35 I like to attend to the spending spree politicians in the Commonwealth, States and Territories are
36 engaged in as I view it in a criminal manner.

37
38 In the last 2½ years Australians, unless for that time in a coma, would have been aware of the
39 deluge of advertising about covid, the need to be tested (with what now finally was declared to
40 be no proper testing at all) vaccinations (when the Pfizer and Moderna were no vaccines at all
41 but gene therapy) and on and on. But where did the monies come from did you ever ask?

1 Mr. MCMILLAN.-Would it not into the Appropriation Bill?

2 Mr. ISAACS.-Yes; but not as an annual service.

3 Mr. MCMILLAN.-The annual services of the Government are those which we distinguish from
 4 special grants and from loan services. The difficulty is that we have got rid of the phraseology to which
 5 we are accustomed, and instead of the words Appropriation Bill, we are using the word law.

6 Mr. ISAACS.-A difficulty arises in connexion with the honorable members proposal to place
 7 expenditure incurred for bush fires in the ordinary, it would not be annual, and it would not be a
 8 service.

9 END QUOTE

10
 11 What we can gain from this is the knowledge that there are “annual service” Appropriation Bills
 12 and “special” Appropriation Bills. “Annual service” as such is the maintenance of the overall
 13 cost to manage a Department. The salaries of the employees, the administration cost to provide
 14 offices, stationary, etc, all being recurrent cost on an annual basis.

15
 16 Advertising for special events are not at all “annual services” because they are merely whatever a
 17 Minister may desire to allegedly aid in promoting something. Often misused for political
 18 purposes. Therefore, advertising must be paid for only if the relevant Parliament passed “special”
 19 Appropriation Bills” to authorise the usage of Consolidated Revenue Funds of the particular
 20 State/Commonwealth/Territory. As such, “annual service” Appropriation Bills should bar
 21 inflation be generally the same. But we seem to have highly inflated “Appropriation Bills” for
 22 “annual services” so that the Minister or those colluding with him/her then can syphon off
 23 monies for whatever purpose they want to. About 6 months prior to the RED Shirt incident in
 24 Victoria I actually did write to Premier Daniel Andrews that he couldn’t use public monies
 25 (Consolidated Revenue Funds) for political purposes but we know now he nevertheless did.
 26 After all who cares when you by hook or by crook can succeed in an election? Who is really
 27 being held legally accountable? Yet, if an ordinary citizen were to do likewise then FRAUD
 28 charges likely will be the order of the day!

29 We therefore have that politicians are in a way encouraged to defraud Consolidated Revenue
 30 Funds as no matter if they are caught out, they more than likely have already succeeded in what
 31 they desired to achieve without any real legal accountability.

32
 33 What is needed is to ask: By which “special” Appropriation Bills passed by the Parliament, and
 34 subsequently enacted, were payments for advertising legally justified?

35 Moreover, there ought to be no doubt that this whole PLANDEMIC was a scam for the NEW
 36 WORLD ORDER as the PLANDEMIC really was about INFLUENZA renamed covid-19.
 37 Check out the executive orders of President Donald Trump and you may find that the WARP
 38 SPEED reference is about INFLUENZA. As I previously extensively have set out, before the
 39 name COVID-19 even emerged it was Anthony Fauci (NIH) who indicated at the **Milken**
 40 **Institute** to alter the about 10 year process for approval of medication/vaccines by merely
 41 causing fear mongering amongst the population. Having already in 2015 approval for what is
 42 now referred to COVID-vaccines, albeit being mRNA “gene therapy” so called vaccines, it must
 43 be obvious that this was an elaborate swindle upon the entire world.

44 We have however the TGA which job is to make sure that the stakeholders (Australians) are
 45 appropriately protected. Well it seems to me that TGA John Skerritt was more concerned about
 46 following “government policy” of former Director of the W.E.F. (World Economic Forum)
 47 Minister for health Greg Hunt and Scott Morrison PM (I understand also connected with the
 48 W.E.F.) then to safeguard Australian stakeholders. A clear example might be where there is a
 49 process of “clinical trials” that will slowly increase the number of participants pending which
 50 stage of the “clinical trial” is used. Well, having all Australians jabbed hardly shows any

1 responsible conduct of “clinical trial” stages. Moreover the “provisional approval for a “clinical
 2 trial” actually prohibits the use of commercial obtained so called vaccines. Yet, this is precisely
 3 what was being used! As such TGA John Skerritt should have stepped in to immediately halt any
 4 usage of commercial items without proper approval. However, he seemed to be more interested,
 5 as I view it, to even allow coercion upon Australians.

6 While I understand TGA John Skerritt claims that every batch that arrives is tested the question
 7 is: REALLY?

8 What is it tested for? Just the vials don't leak? Surely there can be no proper testing claimed
 9 when around the world scientist are exposing the contamination of vials they checked. In some
 10 cases 100% of the vials have items in them that are not listed as ingredients, yet can be harmful
 11 if not fatal to a person injected with the substance in that vial.

12 One then have to ask for each government what are the Minister for Health and the Chief Health
 13 Officer of each and every jurisdiction doing about it, other than playing sickening games?

27 Abstract

28 **Aims of the study:** Patient comprehension is a critical part of meeting medical ethics
 29 standards of informed consent in study designs. The aim of the study was to determine if
 30 sufficient literature exists to require clinicians to disclose the specific risk that COVID-19
 31 vaccines could worsen disease upon exposure to challenge or circulating virus.

32 **Methods used to conduct the study:** Published literature was reviewed to identify
 33 preclinical and clinical evidence that COVID-19 vaccines could worsen disease upon
 34 exposure to challenge or circulating virus. Clinical trial protocols for COVID-19 vaccines
 35 were reviewed to determine if risks were properly disclosed.

36 **Results of the study:** COVID-19 vaccines designed to elicit neutralising antibodies may
 37 sensitise vaccine recipients to more severe disease than if they were not vaccinated.
 38 Vaccines for SARS, MERS and RSV have never been approved, and the data generated in
 39 the development and testing of these vaccines suggest a serious mechanistic concern: that
 40 vaccines designed empirically using the traditional approach (consisting of the unmodified
 41 or minimally modified coronavirus viral spike to elicit neutralising antibodies), be they
 42 composed of protein, viral vector, DNA or RNA and irrespective of delivery method, may
 43 worsen COVID-19 disease via antibody-dependent enhancement (ADE). **This risk is**
 44 **sufficiently obscured in clinical trial protocols and consent forms for ongoing**
 45 **COVID-19 vaccine trials that adequate patient comprehension of this risk is unlikely**
 46 **to occur, obviating truly informed consent by subjects in these trials.**

47 **Conclusions drawn from the study and clinical implications: The specific and**
 48 **significant COVID-19 risk of ADE should have been and should be prominently and**
 49 **independently disclosed to research subjects currently in vaccine trials, as well as**
 50 **those being recruited for the trials and future patients after vaccine approval, in**
 51 **order to meet the medical ethics standard of patient comprehension for informed**

7 parents left unknown what they really needed to give “*informed* consent”. No proper supervision
8 by any Chief medical Officer/Minister for Health and it went on for decades. Now that I am
9 researching what has been going on it seems to me obvious that were had grossly incompetent

14 **U.S. CDC director announces shake-up, citing COVID mistakes**

15 QUOTE

16 The agency has long been criticized as too ponderous, focusing on collection and analysis
17 of data but not acting quickly against new health threats. Public unhappiness with the
18 agency grew dramatically during the COVID-19 pandemic. Experts said the CDC was
19 slow to recognize how much virus was entering the U.S. from Europe, to recommend
20 people wear masks, to say the virus can spread through the air, and to ramp up systematic
21 testing for new variants

22 “We saw during COVID that CDC's structures, frankly, weren't designed to take in
23 information, digest it and disseminate it to the public at the speed necessary,” said Jason
24 Schwartz, a health policy researcher at the Yale School of Public Health.

25 Walensky, who became director in January 2021, has long said the agency has to move
26 faster and communicate better, but stumbles have continued during her tenure. In April,
27 she called for an in-depth review of the agency, which resulted in the announced changes.

28 “It's not lost on me that we fell short in many ways” responding to the coronavirus,

29 Walensky said. “We had some pretty public mistakes, and so much of this effort was to
30 hold up the mirror ... to understand where and how we could do better.”

31 END QUOTE

32
33
34 Without conceding that there is such a thing as a “virus” it seems obvious that the CDC itself
35 acknowledges it made mistakes sufficient to trequire reorganisation. yet, we have Australian
36 health officials referring to the CDC as it it is the source that knows what it is doing and for
37 everyone to follow. And the referral as being an agency, it is to my understanding a company
38 that acts in the interest of its sponsors, the pharmaceutical companies and not overlook Bill Gates

4 QUOTE

5 The government claims it can examine your emails, bank accounts, medical and legal
6 records at will merely because it claims you have waived your interest in them by placing
7 them in the custody of others. This is, of course, farcical. Those custodians have a legal
8 duty to keep your records private. Yet, to get physically onto your property in defiance of
9 your will, the government must meet Madison's probable cause standard.

10 That standard requires a showing to a neutral judge that it is more likely than not that a
11 crime has been committed and that it is more likely than not that evidence of that same
12 crime can be found in the place to be searched or the person or thing to be seized. These
13 standards come directly from the language of the amendment itself.

14 Does the probable cause standard adequately protect property rights? It does not. That
15 standard involves a weighing and balancing test pitting the nature of property ownership
16 against the government's claimed need for evidence. It weighs the harm to property rights
17 caused by a government invasion as against the harm to the government by denying it the
18 fruits of its planned invasion.

19 The very concept of weighing a natural right against a government need is totalitarian. The
20 government needs whatever it wants, whereas our rights are inalienable unless we waive
21 them. A natural human right always supersedes a government wish. Thus, the only
22 standard that morally justifies government invasion of private property is waiver by the
23 violation of another's natural rights.

11 (*Natural News*) Globalists see humanity as cattle (or sheeple) to be exploited for as long as
 12 needed, then culled like cattle herds when they are no longer useful. As globalist advisor
 13 Yuval Harari is now saying (paraphrased), the age of humans is coming to an end on planet
 14 Earth, and globalists have activated a multi-faceted plan to “cleanse” the planet of all
 15 human beings.

16 If someone were to have some sick, twisted desire to kill off a herd of cattle, they could
 17 simply shut off the water and the food. Death would come in a matter of days or weeks at
 18 most. The same is happening right now to humans.

19 ***The water supply is being cut off via geoengineering***, causing global droughts and
 20 widespread crop failures. Entire cities like Los Angeles and Los Vegas are being
 21 threatened with a terminated water supply in the years ahead.

22 END QUOTE

23
 24 While air pollution is something that may not be deliberately done to target humans, nevertheless
 25 if you were to start a stinking bon fire in your yard than authorities might be quickly arriving for
 26 that you are polluting the air of your neighbours. Your right to use your property as you desire
 27 may be curtailed when you use your property to offend the rights of others ling adjoining to you.
 28 However, for the Government to permit any kind of spray that is specifically designed to harm
 29 you, albeit using Rockefeller’s reasoning you claim it is for the best will while achieving the
 30 opposite, might be the real issue here. After all, politicians will always claim that they do it for
 31 the general community as who dare to think they are selfish, egoistic, etc? Just that in my view
 32 any government cannot willy nilly permit spraying that may adversely affect the general
 33 community or any person in particular. The right to privacy includes in my view the right to
 34 enjoy once life without undue disturbances. Being sprayed upon without you knowledge and/or
 35 consent I view is a violation of your natural rights. Chemtrials as such may likely be considered
 36 to be an invasion of your privacy where it directly/indirectly harms \your private environment.
 37 The mere fact that some public servant may approve of any spraying itself in my view cannot
 38 override your right to natural privacy. As such, even if a Government Department may approve a
 39 certain spraying (perhaps being provided financial supports?) it in itself I view cannot override
 40 your right to “natural privacy. As such, the Government would require to obtain a Court order
 41 against each and every person who might become affected if such spray was to be done.

42 As we have witnessed in the last few years with this PLANDEMIC COVID-19 a Government
 43 and its collaborators may make any claim to seek to justify doing whatever it desires even so the
 44 real issue might be ulterior purposes such as spraying to affect the minds of citizens and so make
 45 them more gullible to accept the NEW WORLD ORDER, but a judge must remain impartial and
 46 must consider not the FICTION proffered by The Government but rather the FACTS.

Vierns, Germany - December 9. 2021 By Ralf Liebhold/Shutterstock

HEALTH VIEWPOINTS**Untested Bivalent COVID Jab Being Rolled Out**

STORY AT-A-GLANCE

- August 15, 2022, the U.K. became the first country to approve Moderna’s new bivalent COVID booster — Spikevax bivalent — which contains mRNA that codes for the original Wuhan strain spike protein and the Omicron BA.1 subvariant
- The approval of the new booster comes on the heels of complaints about lack of demand for the shots. Moderna recently threw away 30 million doses of its original COVID jab, as nobody wanted them, and the U.S., has tossed 82.1 million COVID jab doses in the trash for the same reason
- The Spikevax bivalent shot is already out of date, as both strains included are no longer in circulation anywhere in the world
- In the U.S., infections are currently caused by the BA.4, BA.5 and BA.2.12.1 variants of Omicron. In Europe, Omicron BA.2, BA.4 and BA.5 are the current “variants of concern.” BA.1 is on the list of “de-escalated variants,” meaning it’s of no concern either because it’s either not in circulation, or because it doesn’t cause severe illness
- Coronaviruses mutate very rapidly, and when you vaccinate against a rapidly mutating virus, you encourage it to mutate even faster, and to develop immune-evading properties. This is what we’ve been witnessing since the beginning of the COVID jab campaign, and outdated, leaky bivalent boosters may worsen the situation further

END QUOTE

Why indeed there isn’t a compulsory medical assessment for each person before any jab is given as to make sure that the patient is not unduly harmed? After all the State of Victoria itself recognises that not every so called vaccine is for every Victorian as special vaccinations are exclusive for Australians of Aboriginal descent. Apart of that I view this is unconstitutional.

German Scientists Discover Hidden ‘Toxic Components’ In ALL COVID Vaccines They Tested

QUOTE

Making matters even more disturbing, the Working Group for COVID Vaccine Analysis says that some of the unusual toxic elements found in the AstraZeneca, Pfizer, and Moderna vaccine vials **were not listed in the ingredient lists from the manufacturers.**

The following metallic elements were found in the COVID vaccines:

- Alkali metals: caesium (Cs), potassium (K)
- Alkaline earth metals: calcium (Ca), barium (Ba)
- transition metals: cobalt (Co), iron (Fe), chromium (Cr), titanium (Ti)
- Rare earth metals: cerium (Ce), gadolinium (Gd)
- Mining group/metal: aluminum (Al)
- Carbon group: silicon (Si) (partly support material/slide)
- Oxygen group: sulphur (S)

END QUOTE

To me this means that the Chief Health Officer and/or Minister for Health simply neither could have done their jobs to make sure that all ingredients are listed, and likewise so the TGA! How then could any person have provided “*informed* consent” without knowing the ingredients in the vial? While the TGA may claim to check every batch, reality is that for whatever reasons it to me failed disastrously to discover what ought to have been discovered. It makes me wonder if there merely might be some arrangement that the checking is done not to upset the commercial interest of the pharmaceutical company concerned!

It was in 2020 when a mother contacted me with concerns about her daughter being jabbed and then risk to end up with **AUTISM**. I did some checking and did consider the mothers concerns appeared to be justified. However, when earlier this year my son Mark informed him that his son Dion (my grandson) had ended up with **AUTISM** I decided to do more checking. I am horrified to discover that numerous vaccines contain ingredients that can be very harmful to any person, let alone children who are still developing.

My wife loves baking cakes. And well, she baked one and to her horror there was a tast of salt in it. She was sure she didn’t use salt. I explained that what may have happened is that she use 2 ingredients which caused a chemical reaction and salt may by this have been drawn out that ordinary might not have been noticed. As such to ingredients on their own might be harmless but when combining it the end result can be terrible. In regard of jabbing children, or even adults, whatever compound is injected might be harmless to one person while can have devastating and even death resulting for another person. There is no such thing as one vaccine fits all. Therefore there must be a proper medical assessment before any person is jabbed and have some harmful compound injected into the body, or having to take a certain medication.

findings of a September 2021 study published in the journal Toxicology Reports.

STORY AT-A-GLANCE

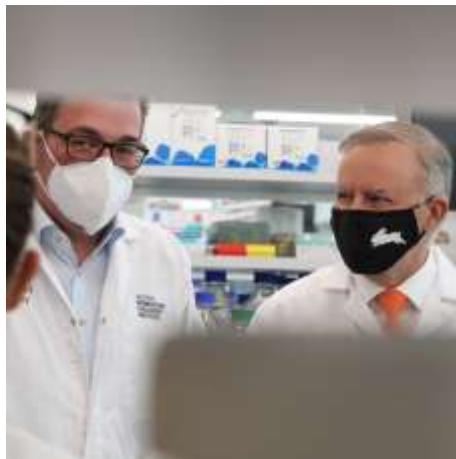

- According to a September 2021 analysis, based on conservative, best-case scenarios, the COVID shots have killed five times more seniors (65+) than the infection
- In younger people and children, the risk associated with the COVID shot, compared to the risk of COVID-19, is bound to be even more pronounced
- Data show higher vaccination rates do not translate into lower COVID-19 case rates
- 50% of reported deaths after COVID-19 “vaccination” occur within 24 hours; 80% occur within the first week. According to one report, 86% of deaths have no other explanation aside from a vaccine adverse event. A Scandinavian study concluded about 40% of post-job deaths among seniors in assisted living homes are directly due to the injection

The study in the journal Toxicology Reports, states: (1)

“A novel best-case scenario cost-benefit analysis showed very conservatively that there are five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic.

Our politicians instead are pushing advertising for more people to be jabbed as it is “safe and effective” I wonder if this means: “safe way to ensure you are going to be killed and effective because soon or later you will be killed by it. And they are pushing for more manufacturing facilities as it is in their political interest never mind that the long term harm is still not known as after all the “clinical trials” are still going on! Well sort of minus those already maimed or killed.

While in my view the Premier is simply Minister for the Office of the Prime Minister and Cabinet, somehow we get now the Premier available for a photo opportunity and well Anthony Albanese likewise. If it is a medical and business issue then I view the Minister for health and the Minister for business, etc, should have been there not the Premier and Anthony Albanese.

As now has been revealed, as I previously wrote about also graphene has been used for creating capsules. So a person may digest a medication that is appropriate but the capsule itself is harmful! And when you for example take such a capsule on a daily basis then the increase of graphene into the body can have serious if not disastrous results, even death. So what are all those Ministers for Health doing to ensure this harm is not inflicted? Well, it seems none of them really could care less as after all their concentration seems to me to be more about photo opportunities rather than to do the job they are being paid for.

MR. DIAMOND: I have been covering this pandemic from the beginning. You've been part of responding to this pandemic from the beginning in a couple of different roles. Throughout the pandemic, the view of public health agencies has weakened if you're looking at polling. **Public trust has fallen at agencies like CDC and others.** What is your message to Americans who feel frustrated with how the public health apparatus or public health system has responded to the pandemic?

QUOTE

QUOTE DR. WALENSKY:

What I didn't say, which was implied, but I think we should articulate, **is that that science moves, that science changes.** And sometimes we have to make decisions in the absence of all the data and all the science that we would like to have before all of that information is available. That is very hard in a pandemic. People want to understand a decision and have it not move. But my responsibility to the American people and to populations and to individual patients is to deliver the best information that I have at the time, and sometimes that has changed.

QUOTE

Let me get this clear "**that that science moves, that science changes**" but despite that the *Commonwealth of Australia Constitution Act 1900* (UK) provides for "*political liberty*" nevertheless Premier Daniel Andrews had the Victorian Police like terrorist shooting in the back of unarmed protestors because he didn't like them to exercise their constitutional rights to protest and exposed that the science the protestors relied upon proved that the Chief Health Officer has no scientific basis for any mandates. The politicians insisting their "science" (whatever it was purportedly to be) was reliable and yet here we have an admission that "**that that science moves, that science changes**" and as such this clearly warnete3d to communicate the different opinions But as AHPRA proved with Dr William Bay of Queensland, it non-existing science that they fabricate as being science is what is adhered to and everyone else must obey!

How Many Have Figured Out That the State's Only Plan is Mass Depopulation and Control of the Rest of Humanity? Not Enough!

"Alpha waves in the human brain are between 6 and 8 hertz. The wave frequency of the human cavity resonates between 6 and 8 hertz. All biological systems operate in the same frequency range. The human brain's alpha waves function in this range and the electrical resonance of the earth is between 6 and 8 hertz. Thus, our entire biological system – the brain and the earth itself – work on the same frequencies. If we can control that resonate system electronically, we can directly control the entire mental system of humankind."

Nikola Tesla

I have held the position, and stand by it, that the masses are responsible for their own enslavement, especially over the past three years, when all plans to take over humanity have escalated almost beyond imagination. With that said, is there now a desperation evident by the ruling class due to more waking up to all the obvious lies and deception? The rulers and their political pawns given power by the people voluntarily, seem to be going in many different directions all at the same time. Fake 'viruses,' world war threats, food and energy shortages, 'global warming,' transhumanism, ridiculous gender nonsense,

1 political false flags, and more. Is this an indication of confidence in their takeover
 2 conspiracy, or is it a sign of panic? My hope of course, would be the latter, but while still
 3 not convinced, it seems obvious that signs of uncertainty have arisen in the mindset of the
 4 ruling ‘elites.’ If this means that the rulers are fearful of their lies being rejected, and are
 5 reacting erratically in order to perpetuate the propaganda, that would be a good thing.
 6 While more awakening is certainly happening, it is not at any level which could cause
 7 enough uproar to greatly slow or stop the totalitarian assault on this and other populations.
 8 With so much obvious deceit, lies, criminal behavior by the state, and open hostility
 9 toward the masses, especially those who question the false narratives, why hasn’t anger
 10 and dissent become much more prevalent? Could this be due to a mental duality of sorts of
 11 the common man; one in which confusion and fear simultaneously reside? Simple
 12 ignorance cannot explain away such a submissive attitude by the people at large, given that
 13 the horrid effects are not only nationwide, but worldwide. Has the general population been
 14 not only dumbed down beyond recognition by the system, but also psychologically or
 15 physiologically manipulated to react in a certain manner? If this hypothesis seems far-
 16 fetched, how can one explain how so many all at the same time, act in the same manner,
 17 and accept and comply with such extreme draconian measures mandated by the state;
 18 measures that dramatically alter their lives and families in very adverse ways?

25 Dr. Elizabeth Eads is on the frontline of medicine, treating patients who have been injected
 26 with the experimental CV19 so-called “vaccines.” Dr. Eads is now seeing first-hand
 27 Acquired Immunodeficiency Syndrome, commonly referred to as AIDS. Let that sink in.
 28 Dr. Eads explains, “Yes, we are seeing vaccine related acquired immunodeficiency in the
 29 hospital now from the triple vaxed. . . . It is a vax injury, and we are not really certain how
 30 to treat this. We are kind of throwing the kitchen sink at it. . . . We are trying to use
 31 everything we can think of to boost up the CD4 and CD8 counts and reverse this collapse
 32 or calamity of this immune collapse. It’s very stunning.”

33 Dr. Eads says it is particularly bad in the double CV19 vaxed and boosted. She calls the
 34 third injection “The Kill Shot, the Money Ball or whatever you want to call it. It is just
 35 devastating to the immune system, and I’ll tell you why. If you look at the recent Stanford
 36 study, and I am just going to read a couple of sentences from the Stanford study: ‘The
 37 spike protein in the CV19 vaccines that everyone is talking about is called the Lentivirus.
 38 The Lenti contains a combination of HIV, types one through three, SRV/1, which is AIDS,
 39 MERS and SARS. In the Stanford study, the best-known Lentivirus is the human immune
 40 deficiency pathogen, which causes AIDS. This is why we are seeing autoimmune and
 41 neurodegenerative decline after the Covid 19 (Vax) especially the booster. . . . It
 42 permanently changes the genome of the cell. That is why this is so terrifying to us in the
 43 medical community. We just don’t know how to attack this.”

48 Eads says, “That is exactly what I am telling you. That is what the Spike Lentivirus is. It
 49 is made up of HIV and AIDS along with SARS and MERS. That’s why the vaccinated and
 50 boosted are so sick. That’s why they dominate the hospitalizations regarding Covid illness
 51 as well.”

52 Because the immune system is depleted, many kinds of disease such as cancer can spread
 like wildfire. Dr. Ryan Cole says he’s seeing cancer up as much as 2,000% from the

Whilst you’ve been distracted by Russia-Ukraine, the UK Government quietly published data confirming the Triple Vaccinated are just weeks away from developing Acquired Immunodeficiency Syndrome

QUOTE

The latest official figures from the UK Health Security Agency show that triple vaccinated people aged 30-70 have now lost at least 70% of their immune system capability compared to the natural immune system of unvaccinated people.

Their immune systems are deteriorating between 10 and 30% per week on average, with the deterioration much larger and quicker among the younger age groups.

If this continues at the current rate then all triple vaccinated 18 to 39-year-olds will have 100% immune system degradation by the middle of April 2022, with all other triple vaccinated age-groups following suit not long after.

In other words, official UK Government data strongly suggests the triple vaccinated population are rapidly developing acquired immunodeficiency syndrome.

1 As you can see from the above the case-rates per 100k have been highest among the triple
 2 vaccinated population over these 3 months, except for in the under 18's in all 3 months,
 3 and the 18-29-year-olds in the week 3 report only.
 4 Now that we know these we can use Pfizer's simple vaccine effectiveness formula to
 5 calculate the real-world Covid-19 vaccine effectiveness among the triple vaccinated.
 6 *Unvaccinated Case Rate – Vaccinated Case Rate / Unvaccinated Case Rate x 100*
 7 The following chart shows the Covid-19 vaccine effectiveness among the triple vaccinated
 8 population in England in 4 week periods between Week 51 of 2021 and Week 9 of 2022 –

9 As you can see the vaccine effectiveness has been falling month and month, with the
 10 lowest effectiveness recorded among 40-49-year-olds at minus-248.92%. But the sharpest
 11 decline in jab effectiveness has been recorded among 18-29-year-olds, falling to minus-
 12 201.52% by Week 9 of 2022 from +10.19 in Week 51 to Week 2.
 13 However, vaccine effectiveness isn't really a measure of a vaccine, it is a measure of a
 14 vaccine recipients immune system performance compared to the immune system
 15 performance of an unvaccinated person.
 16 A vaccine effectiveness of +50% would mean that the fully vaccinated are 50% more
 17 protected against Covid-19 than the unvaccinated. In other words the fully vaccinated have
 18 an immune system that is 50% better at tackling Covid-19.
 19 A vaccine effectiveness of 0% would mean that the fully vaccinated are no more protected
 20 against Covid-19 than the unvaccinated, meaning the vaccines are ineffective. In other
 21 words the fully vaccinated have an immune system that is equal to that of the unvaccinated
 22 at tackling Covid-19.
 23 But a vaccine effectiveness of -50% would mean that the unvaccinated were 50% more
 24 protected against Covid-19 than the fully vaccinated. In other words the immune system
 25 performance of the vaccinated is 50% worse than the natural immune system performance
 26 of the unvaccinated. Therefore, the Covid-19 vaccines have damaged the immune system.

I first saw this on El Gato Malo's Substack a few days ago. This is not the way to notify the American public you were wrong. Especially on something this important.

What happens when the scientific evidence is so clear about the spike protein from the COVID vaccines remaining in your body that the CDC has to admit they were wrong?

They just delete the inaccurate statement and say nothing. Nothing!

The mainstream press doesn't pick it up at all of course. There was no press release or anything to let people know.

Instead, the CDC relies on a kitten to get the word out about the change: [El Gato Malo's Substack](#).

The kitten's article is excellent.

Thanks to El Gato Malo for noticing the change on the CDC website.

Now the CDC can't say that they didn't warn everyone about the risks of these vaccines.

I'm on the road and just got this. Is this legit? Can someone replicate this?

Aug 23

I just got this message:

From Ana Maria Mihalcea,

Dear Colleagues,

I interviewed a Brazilian Biologist and Researcher, Felipe Reitz, who is doing Computerized Thermographic Imaging in the C19 injected and correlating this with Live Blood Analysis. The clots are everywhere, even in young athletes in their 20's, it is absolutely heartbreakingly shocking. These are completely asymptomatic. For the love of humanity, please look at these images and the video we did.

As an Internal Medicine Physician of over 20 years' experience, I have never seen anything so devastating in its implications. He has found the same thing in children, as young as 2 years old.

If this visual proof does not help doctors stop the jabs, or people not to get them, I do not know what will. Maybe whole-body Computerized Thermography needs to be standard of care for all C19 injected people.

Here is the link to the story which has a link the 1 hour video. I've also emailed Reitz.

In these never-before-seen images of individuals who received the experimental mRNA shot, we can see extensive abnormal vein imaging suggesting blood clotting in both deep venous and superficial venous system. These individuals are completely asymptomatic and do not feel anything, nor do they have swelling.

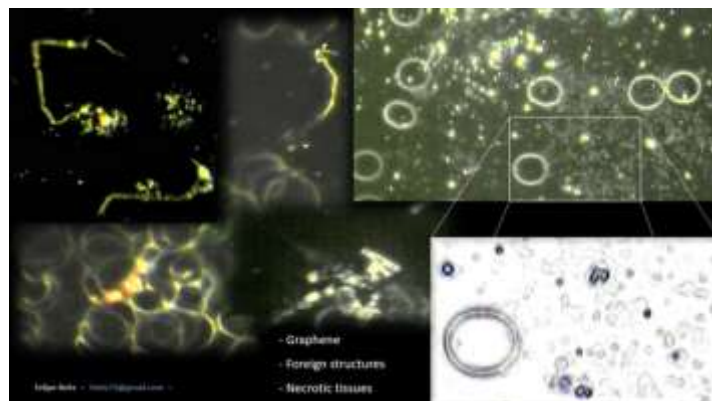

Additionally, we are discussing the blood analysis findings of vaccinated individuals compared to unvaccinated.

Most recently, Mike Adams from Natural News examined the chemical composition of blood clots of injected individuals who died with extensive self-assembly blood clots. The composition showed that this is not the same composition as normal human blood clots, but he found metals like Aluminum, Tin and Sodium that are electrically conductive. You can find more about the clot analysis here:

[EXCLUSIVE: Natural News releases post-vaccine clot ICP-MS elemental analysis results, comparing clots to human blood ... findings reveal these clots are NOT "blood" clots](#)

Summary:

These shocking thermographic images suggest extensive subcutaneous and deep vein blood clotting in C19 injected individuals. Dark Field Microscopy complements the analysis of these individuals, showing what potentially could be Graphene Hydroxide or nanostructures of other metal composition. **These alarming findings should alert health care practitioners to screen people who received the gene modifying injections for blood clots, even if they are completely asymptomatic.** Thermography may be a noninvasive safe way to do so. Felipe has now also seen this in children as young as 2 years old. **This visual proof of harm should galvanize every health care provider to stop giving the shots and every person to stop accepting them.**

German Scientists Discover Hidden 'Toxic Components' In ALL COVID Vaccines They Tested

QUOTE

German scientists that examined samples of the Covid-19 vaccine found highly unusual toxic components, predominantly metallic, in all of the tests. They called the results "troubling and perplexing."

Making matters even more disturbing, the Working Group for COVID Vaccine Analysis says that some of the unusual toxic elements found in the AstraZeneca, Pfizer, and Moderna vaccine vials **were not listed in the ingredient lists from the manufacturers.**

The following metallic elements were found in the COVID vaccines:

- Alkali metals: caesium (Cs), potassium (K)
- Alkaline earth metals: calcium (Ca), barium (Ba)

EXCLUSIVE: CDC Claims Link Between Heart Inflammation and COVID-19 Vaccines Wasn't Known for Most of 2021

QUOTE

Sen. Ron Johnson (R-Wis.) said that the FOIA response “raises even more questions about the agency’s honesty, transparency, and use, or lack thereof, of its safety surveillance systems, such as VAERS, to detect COVID-19 vaccine adverse events.”

Earliest Myocarditis Reports

Reports of heart inflammation after COVID-19 vaccination were first made public in April 2021 by the U.S. military, which [detected the issue https://www.theepochtimes.com/exclusive-military-official-predicted-mrna-covid-19-vaccines-might-be-paused-over-heart-inflammation_4521513.html](https://www.theepochtimes.com/exclusive-military-official-predicted-mrna-covid-19-vaccines-might-be-paused-over-heart-inflammation_4521513.html) along with Israeli authorities well before the CDC.

While Dr. Rochelle Walensky, the CDC’s director, said that month that the agency had looked for a safety signal in its data and found none, by the end of June CDC researchers [were](#)

[saying https://jamanetwork.com/journals/jamacardiology/fullarticle/2781600](https://jamanetwork.com/journals/jamacardiology/fullarticle/2781600) that the available data “suggest an association with immunization,” and in August described ([pdf https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2021-08-30/07-COVID-Gargano-508.pdf](https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2021-08-30/07-COVID-Gargano-508.pdf)) the issue as a “harm” from vaccination.

The claim that the link wasn’t known “is provably false,” Barbara Loe Fisher, co-founder and president of the National Vaccine Information Center, told The Epoch Times via email. “Either the right hand does not know what the left hand is doing at CDC, or federal health officials are disseminating misinformation about what they knew about myocarditis following mRNA COVID vaccines and when they knew it.”

You’ll see a LOT of the common side effects of the vaccine including myocarditis/pericarditis (swelling/scarring of the heart).

Host cell DNA apparently is chicken embryo DNA. Remember how the adult Pfizer COVID shots each have 30 mcg of mRNA? Each Jynneos shot can have 2/3 that amount of chicken genetic info.

ADVERSE REACTIONS

- In smallpox vaccine-naïve healthy adults, the most common (> 10%) solicited injection site reactions were pain (84.9%), redness (60.8%), swelling (51.6%), induration (45.4%), and itching (43.1%); the most common solicited systemic adverse reactions were muscle pain (42.8%), headache (34.8%), fatigue (30.4%), nausea (17.3%) and chills (10.4%). (6.1)

Also, the fact sheet says recipients might experience severe allergic anaphylactic reactions:

2

Jynneos

JYNNEOS is a live vaccine produced from the strain Modified Vaccinia Ankara-Rebarned North (MVA-RN), an attenuated, non-replicating orthopoxvirus. MVA-RN is grown in primary Chicken Embryo Fibroblast (CEF) cells suspended in a serum-free medium containing no material of direct animal origin, harvested from the CEF cells, purified and concentrated by several Tangential Flow Filtration (TFF) steps including benzoylase digestion. Each 0.5 mL dose is formulated to contain 0.5×10^6 to 3.95×10^6 infectious units of MVA-RN live virus in 10 mM Tris (tromethamine), 140 mM sodium chloride at pH 7.7. Each 0.5 mL dose may contain residual amounts of host-cell DNA (5.23 mcg), protein (5.560 mcg), benzoylase (5 0.0025 mcg), gentamicin (5 0.163 mcg) and lipofluovirin (5 0.565 mcg).

ACAM 2000 is the replicator. COMPETENT version. This can spread to "everyone"

3

ACAM 2000: "Smallpox (Vaccinia) Vaccine, Live"

11 DESCRIPTION
ACAM2000, Smallpox (Vaccinia) Vaccine, Live, is a live vaccinia virus derived from plaque purification cloning from Dryvax® (Wyeth Laboratories, Marietta, PA, calf lymph vaccine, New York City Board of Health Strain) and grown in African Green Monkey kidney (Vero) cells and tested to be free of adventitious agents.

ACAM2000 is provided as a lyophilized preparation of purified live virus containing the following non-active excipients: 6-8 mM HEPES (pH 6.5-7.5), 2% human serum albumin USP, 0.5 – 0.7% sodium chloride USP, 5% mannitol USP, and trace amounts of neomycin and polymyxin B.

12.2.3 Virus Shedding
Virus is shed from the vaccination site during the period starting with the development of a papule (day 2-5); shedding ceases when the scab separates and the lesion is re-epithelialized, about 14-21 days after vaccination. Steps should be taken in clinical use to reduce the risk of accidental infection of other sites in the vaccinated patient or of contact spread to other individuals.

4

How does ACAM2000 work?

The vaccine is made from a virus called vaccinia, which is a "pox"-type virus related to smallpox but causes milder disease. ACAM2000 cannot cause smallpox; it does not contain the smallpox virus, but rather the "live" vaccinia virus - not dead virus like many other vaccines. For this reason, attentively caring for the vaccination site is important to prevent the virus from spreading from the vaccination site to other parts of the body, or to other people.

ACAM2000 is administered differently than the typical "shot" associated with most vaccinations. A two-pronged stainless steel (or bifurcated) needle is dipped into the vaccine solution and the skin is pricked several times in the upper arm with a droplet of the vaccine. The virus begins growing at the injection site causing a localized infection or "pock" to form. A red, itchy sore spot at the site of the vaccination within 3-4 days is an indicator that the vaccination was successful; that is, there is "a take." A blister develops at the vaccination site and then dries up forming a scab that falls off in the third week, leaving a small scar. The vaccine stimulates a person's immune system to develop antibodies and cells in the blood and elsewhere that can then help the body fight off a real smallpox infection if exposure to smallpox ever occurs.

WARNING:
See full prescribing information for complete boxed warning

- Myocarditis and pericarditis (suspect cases observed at a rate of 5.7 per 1000 primary vaccinees (95% CI: 1.9-13.3)), encephalitis, encephalomyelitis, encephalopathy, progressive vaccinia, generalized vaccinia, severe vaccinia skin infections, erythema multiforme major (including STEVENS-JOHNSON SYNDROME), eczema vaccinatum resulting in permanent sequelae or death, ocular complications, blindness and fetal death, have occurred following either primary vaccination or revaccination with live vaccinia virus smallpox vaccines. These risks are increased in certain individuals and may result in severe disability, permanent neurological sequelae and/or death [see Warnings and Precautions (5)].

- These risks are increased in vaccinees with the following conditions and may result in severe disability, permanent neurological sequelae and/or death:
 - Cardiac disease or a history of cardiac disease
 - Eye disease treated with topical steroids
 - Congenital or acquired immune deficiency disorders, including those taking immunosuppressive medications
 - Eczema and persons with a history of eczema or other acute or chronic exfoliative skin conditions
 - Infants less than 12 months of age
 - Pregnancy

ACAM2000 is a live vaccinia virus that can be transmitted to persons who have close contact with the vaccinee and the risks in contacts are the same as those for the vaccinee.

Oh yeah and don't touch it!

2.2 Preparation / Handling Precautions and Instructions for Disposal
Personnel preparing and administering the vaccine should wear surgical or protective gloves and avoid contact of vaccine with skin, eyes or mucous membranes.

The monkeypox "vaccine" is live vaccinia and it creates a contagious lesion, for about 2 weeks until it crusts over, and it's contagious for even healthy un-Vax'd persons so this will spread monkeypox like wildfire. you could even get it off skin contact but also off of public surfaces, and the previously CV19-Vax'd persons will get it far more easily since their immunity is shot, but everyone can. And then people will run around getting MORE monkeypox "vaccines" and it will just run through the population like wildfire, oozy painful (like a "blowtorch on the skin") crusty lesions everywhere, and these can scar and cause blindness, too. They will CREATE a new publicly visible MPX crisis, as Bill Gates giggled about. In healthy people who did not trash their T-cell immunity with the CV19 shot, it can run its course, but it would still be a health 2 weeks. For immunocompromised it results in inflamed nerves and Stevens Johnson and death.

31 Vaccine clot lab tests reveal shocking accumulation of Conductive Metals

32 We are now releasing ICP-MS lab test results that compare the elemental composition of
33 human blood to the elemental composition of a clot sample taken from the body of a
34 person who received a covid vaccination and then subsequently died.

35 So far, over 12 billion covid vaccine doses have been administered worldwide. Over 600
36 million doses have been administered in the United States, and Kirsch estimates that
37 600,000 Americans have likely already been killed by covid vaccines in the USA alone.

38 These deaths appear to be largely caused by these mysterious self-assembling clots which
39 are clogging blood vessels and arteries.

40 We have completed our laboratory analysis of these clots and are releasing the results
41 publicly today.

55 **Covid vaccine trials led to birth defects and terminated pregnancies, FOIA requests show**

QUOTE

(Natural News) Another round of Freedom of Information Act (FOIA) requests has been filled, this time for Moderna’s Wuhan coronavirus (Covid-19) “vaccine,” revealing that the mRNA (messenger RNA) shot causes birth defects and spontaneous abortions in pregnant women.

Towards the end of the 699-page document release in the toxicology section, it is stated that mRNA-1273, as the company calls the drug, lead to “significant increases in the number of F1 rats with 1 or more wavy ribs and 1 or more rib nodules.”

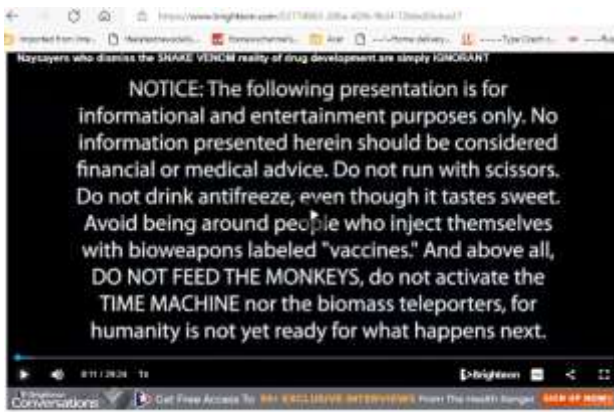

“Wavy ribs appeared in 6 fetuses and 4 litters with a fetal prevalence of 4.03% and a litter prevalence of 18.2%,” the section continues. “Rib nodules appeared in 5 of those 6 fetuses.” (Related: Pfizer’s covid injection is also linked to birth defects and infertility.)

While Moderna acknowledges the connection between these changes and its drug, the company claims that the structural changes observed in the bone structure of test rats “do not impact development or function of a developing embryo.”

“Maternal toxicity in the form of clinical observations was observed for 5 days following the last dose ([gestation day] 13), correlating with the most sensitive period for rib development in rats (GDs 14 to 17),” the company says.

All of this directly contradicts the Food and Drug Administration (FDA), which in its authorization for “Spikevax,” another name for the Moderna shot, claimed that there was “no vaccine-related fetal malformations or variations and no adverse effect on postnatal development.”

7 An Italian man has been diagnosed with HIV, Covid-19, and monkeypox
8 simultaneously – the first known case of the concurrence of these three viral
9 diseases, the Journal of Infection has reported.

10 According to an article published by the medical outlet last Friday, the 36-year-
11 old male spent five days in Spain in June this year, developing a fever
12 accompanied by a sore throat, fatigue, and a headache nine days later. A
13 subsequent test yielded a positive result for Covid-19. To make matters worse, a
14 rash appeared on the patient’s left arm soon thereafter, with small, painful
15 vesicles spreading across the man’s body in the following days.

16 The man sought medical help and was hospitalized in an infectious diseases unit.
17 The patient told doctors that he had had “*condomless intercourse with*
18 *men*” during his sojourn in Spain.

19 Taking into account the appearance of pustules indicative of monkeypox,
20 samples of the liquid contained in the vesicles were sent to be tested for the virus
21 and came back positive as well.

Bhattacharya noted that we have had “enormous Covid deaths despite the lockdowns.” While lockdown proponents may argue that this is because the lockdowns were not strong enough, Bhattacharya insists that reality is a constraint on their model and that in the real world “society could not meet their high standard of what a lockdown ought to look like.” Bhattacharya concluded his interview with the idea that we have two futures before us: a dystopian one filled with lockdowns where humanity is much impoverished by such efforts, or another in which we recognize that the disease is something that is realistically here to stay and that we will learn to cope with. The bottom line, Bhattacharya hopes, is that “once people realize that we cannot achieve elimination of the disease, they can remember what is important.”

Despite the foregoing, vaxx zealots love them some Paxlovid, almost as much as the gene therapy itself. But thousands of people are complaining about the drug leaving a nasty aftertaste in their mouths. The descriptions are far and wide, from “licking a garbage disposal” to “sun-baked trash bag liquid.” But the most common theme with all of said descriptions is that most people had some sort of metallic taste in their mouths after taking Paxlovid.

1
2 [Mainstream media](#) are calling this phenomenon “[Paxlovid mouth](#).” This blogger is not a
3 scientist, and did not stay at a Holiday Inn Express last night. But typically if something
4 tastes metallic, that means it is metallic, or has metallic properties. Many Novavax
5 recipients have also reported a [metallic taste in their throats](#) after the injections. Further,
6 Japan suspended use of the Moderna mRNA injections last September after the country’s
7 health ministry found “[metallic particles](#)” in the gene therapy liquid.

10
11 Who knows what exactly causes the post-Paxlovid metallic taste. All we know for certain
12 is that Pfizer posted his [largest quarterly sales numbers in the company’s history](#) for Q2
13 2022, which included \$8.1 billion in Paxlovid sales. Thus millions of people continue
14 putting both Pfizer poisons into their bodies despite all the available information about
15 both.

16 Paxlovid will continue making billions as mainstream media continue its “long COVID”
17 propaganda and touting the drug as the only possible treatment.

23 Is any food safe anymore?

24 We just wrote last week that it’s best for everyone to eliminate all processed foods from
 25 their diets since we have no idea what is actually in said foods. And now one of the largest
 26 candy manufacturers in the world is facing a class action lawsuit for allegedly selling
 27 poisonous products.

28 Mars, Inc. was founded in 1911. It is based in McLean, Virginia and owned by the Mars
 29 family, which is the [third-richest in the United States](#) behind the Walton (Walmart) and
 30 Koch families. Mars, Inc. is best known for its signature products: Snickers, Twix, and
 31 Milky Way candy bars, along with M&M’s and Skittles. The latter is the subject of a
 32 federal lawsuit filed in Northern District of California on July 15.

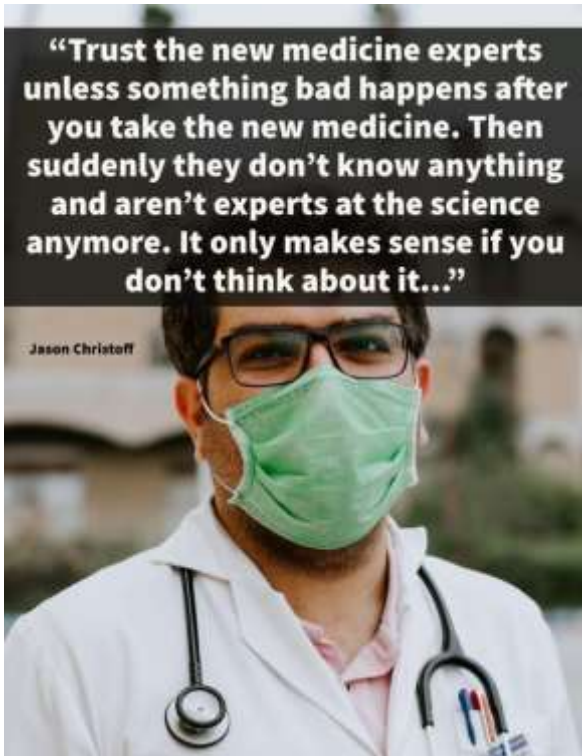

33 Mr. Jenile Thames is a resident of San Leandro, California. He purchased a pack of Skittles
 34 on April 11, 2022. Mr. Thames alleges that Mars is committing fraud because the Skittles
 35 label says that the product is safe for human consumption. But Skittles uses a chemical
 36 compound called titanium dioxide (TiO₂) to give the candy its signature rainbow colors.

37
 38 TiO₂ “can cause inflammation, pulmonary damage, fibrosis, and lung tumors and they are
 39 possibly carcinogenic to humans,” according to a 2014 study [published in the Journal of](#)
 40 [Food and Drug Analysis](#). There are also [several studies](#) that observed [genotoxic](#)
 41 [activity](#) with TiO₂ – meaning it [changes and/or damages human DNA](#).

42 France [banned TiO₂ as a food additive](#) in January 2020. The European Food Safety
 43 Authority (EFSA) [declared in 2021](#) that TiO₂ “can no longer be considered safe as a food
 44 additive.” A full ban of TiO₂ in the European Union [went into effect on Sunday](#). But Mars
 45 still uses the additive for products distributed in the United States.

1 The eight-count class action lawsuit seeks compensatory, statutory, punitive and other
 2 damages for pretty much any American who can prove they purchased and consumed
 3 Skittles in the past year. [Read the full lawsuit here.](#)

 7
 8 One also may ask why the Chief Health Officer/Chief Medical Officer doesn't step min, well as
 9 we saw with Brett Sutton in Victoria he wanted to play the "donut" game as like Premier of
 10 Victoria Daniel Andrews, and couldn't even manage to provide any scientific data to justify his
 11 (unconstitutional) mandates such as for

- 12
- 13 • Mask
 - 14 • Social distancing
 - 15 • Lockdown
 - 16 • Lockout
 - 17 • Curfew
 - 18 • QR code
 - 19 • Social distancing
 - 20 • Etc, etc.

21 Remember the **RING OF STEEL** around Melbourne, and that to contain COVID-19?

22 OK, let look at what COVID-19 really is about. The scientific data indicates it is nothing but
 23 INFLUENZA. The scientific date also indicates, mind you already from 1918 onwards, that
 24 INFLUENZA is **NOT** an infectious disease.

25 The scientific data also indicates that what is referred to as COVID-19 but really is
 26 INFLUENZA is aerosol spread.

27 Now, what common sense does it make to have police all around Melbourne as some **RING OF**
 28 **STEEL** to prevent people moving about when in real terms aerosol is what is the culprit.

29 Just consider all the monies wasted on having police blocking Victorians to travel about when in
 30 reality it is all about aerosol?

1 Yes, we can remember all those people employed to clean steel poles, street benches, etc, against
 2 COVID-19, when reality if there was a “virus” which I understand has not even now been
 3 proven to exist, but is more a FICTION of the mind for those sheeple who will join some
 4 “COVID death cult” and what was the competence of the Chief Health Officer and/or the
 5 Minister for health to even grasp the basic understanding that it was all baloney? Well it seems to
 6 me they are brain dead and still are on the same bandwagon and even claim that the jobs
 7 protected them despite having become ill when I without using any mask and without worrying
 8 about moving about, etc, have not fallen ill!

9 In the process all that money that was squandered could have been better used to improve
 10 medical services, etc.

11 We had to “**flatten the curve**” to avoid “**overwhelming the hospitals**”, and yet nearly 3 years
 12 on we have hospitals overwhelmed because of the gross incompetence of the Chief Health
 13 Officer and/or the Minister for Health.

14 What is needed, and was needed, was competent management but that is precisely missing.
 15

16 Look at the then Minister for Health Daniel Andrews in 2003 presenting a *Safe Drinking Water*
 17 *Bill* to the Parliament which subsequently was provided with Royal Assent to create the *Safe*
 18 *Drinking Water Act* that every Victorian is entitled to safe drinking water. Now as Premier for
 19 more than a decade he still blatantly ignored to ensure this eventuated as there are still after more
 20 than 19 years large parts of the Mallee that are without Safe Drinking Water. And our current
 21 Minister for Health for so far I am aware of has not done anything to ensure Safe Drinking Water
 22 is provided to all Victorians. And this may underline that what falls of the lips of a politician
 23 versus what they really are competent to perform can be stark opposites. And now those same
 24 grossly incompetent politicians will employ every twist and turn to blame the opposition parties
 25 for their own gross mismanagement, even if those opposition parties had no part in it. Then
 26 again, when they get into power they definitely likely will do the same song and dance.

27 Remember how Anthony Albanese in Federal Parliament went on and on about ICAC, well one
 28 would have expected it would have been the first business after the election. Well don't hold
 29 your breath because you may not survive the waiting time as it may never come! In my view we
 30 merely have another gangster with a different name that is all folks!

31
 32 HANSARD 4-3-1891 Constitution Convention Debates

33 **QUOTE Sir HENRY PARKES:**

34 The resolutions conclude:

35 **An executive, consisting of a governor-general, and such persons as may from time to time be**
 36 **appointed as his advisers, such persons sitting in Parliament, and whose term of office shall depend**
 37 **upon their possessing the confidence of the house of representatives expressed by the support of the**
 38 **majority.**

39 What is meant by that is simply to call into existence a ministry to conduct the affairs of the new nation as
 40 similar as it can be to the ministry of England-a body of constitutional advisers who shall stand as nearly as
 41 possible in the same relation to the representative of the Crown here [start page 27] a her Majesty's imperial
 42 advisers stand in relation to the Crown directly. These, then, are the principles which my resolutions seek to
 43 lay down as a foundation, as I have already stated, for the new super structure, my object being to invite other
 44 gentlemen to work upon this foundation so as to best advance the ends we have in view.

45 **END QUOTE**

46
 47 The same applies for the States/Territories that Ministers are to be “constitutional advisers”!

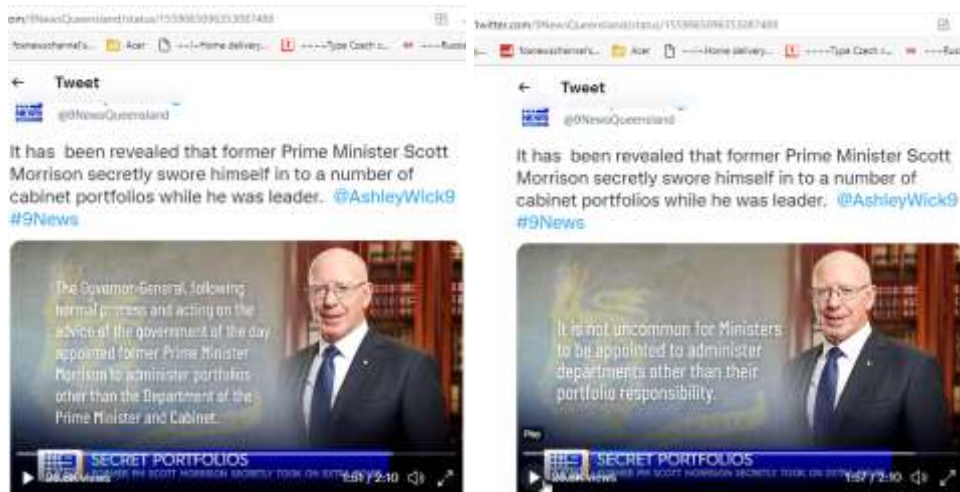

48
 49 Firstly, if they are to be “constitutional advisers” then not a person should be appointed as a
 50 Minister for State not having passed an examination on knowledge of constitutional legal
 51 principles embedded in the constitution.
 52

1 Secondly, we need Ministers who have had some basic training in what the relevant portfolio is
2 about. He doesn't have to be an expert but has to have some reasonable knowledge what it is
3 about, as after all how could a Minister evaluate any advice given to him if he lacks any basic
4 understanding what it is about?

5
6 Further, the total amount of all allowances for any Member of Parliament must not exceed the
7 yearly average weekly income of the jurisdiction he/she is living in. That means a Member of
8 State Parliament maximum yearly allowance can be no more than the average income of wage
9 earners of that State. For the Federal Member of Parliament it will be the yearly average income
10 of the Whole of the Commonwealth. This then would give an incentive to any Member of
11 Parliament to pursue the increase of average weekly income of wage earners.

12
13 No more nonsense of charging for overnight accommodation when say sleeping in the shed of
14 another Member of Parliament. Any overnight accommodation must be at a registered
15 accommodation facility!

16
17 Members of Parliament which are Ministers are not entitled to also claim "allowances" ordinary
18 provided to members of parliament not being a Minister.
19

20
21

22
23

24 It appears to me we got a Governor-General who seem to lack to understand that a "prerogative"
25 decision to appoint a Minister must include to have the document published in the Gazette as to
26 be effective.

1 Hence, I cannot accept that the article Bizarre, audacious but constitutionally valid” reflect
2 whatsoever the real application of the constitution.

3
4 Only one Minister can exist for one particular portfolio/Department. No such thing as “assistant
5 Minister’ because only one person can be held the “*responsible* Minister” to answer to the lower
6 House. The absurdity was shown where Scott Morrison PM had not one but 2 “assistant
7 Ministers” and yet he ventured out to “secretly” purportedly get another 5 appointments to
8 Ministries which already had each a “*responsible* Minister”, which I view sole purpose was to
9 misuse and abuse the powers to implement the NEW WORLD ORDER in violation of our
10 constitutional principles. As such I view it was **TREASON!**

11
12 In my view what might be a better way to pursue is that we take stock of the number of hospital
13 facilities currently existing versus the number of population and work out what shortage
14 currently exist.

15
16 As such X (number of population) divided by Y (number of hospital facilities existing). Then
17 calculate the current shortages and then modify the calculation with an increase to have an end
18 result as to what it ought to be.

19 Once you have this formula then as population increase you then percentage wise increase the
20 number of hospital facilities.

21 Once you have such a basic system in place that the number of hospital facilities is based number
22 of population then it might be easier to maintain this ratio, and at times merely make minor
23 adjustments. The same with other medical services and ambulances, etc.

13
14 While for example the State Government might claim there was a considerable increase in
15 funding for Health, reality is that most likely tens of millions of dollars were syphoned off
16 towards paying for media fearmongering about **“Do it for your grandmother”** a mantra that
17 was as I understand it used by the CDC propaganda arm for promoting pharmaceutical items and
18 nothing to do with protecting anyone. After all, if INFLUENZA is spread by aerosol and no
19 known mask currently is provided to the general population to protect against such aerosol then I
20 view a competent Minister for Health and/or Chief Health Officer would have pushed for
21 providing appropriate mask against this aerosol, for so far it is even possible to protect against
22 this kind of aerosol.

23
24 In my view the Minister for Health and the Chief Medical Officer must be so to say given the

33
34
35 You simply cannot make this stuff up. Last month, we wrote about the newest mainstream
36 media propaganda campaign at the time. Sleeping upright in chairs causes blood clots and
37 potential death, according to the propagandists. We [wrote the following](#):

1 ***“...it appears the purpose of this article is to prepare people for an influx in dead, fully-***
 2 ***vaccinated airplane passengers, bus passengers, etc. who fall asleep during long trips***
 3 ***and never wake up.”***

4 And now we have an actual case study.

5 Mrs. Helen Rhodes was a 46-year-old wife and mother of two. She and her family had
 6 been living in Hong Kong for 15 years, where she worked as a midwife and owned a
 7 custom clothing business. The Rhodes family decided to move back to their native U.K. to
 8 start a new chapter in life, according to the *Independent*. Mr. Simon Rhodes, Helen and the
 9 two kids, boarded a plane in Hong Kong en route to Frankfurt. The 12-hour flight was their
 10 connector to London.

11 About three hours into the flight, Mr. Rhodes noticed something was wrong. His wife
 12 wasn't just sleeping. She was not breathing. Resuscitation effort failed. [Mrs. Rhodes was](#)
 13 [dead](#). But it gets worse. Apparently large planes like that, which are able to fly 12 hours
 14 without re-fueling, have no protocols in place when something like that happens,
 15 particularly in this age of vaccine genocide. Thus Mr. Rhodes' dead body laid lifeless in
 16 her seat for the next eight hours, [right next to her two young kids and husband](#). Mrs.
 17 Rhodes' body remained in Frankfurt, while the rest of the family continued on to the U.K.

18 A [GoFundMe page](#) is collecting funds for Mr. Rhodes and the kid.

19 **END QUOTE**

20 Again:

21 Apparently large planes like that, which are able to fly 12 hours without re-fueling, have
 22 no protocols in place when something like that happens, particularly in this age of vaccine
 23 genocide.
 24

25 Well, competent Minister for Aviation should ensure that as like any ship on the seas the (air)
 26 ships (planes) also are appropriately regulated in that regard.
 27

28 Now let us consider race issues.
 29

30 Typically we got Anthony Albanese to drive the W.E.F. hate between races as so much has also
 31 eventuated in the U.S.A. suiting the W.E.F. **NEW WORLD ORDER** agenda.

32 When we had the Bourke Street massacre I actually then about 6 months earlier and even a
 33 month earlier warned about (yes specifically mentioned Bourke Street Mall) to be targeted for
 34 mass murder. Neither then Prime Minister Malcolm Turnbull and/or Premier Daniel Andrews
 35 bothered to take protective action, but after the mass murder both were there for photo
 36 opportunities claim to care not revealing they could have avoided it. And even today as I write I
 37 understand that still a mass murder can be repeated! After all when people are slaughtered for the
 38 common good of politicians being able to have special photo opportunities then why avoid such
 39 slaughter?

The following article also may be considered regarding the **TERRORISM** inflicted by the Victorian Government upon Victorians! What we have witnessed is also a breakdown of the administration of justice where the Courts instead of enforcing the legal principles embedded in the constitution simply so to say betrayed their own laid up duties and by this denied Victorians their constitutional and other legal, humanitarian, common law rights.

U.S. Marines Win Class Protection from Shot Mandate

QUOTE

“When Congress acts to preserve liberty, especially a liberty historically and constitutionally fundamental to the United States, the courts — the intended preserve of liberty — must not evade or equivocate, must not, so to speak, sacrifice the fundamental right of thousands of privates to Free Exercise in order to gratify the preference of a few generals.”

QUOTE

1 The Marine Corps repeatedly asserts, ‘The Supreme Court has made clear: ‘Judges are not
 2 given the task of running the Army,’ a quote from *Orloff v. Willoughby*, 345 U.S. 83, 93
 3 (1953), a dispute resolved forty years before the enactment of RFRA. Although certainly
 4 not ‘given the task of running the Army,’ the courts in the narrow instance of RFRA are
 5 assigned to, and entrusted to, ensure that those who run the Marine Corps (and the military
 6 in general and every other component of the federal government) conform their actions to
 7 the governing law, to RFRA, to which the admirals and the generals and the commandants
 8 are unquestionably subordinate — just like the President, the Speaker of the House, the
 9 Chief Justice, and every other person in the federal government. To repeat: Yes, Congress
 10 and the President, not the courts, govern the military. But Congress and the President in
 11 governing the military and by enacting RFRA have established — for the narrow category
 12 of Free Exercise — an action and a remedy in the district court, have specified and placed
 13 the burden of proof on the military, and have allowed for an ‘appropriate remedy’ to ensure
 14 a service member’s Free Exercise. That conclusion is not fairly contestable, and the
 15 military must acquiesce to the command of Congress and the President in that respect. A
 16 service member can sue in a district court to enjoin a violation of RFRA. And the pursuit
 17 of relief from a systemic deprivation of Free Exercise, preserved and protected by RFRA,
 18 presents a claim uniquely susceptible to resolution in the district court. This order and this
 19 action will proceed accordingly.”

Aren't we really looking forwards to driving electric vehicles so we too can be if we are lucky stranded at the side of the road hopefully without the vehicle being on fire!
Now that many States in Europe are reverting back to nuclear power, coal and wood burning Greta Thunberg appears to have politicians back turn to her.

Greta Thunberg Cult Has Gone 'Bust': Sky News

BY TYLER DURDEN

WEDNESDAY, AUG 24, 2022 - 07:15 PM

Greta Thunberg's guilt-trip climate shame tour appears to have hit the wall, as green pipe dreams with zero practical solutions meet the realities of, well, reality.

HOW DARE YOU!

Or, as *Sky News* Australia's Andrew Bolt puts it; "A mere child, full of rage, obsessed with doom, totally devoid of any practical solutions – but **here she was lecturing the world on how to fuel their 21st century economies.**"

Over the past year, Thunberg's movement - described by Bolt as a "cult" - has **fizzled out.** "Thunberg is now a victim of her own success in scaring people into doing very, very stupid things that we're now paying for."
