishly think the
 7 vaccine manufacturers are interested in "safety."
- 8 • They mistakenly think the FDA "approved" these vaccines after extensive safety studies and long-term
 9 trials. That's simply not true. In reality, the FDA granted "emergency authorization approval" for vaccines
 10 as an *experimental intervention* that has not been subjected to long-term safety trials.
- 11 • They have no idea that the mRNA platform used with these vaccines is a new, untested, experimental
 12 platform for hijacking the body's cells and programming them to churn out non-human proteins. The long-
 13 term consequences of this biohacking of the human body are completely unknown.
- 14 • They are completely unaware of the medium-term risks of *Antibody Dependent Enhancement* (ADE) which
 15 may cause a fatal hyperinflammatory reaction to pathogen exposure in the wild .

16 Quite literally, every single person taking covid vaccines right now is doing so under a stunning degree of
 17 dangerous ignorance. In truth, most of them *don't want to know* about vaccines. They simply want to be told
 18 what to do, and they prefer to have blind faith in "authority" sources who are actually using vaccines to
 19 achieve [global depopulation goals](#).

 31 and its wide-ranging links in Masonic circles**

32 **QUOTE**

33 **II. The Incredible Revelations About Lothar Wieler**

34 **Disclosure 1 - Vaccinations:**

35 On 15.10.2020 Wieler takes an oath of revelation in an interview with Phoenix:

36 "We all expect vaccines to be approved next year. We don't know
 37 exactly how they work, how well they work, what they do, but I'm
 38 very optimistic that vaccines are available."

39 Wieler thus reveals that the RKI did not understand the novel mRNA vaccines in their
 40 functioning at all. These vaccines have been introduced under an accelerated approval
 41 procedure, are recommended without a risk or long-term studies, and are irresponsibly
 42 even considered safe!

43 **Disclosure 2 - PCR-Test:**

44 "The crucial point is that we identify as many people as possible with
 45 PCR! And then sequencing is a sequential downstream technology that
 46 gives us even more information. But first of all, the whole essence of
 47 pandemic control is based on the fact that we identify humans..."

48 Wieler thus reveals that PCR testing is about identification. What is particularly precarious
 49 about Wieler's statement is that this "test pandemic" now appears to be being used to
 50 advance identification and digitization. As early as 2019, before the first Corona outbreak,
 51 he called for better identification and digital storage in order to increase vaccination rates.

Disclosure 3 - Daily RKI Numbers:

1.) The number of people who died of Corona

"In our case, someone is considered a corona death case in which a coronavirus infection has been detected."

Wieler reveals that the RKI does not distinguish whether someone died as a result of the coronavirus. A terminal cancer sufferer who tested positive shortly before death is counted as a corona dead, as is a previously positively tested road death. Obductions of more than 600 deaths to Corona by the University Hospital Hamburg-Eppendorf showed that 99% of these obduced persons already had a severe pre-existing condition. This shows that the Corona death figures published by Wieler do not in any way reflect the actual mortality rate of Covid 19.

2.) The number of people allegedly infected with Corona "The gold standard for primary diagnostics is and remains the PCR!"

Wieler reveals here, contrary to all facts, that for him the PCR test is the gold standard for diagnostics. The package leaflet of this PCR test shows that the test is not suitable for diagnosis at all:

"Only for research purposes. Not suitable for diagnostic procedures."

The inventor of the PCR method, Kary Mullis, who died in 2019, would also vociferously contradict this statement by Lothar Wieler. Mullis said:

"With PCR, if you do it well, you can find almost anything in everyone
[...] The test does NOT tell you if you are sick; or whether what has
been found is really harming you."

END QUOTE

<https://michael-mannheimer.net/2021/03/27/lothar-wieler-unfassbare-enthuellungen-zum-corona-wissenschaftsbetrug-des-rki-chefs-und-seinen-weitreichenden-verflechtungen-in-freimaurer-kreise/>

QUOTE

Conclusion:

With all the tricks and tricks, the RKI under Wieler's leadership drives up the statistics on the number of Corona deaths, the number of allegedly infected and the currently decisive incidence value. A fact-based critical debate is prevented. Dear viewers, this documentary uncovered a tangible statistical fraud for which Dr. Lothar Wieler is responsible as head of the RKI. This fraud is serious because it provides the policy with a justification for a continuing lockdown with severe restrictions on citizens' freedom. A fundamental lifting of the current massive restrictions on fundamental rights by citizens will only take place when a broad stratum of the population is aware of this fraud.

Since the leading media have not fulfilled their mandate for critical reporting and comprehensive information of the population for many months, a "reconnaissance tsunami" of the people is now needed!

20 <https://www.youtube.com/watch?v=81mEJ2Rph1Q>

21 **Huge risk of mass vaccination during a pandemic - Dr. Geert ...**

22 6 days ago ... Dr. Geert Vanden **Bossche's** concerns about mass vaccination during a pandemic. References: March 06: ...

23 For at least a year I have been referring to the dangers of elderly people in nursing homes being injected with the flu vaccine, and whatever, that may undermine their immune system.

24 In the video "Risk versus Benefits" Dr Phillip McMillan of **Vejon McMillan Research** interviewing G Vanden Bossche explains that it is like going to war with a very good weapon just that no one knows how to use it., comparing the "vaccines" regarding COVID-19.

25 To his credit he was not referring to killing the virus but to killing the "cells" that were infected. Which I as a layman views is actually the correct way to express this as a virus as I understand it is not alive. Essentially one can have a sealed jar of the virus on your kitchen bench but as long as it is not opened nothing will happen to the virus. As I view G Vanden Bossche

26 Also correctly explained is that the "virus" always will be around. Once it exist it remains to exist. As I view G Vanden Bossche also correctly pointed out that vaccination suppressed the natural immune system (again I have for more than a year referred to this) and make people more vulnerable to become infected and not being able to fight the infection, this as the vaccination

1 with mRNA, etc will in a sense cause the immune system so to say to retire leaving it up to the
 2 injected mRNA to do the job, this even so it may not at all be able to do so. Also, I view that
 3 G Vanden Bossche very much was correct that we are dealing with an artificial pandemic and it
 4 only can and will get worse because of the way politicians have gone mad to get everyone jabbed
 5 regardless their immune system already may have successfully overcome the virus.

6 As G Vanden Bossche also, correctly in my view, pointed out is that there appears to be a
 7 “wave” where the infection seems to shift from one group to another. Once the virus invaded
 8 human cells and can continue to enjoy the duplications then over time the shift to younger and
 9 healthier persons may eventuate. One therefore, in my view, should question what causes this
 10 shift? Is it that because younger persons are being jabbed have been losing their natural
 11 immunity to fight off the virus and so now become vulnerable and then the virus takes over?

12 As with hospitals where there can be so to say a “super bugs” that resist any antiseptic we may
 13 not end up with various (mutations) of the virus that are the result of the “liquid” that are injected
 14 into individuals.

15 To put it in simple language:

16 If a person holds someone hostage you do not then drop an atomic bomb on the place that wipes
 17 out the entire area and further surroundings. You need an approach that is appropriate for the
 18 circumstances.

19
 20 This virus problem is not one that was just dropped onto our laps. It was able to succeed to
 21 infiltrate humans due to the excessive jabbing of the general community that their resistances
 22 weakened so much their natural immune system no longer could fight of any invader.

23
 24 As G Vanden Bossche also brilliantly explained, at least in my view, was that there are people
 25 who had next to no antigens and yet still their body was able to “kill” the infected cells. Yet, it
 26 appears little attention is given to this.

27 It is hardly rocket science that a person who habitually takes pain killers for headache, no matter
 28 how minor, then slowly may become addicted and more severe painkillers may be needed to
 29 suppress any headache. The person then can become more sensitive to any headache.

30
 31 What we now have ended up is politicians going into madness to cause/force people to inflict
 32 self harm such as wearing compulsory a mask, social distancing (albeit at work they do not call it
 33 “work distancing”, and hence often misunderstood), lockdowns and even curfews, whereas had
 34 this all been avoided we may not just financially but even health wise be better off.

 45 “misinformation” concerning what I have set out above also. Will the Department of health
 46 remove its false, misleading, fraudulent claims from its website? And, so the TGA?

50 **Over 100 Fully Vaccinated People in Washington State Test Positive for COVID-19**
 51 **(theepochtimes.com)**

52 **QUOTE**

1 More than 100 people in [Washington](#) state have tested positive for COVID-19 after being fully vaccinated,
2 authorities said March 30.

3 Epidemiologists have found evidence of 102 so-called breakthrough cases since Feb. 1. That number
4 represents 0.01 percent of people in the state who have been fully vaccinated against the [CCP \(Chinese
5 Communist Party\) virus](#), which causes COVID-19.

6 The CCP virus is also known as SARS-CoV-2.

7 Eight of the patients required hospitalization and two, both over 80 years old with underlying health issues,
8 died. All contracted the virus more than two weeks after being fully vaccinated.

13 **Over 100 Fully Vaccinated People in Washington State Test Positive for COVID-19** 14 **(theepochtimes.com)**

15 **QUOTE**

16 Other states have seen infections among people who were fully vaccinated.

17 Officials in Idaho [told reporters](#) last week that breakthrough cases have been recorded, although the number
18 was fewer than 100. South Carolina authorities [said this week](#) that 134 such cases have been identified
19 throughout the state. Dozens of patients in Florida [have contracted](#) the CCP virus more than 14 days after
20 being fully vaccinated.

21 The Minnesota Department of Health is among the health departments issuing advisories about the
22 breakthrough cases.

59 **Vaccine Passports May Not Be Effective in Reducing Spread of COVID-19: Experts**

1 (theepochtimes.com)

2 Vaccine Passports May Not Be Effective in Reducing Spread of COVID-19: Experts

3 QUOTE

4 Experts say that relying solely on [vaccine passports](#) to allow people to engage in certain activities again is not
5 an effective mitigation tool to reduce the spread of [COVID-19](#), and may distract from other necessary
6 interventions or from the message of vaccination itself.

7 “I think pinning all our hopes on and putting all our efforts into vaccine passports as the main solution to
8 opening up travel might be the wrong strategy,” Dr. Sarah Chan, an expert in bioethics at the Usher Institute,
9 University of Edinburgh, [told](#) NTD’s “The Nation Speaks” in a recent interview. “And if we put too much
10 emphasis on passports as the sole strategy, I think we risk creating a false sense of security that might lead
11 people actually to increase their personal risk behaviors,” she said.

12 Chan said that vaccine passports may divert resources and attention from other important “structural and
13 social interventions to address the wider effects of the pandemic such as education, mental health, and so
14 forth.”

15 The [CCP \(Chinese Communist Party\) virus](#) pandemic and the resulting economic downturn have negatively
16 affected people’s mental health. The [Kaiser Family Foundation](#), a nonprofit organization, says about four in
17 10 American adults have reported symptoms of depression or anxiety, “up from one in 10 adults who
18 reported these symptoms from January to June 2019.”

38 The "Unvaccinated" Question | ZeroHedge

39 QUOTE

40 Either way, “vaccine” or “test,” the New Normal officials will be satisfied, because the tests and passes
41 are really just stage props. The point is the display of mindless obedience. Even if you take the New
42 Normals at their word, if you are under 65 and in relatively good health, getting “vaccinated” is more or less
43 pointless, except as a public display of compliance and belief in the official Covid-19 narrative (the
44 foundation stone of the New Normal ideology). Even the high priests of their “Science” confess that [it](#)
45 [doesn't prevent you spreading the "plague."](#) And [the PCR tests are virtually meaningless, as even the WHO](#)
46 [finally admitted](#). (You can [positive-PCR-test a pawpaw fruit](#) ... but [you might want to be careful who you](#)
47 [tell if you do that](#).)

48 END QUOTE

50 QUESTION 19

- 51
- 52 (a) Please provide details as to when the Department of Health will update its website to
53 ensure that any person reading the details will have all relevant details as to risk, etc,
54 regarding any jabbing?
55
- 56 (b) Please provide details what, if any, literature was forwarded to each person in the
57 Commonwealth of Australia as to the pro’s and con’s of any jabbing, such as the risk,
58 etc?

- 1
2 (c) Please provide details why an automated service is used to advise people to make an
3 appointment for any jabbing, without any relevant details as to the risk associated
4 with any such jabbing?
5
6 (d) Please provide details as to what, if any “forum” the Department of health and/or the
7 Government has provided for so that any person having questions about any jabbing
8 can freely communicate this and perhaps have appropriate response to any questions?
9
10 (e) Please provide details as to how the government, TGA and or Department of Health
11 can assess/determine the “benefits” and the “risk” of each individual and/or of the
12 general community considering the difference in communities depending where they
13 reside?
14
15 (f) Please provide details as to how any jab into an individual can then protect “others”
16 when the person so jabbed still can become infected?
17
18 (g) Please provide details within which constitutional powers the Commonwealth can
19 directly and/or indirectly force anyone to be jabbed with some unknown (to the
20 individual) liquid?
21
22 (h) Please provide details as to when will the TGA strictly follow “science” as “medical
23 science” instead of government policy being “political science”?
24
25 (i) Please provide details when will the TGA ensure that for it to consider any approval
26 (provisional or otherwise) it must first have and know all relevant details as to the
27 origin of anything that is in the liquid (referred to as vaccine)?
28
29 (j) Please provide details how (according to the Department of Health website) the
30 Commonwealth, the States and the Territories can deal with the so-called
31 vaccinations where this is still a “clinical trial” that requires to be controlled by the
32 “sponsor” being the pharmaceutical company?
33
34 (k) Please provide details who authorised for the texting of messages to make
35 appointments without any disclosure of relevant details for the receiver to make an
36 “informed” decision as to accept the injecting of some unbeknown liquid, and without
37 knowing or ability to research or otherwise have relevant details?
38
39 (l) Please provide details why there is this momentous lack of proper organisation to
40 ensure that before any person is asked to accept any inoculation the person has first
41 been provided with all relevant information as to be able to consult any medical
42 doctors and/or to make an “informed” decision?
43
44 (m) Please provide details as to where an automatic system merely text a message to
45 make an appointment or forfeit it, without any relevant details critical for a person to
46 be able to make an “informed” decision, what kind of “training” this proves to be
47 where the Department of Health purports and is touting this to be to teach those
48 involved to act competently?
49
50 (n) Please provide details: does inoculation by some COVID-19 liquid prevent a person
51 to become infected subsequently with COVID-19?

- (o) Please provide details as to what is the benefit for an individual as to risk personal harm after inoculation regarding COVID-19 when despite of the inoculation the individual still can not only become infected but even die as result of this infection?
- (p) Please provide details as to what, if any, long term harm has been considered by the TGA and/or its advisers regarding any so called COVID-19 vaccinations?
- (q) please provide details what system, if any, is in place that where an individual after inoculation hours or days later ends up with a rash and is unable to contact any medical service nevertheless there is a follow up provided that in such event medical services will not leave an individual (living alone) to die without proper check backs?
- (r) Please provide details what, if any, protection system is in place that swabs cannot be used to infect an individual with any mRNA?
- (s) Please provide details what, if anything, the TGA has done to ensure that all and any masks batch (sold in Australia via mail or otherwise) is tested for not containing dangerous particles, such as asbestos?
- (t) Please provide details on what legal basis public government departments and/or private companies can discriminate against any person not inoculated against COVID-19 (or whatever other claimed vaccine), where inoculation does not prevent a person to become later infected or even die from COVID-19, rather may cause an inoculated person to become asymptomatic and more dangerous to others, where it is presumed the person is not infected because of the inoculation?
- (u) Please provide details in view that [Dr. Michael Yeadon](#), a former Vice President and Chief Science Officer for Pfizer has claimed that the entire vaccine campaigns is used to possibly achieve “**massive-scale depopulation**” which Bill Gates himself claimed also, will then the Commonwealth and/or the States/Territories and/or those in the Department of Health and others flogging this jabbing be legally liable for any deaths, etc?

Replies can be forwarded to me via email, where appropriate.

We need to return to the organics and legal principles embed in of our federal constitution!

This correspondence is not intended and neither must be perceived to state all issues/details.

Awaiting your response,  **G. H. Schorel-Hlavka O.W.B. (Gerrit)**
