Re: 20230630-Mr G. H. Schorel-Hlavka O.W.B. to President Dr Micheal Gannon.MDA National

NOT RESTRICTED FOR PUBLICATION

Sir,

I understand that MDA National awarded a \$10,000 award to Peter Doherty Institute regarding the alleged discovery of the SARS-CoV-2 virus sequence.

I must make clear I am neither trained as a medical doctor or a scientist, my research was because of Olga, my 90 year old wife suffering from heart failure and other comorbidity and so since January 2020 I have been trying to research what this covid was all about, as to protect my wife in the best manner.

I am a constitutionalist and a retired Professional Advocate which assist me in my research.

In 2001 and in 2004 I challenged the constitutional validity of “compulsory” part of voting representing myself I defeated the Commonwealth in *AEC v Schorel-Hlavka* on 19 July 2006 in regard of both cases, this involving all 9 Attorney-Generals also. This may underline that when you so to say do your home work in research you may be able to defeat lots of opponents. My position is that the States/Territories have no constitutional powers, since 1908 to demand anyone to be jabbed against “man-kind” infectious diseases such as polio, measles, etc. Just consider the health insurance cost that could be likely avoided if many of those injections can be avoided. Where is the evidence they do work?

I on 29 June 2023 received an email from Dr Mercola and the entire contest can be downloaded from: <https://www.lewrockwell.com/2023/06/joseph-mercola/wuhan-scientist-thrown-off-roof/>
 However, I have quoted parts of it.

I understand that the award was that Peter Doherty Institute had allegedly discovered the SARS-CoV-2 sequence from a Chinese patient in Melbourne on about 24 January 2020, and then allegedly was able to:

2
3 However Dr Mercola's article (reproduce below in full) indicates:

4
5 <https://www.lewrockwell.com/2023/06/joseph-mercola/wuhan-scientist-thrown-off-roof/>

6 **Wuhan Scientist Thrown Off Roof**

7 By Dr. Joseph Mercola

8 [Mercola.com](https://www.mercola.com)

9 June 29, 2023

10 QUOTE

11 She left out some crucial facts, however. She made no mention of the miners who died
12 after getting infected at the collection site, nor did she mention that she'd found **eight**
13 **other SARS-related coronaviruses** from the same previously unknown family as
14 RaBtCoV/4991.

15 Early in the COVID pandemic, RaBtCoV/4991 was identified as the closest relative to
16 SARS-CoV-2, **but there were also eight others from that same family, the existence of**
17 **which has been kept secret.**

18 END QUOTE

19 And

20 QUOTE

21 **SARS-CoV-2 Linked to Bioweapons Research**

22 According to an investigation² by The Sunday Times' Jonathan Calvert and George
23 Arbuthnott published June 10, 2023, scientists at the WIV were working in close
24 collaboration with the Chinese military to create a new mutant coronavirus shortly before
25 the COVID pandemic began:

26 ***“Investigators who scrutinized top-secret intercepted communications and scientific***
27 ***research** believe Chinese scientists were running a covert project of dangerous*
28 *experiments, which caused a leak from the Wuhan Institute of Virology and started the*
29 *Covid-19 outbreak.*

30 END QUOTE

31 And

32 QUOTE

33 *One of the reasons there is no published information on such work, according to all three*
34 *investigators, is because the shadow project on the mine viruses at the Wuhan institute was*
35 *being funded by the Chinese military.”*

36 **Chinese Military Targeted Coronaviruses for Bioweapons Study**

37 The pair also cite a 2015 book written by People's Liberation Army researchers, published
38 by the Chinese military academy, which stated that SARS viruses represent a **“new era of**
39 **genetic weapons”** that can be “artificially manipulated into an emerging human disease
40 virus, then weaponized and unleashed.”

41 END QUOTE

42
43 This to me appears to mean that likely prior to the publication on about June 10, 2023 this **“top-**
44 **secret intercepted communications and scientific research”** appeared to be unknown to the
45 scientific world. Then how could Peter Doherty Institute **“and phylogenetic analysis indicated**
46 **the isolate exhibited greater than 99.99% sequence identity with other publicly available**
47 **SARS-CoV-2 genomes.”** There appeared to me no known additional pathogens from China that
48 was allegedly known until the 10 June 2023 publication. Therefore if nevertheless Peter Doherty
49 Institute claims they were publicly available this the demand clarification from what public
50 publication! If however Peter Doherty Institute was actually part of the gain-of-function team,
51 as I understand it may have been, then it may actually have relied upon “secret” information that
52 was not at all published. I understand, and have written about it, that Peter Doherty Institute was

1 also involkved with blood samples regarding gain-of-function with Ukraine and Georgia
2 laboratories.

3 You will find on my blog <https://www.scribd.com/inspectorkikati> ample of my writings about
4 this and also documents I reproduced in that regard. Those documents can be downloaded FREE
5 OF CHARGE, as i do not make any monies from it.

6 It has been disputed by **Dr Andrew Kaufman** (claiming it is exosomes) and many others that
7 this alleged SARS-CoV-2 actually never was isaolated and purified by the **Koch** postulate, this
8 even so I understand that Peter Doherty Institute may have initionally claimed to have done so
9 but may have withdrawn this claim later.

10
11 Obviously if actually the alleged SARS-CoV-2 virus was never isolated and purified according
12 to the **Koch** postulate then how could Peter Doherty Institute have obtained the sequence?

13 I as a non-scientist wonder if in fact it was something of a influenza sequence wrongly claimed
14 to be SARS-CoV-2 virus? Even the CDC (USA) makes clear that influenza and the alleged
15 SARS-Co-V-2 virus known as covid-19 are about identical.

16
17 I posted copies of numerous laboratories from around the world that none of them had islolated
18 and purified the alleged SARS-CoV-2 virus! I do not doubt that it was a work in progress as
19 intended to be created as I wrote about in my past writings.

41 QUOTE jrnyquist.blog/2019/09/11/the-secret-speech-of-general-chi-haotian/

42 *Posted on September 11, 2019*

43 The Secret Speech of General Chi Haotian

44 In 2005, **THE EPOCH TIMES** acquired a secret speech given by Defense Minister Chi
45 Haotian to high-level Communist Party Cadres sometime before his retirement in 2003.

46 Details given in Chi's speech coincide with previously unpublished defector testimony on
47 Sino-Russian military plans.

48 END QUOTE

49 And

50 QUOTE

51 **Only countries like the United States, Canada and Australia have the vast land to**
52 **serve our need for mass colonization.**

53 END QUOTE

1 And

2 QUOTE

3 **If we, the CCP, are finished, China will be finished, and the world will be finished**

4 END QUOTE

5 And

6 QUOTE

7 **Now, it seems like we are in the same critical period as the “horses were drinking**
 8 **water” in the Yangtze River days in the revolutionary era, as long as we resolve the**
 9 **United States problem at one blow, our domestic problems will all be readily solved.**
 10 **Therefore, our military battle preparation appears to aim at Taiwan but in fact is**
 11 **aimed at the United States, and the preparation is far beyond the scope of attacking**
 12 **aircraft carriers or satellites.**

13 END QUOTE

14 And

15 QUOTE

16 Conventional weapons such as fighters, canons, missiles and battleships won't do; neither
 17 will highly destructive weapons such as nuclear weapons. **We are not as foolish as to**
 18 **want to perish together with America by using nuclear weapons,** despite the fact that
 19 we have been exclaiming that we will have the Taiwan issue resolved at whatever cost.
 20 **Only by using non-destructive weapons that can kill many people will we be able to**
 21 **reserve America for ourselves. There has been rapid development of modern**
 22 **biological technology, and new bio-weapons have been invented one after another. Of**
 23 course, we have not been idle, in the past years we have seized the opportunity to master
 24 weapons of this kind. We are capable of achieving our purpose of “cleaning up” America
 25 all of a sudden.

26 END QUOTE

27 And

28 QUOTE

29 **From a humanitarian perspective, we should issue a warning to the American people**
 30 **and persuade them to leave America and leave the land they have lived in to the**
 31 **Chinese people. Or at least they should leave half of the United States to be China's**
 32 **colony, because America was first discovered by the Chinese. But would this work? If**
 33 **this strategy does not work, then there is only one choice left to us. That is, use**
 34 **decisive means to “clean up” America and reserve America for our use in a moment.**
 35 Our historical experience has proven that as long as we make it happen, nobody in the
 36 world can do anything about us. Furthermore, if the United States as the leader is gone,
 37 then other enemies have to surrender to us.
 38 **Biological weapons are unprecedented in their ruthlessness, but if the Americans do**
 39 **not die then the Chinese have to die. If the Chinese people are strapped to the present**
 40 **land, a total societal collapse is bound to take place. According to the computation of**
 41 **the author of Yellow Peril, more than half of the Chinese will die, and that figure**
 42 **would be more than 800 million people!**

43 END QUOTE

44 And

45 QUOTE

46 **If our biological weapons succeed in the surprise attack, the Chinese people will be**
 47 **able to keep their losses at a minimum in the fight against the United States.**

48 END QUOTE

49
 50 So we had this elaborate covid scam to scare the living daylight out of people around the
 51 world so they were willing to have a poison injection that slowly kills many. And the UN,
 52 WHO and W.E.F. are supporting this big time.

53 END QUOTE

1 END QUOTE [scribd.com/document/647082028/20230522-Mr-G-H-Schorel-Hlavka-O-W-B-to-Richard-Iron-](https://www.scribd.com/document/647082028/20230522-Mr-G-H-Schorel-Hlavka-O-W-B-to-Richard-Iron-CMG-OBE)
 2 CMG-OBE
 3

4 As I understand it, not being a scientist, you don't just throw whatever in some petri dish and
 5 then stake a claim having isolated and purified some alleged virus. You need to be able to prove
 6 this and in about 1918/1919 at Fort Detrick (USA) they tried something and didn't work to get
 7 others infected with influenza. Referred to as the Spanish Flu. I understand from a woman who
 8 wrote about her experiences with her parents and siblings that none of them were injected and
 9 didn't wear any mask while attending to the sick and dying and they survived. As I wrote
 10 extensively about that the mask wearing can cause numerous health problems. Also, in Mumbai
 11 slums (on video) mask were thrown on the carpet on the ground and later there was an outbreak
 12 of the BLACK DEATH. I then wrote to medical authorities in India highlighting what the
 13 BLACKDEATH in fact may have resulted from the soil mixed in the mask. Likewise, a nurse in
 14 the USA had her feet and fingers going black, having been compelled to wear a mask.
 15 Also, I understand that Bill Gates was using mosquito's to try to eradicate some illness in an
 16 Afrikan country but people start dying instead and so he was ordered to stop it. However, I
 17 understand mosquitos were released in Florida and India and well there CO-INCIDENTALLY
 18 happen there to be sudden outbreaks.
 19

20 **Dr Cameron** of the NYC hospital in early 2020 warned that using ventilators on patients that
 21 appeared to suffer from high altitude problems was to effectively kill the patients. And in China
 22 about 97% of patients put on ventilators died. It was to me remarkable that AstraZeneca in fact
 23 engaged 2 Malaria scientist to create an anti covid vaccine. I understand that Malaria can result
 24 in High Altitude Fever.

25 The documents published on my blog will show extensive researched set outs.
 26

27 Gtting back to Peter Doherty Institute if it did claim it had isolated and purified according to the
 28 **Koch** postulate SARS-CoV-2 virus then well they should be able to repeat the same. By
 29 obtaining the alleged virus from an infected person and then having isolated and purified it then
 30 inject it in to a healthy person.

31 My concern is that the Peter Doherty Institute may have been awared something that may have
 32 not been appropriate and by this possibly denied another person to have it being awarded. The
 33 award then may not achieve real scientific work but possible questionable scientific work.

34 My concern is that Peter Doherty Institute was involved in too many issues, including advising
 35 the government and this may also have created an implied bias.
 36

37 Having been a quality control officer, also managring factories and being a constitutionalist and
 38 a retired Professional Advocate to mme alarm bells were so to say ringing from the start and I at
 39 no time wore a mask and neither my wife or I had been jabbed with the "gene therapy"
 40 bioweapon. Neither one of us had an influenza injection for the last 50 years! And when my GP
 41 recently asked me about having an influenza vaccination my response was, as I recall: I didn't
 42 have one for 50 years and that is why I am healthy.
 43

44 I one used to be a registered insurance agent and understand that insurance companies need to be
 45 able to keep premiums low as much as possible while catering for its members appropriately. If
 46 then there is a sudden increase in claims because some government made incompetent decisions
 47 causing long term health issues then I view the Government must be held accountable for this, in
 48 particular where as I extensively wrote about the States/Territories had no constitutional powers
 49 to apply mandates.
 50

51 I may point out that to my knowledge **mjainsight** did not respond to me.
 52

10 Sir/Madam,

12 I refer to your article

14 <https://www.mja.com.au/journal/2021/first-isolation-sars-cov-2-outside-china-wins-national-research-prize>

16 **First isolation of SARS-CoV-2 outside China wins national research prize**

18 Regarding:

20 **2020 MJA/MDA National Prize for Excellence in Medical Research, Peter Doherty
21 Institute**

23 I submitted my wife Olga (then 87 year) on 10 October 2019 to Austin Hospital, Heidelberg,
24 Victoria, Australia as while a specialist had cleared her on 2 October 2019 nevertheless I with no
25 scientific or medial training held Olga needed urgent medical assistance. The doctor gave me the
26 understanding that had I waited a few hours Olga likely would have been dead. She was found to
27 have heart failure, liquid in her lungs, and other comorbidity. So Olga ended up in ICU and
28 spend 10 days in hospital.

29 SARS-CoV-2(COVID-19) was not then a common word but had it been it would have likely
30 been claimed to be COVID-129. This even so SARSCoV2 actually ALLEGEDLY already
31 existed way back in 2006!

41 **Associated Data**

42 QUOTE

43 Because most commercial armored RNA preparations contain exogenous sequences of
44 <500 nucleotides (9), separate armored RNA species are often prepared for calibration of
45 each target in multiple virus assays. To reduce costs and simplify multivirus detection, we
46 are seeking to produce a single chimeric armored RNA species that might be used as a
47 positive control for multiple viral targets. We consider this task to be feasible because the
48 inventors of armored RNA predicted that, theoretically, at least 2 kb of nonbacteriophage
49 RNA sequence might be encapsulated (8). As proof of this principle, we tried to directly
50 package a 1200-nucleotide-long foreign RNA sequence containing gene fragments of

1 hepatitis C virus (HCV), HIV-1, severe acute respiratory syndrome coronavirus 1 (SARS-
2 CoV1), and SARS-CoV2 into the original armored RNA production vector pAR-1 (8).

3 END QUOTE

4
5 As I indicated I am not trained in science or medical issues but reading through your published
6 statement it seems odd, indeed very odd, that it refers to the PCR test which the inventor had
7 made clear was NOT a diagnostic tool.

8 Because of the risk to my wife (she is now 90) I held it my obligation to research details and my
9 blog at <https://www.scribd.com/inspectorrkati> raises numerous issues. I watched numerous
10 videos such as by NZ **Dr Sam Baily**, **Dr Andrew Kaufman** and others and understood that
11 when you claim to have isolated and purified some alleged virus then you need to prove it
12 actually is a “virus” and not merely some pre-conceived conclusion.

13
14 The Epoch times April 20-28, 2023 has an article “The Salt Controversy” and in it the author
15 indicated that:

16 “The researches found that report authors were 50 percent more likely to cite papers that
17 reflected their point of view, whether they believed that salt reduction was beneficial or
18 not. Moreover, just a few prolific researches produced most of the work in the field and
19 seemed to be unaffected by the work of researched who came to a different conclusion.”
20

21 It is therefore reasonable to question the claims by Peter Doherty Institute if it indeed did follow
22 the **Koch** postulate!

23 Therefore If this 58 year old person was the first person to have been found to have SARS-CoV-
24 2 (covid-19) then did Peter Doherty Institute having isolated and purified the alleged virus then
25 having established another person not having this alleged virus inject this second person and then
26 establish if this second person then ended up with precisely the same alleged SARS-CoV-2
27 (COVID-19) virus?
28

29 I understand that blood samples taken in Italy way back in about August 2019 turned out to be
30 claimed to be COVID-19. Then again there are claims that the ‘long covid’ really is ‘long
31 influenza’!
32

33 Neither my wife or myself had any influenza jabs for the last 50 years, and neither wore a mask
34 and neither had any so called covid jabs! Yet, despite going around and I may state unafraid
35 amongst others I had no ill health. My wife continue to have the same kind of health issues she
36 had for decades.
37

38 I also noted the statement: (RED COLOUR AND UNDERLINING ADDED)

39 QUOTE

40 RESEARCH which isolated and sequenced the 2019 novel coronavirus (SARS-CoV-2)
41 from the first patient diagnosed with COVID-19 in Australia, and then shared its results
42 with the world within 24 hours, is the winner of the 2020 MJA/MDA National Prize for
43 Excellence in Medical Research.

44 The prize, sponsored by [MDA National](#), awards \$10 000 to the authors of the best research
45 article published in the Medical Journal of Australia in the previous calendar year.

46 The research aimed to describe the first isolation and sequencing of SARS-CoV-2 in
47 Australia and rapid sharing of the isolate. SARS-CoV-2 was isolated from a 58-year-old
48 man from Wuhan, China who arrived in Melbourne on 19 January 2020 and was admitted
49 to the Monash Medical Centre, Melbourne, from the emergency department on 24
50 January 2020 with fever, cough, and progressive dyspnoea.

1 QUOTE

2 **Whole genome sequencing of the viral isolate and phylogenetic analysis indicated the**
 3 **isolate exhibited greater than 99.99% sequence identity with other publicly available**
 4 **SARS-CoV-2 genomes.**

5 END QUOTE

6
 7 Would it be too much to ask where it was “**sequence identity with other publicly available**
 8 **SARS-CoV-2 genomes.**” As so far I am aware, video of scientist in January 2020 claimed that
 9 they used the sequence of China to create within 2 days the so called “gene therapy” named
 10 covid vaccine?

11
 12 It is like the chicken and the egg, which came first?

13
 14 And, what sequence was ever proved to be FACTUAL as while computer generated sequences
 15 might be used such as in research to seek to get to a certain gain-of-function patho0gen or to just
 16 created a specific poisonous alleged vaccine that really is designed to ensure the USA DoD
 17 Deagel **DEPOPULATION** goal is achieved, we may however expect that a reputable medical
 18 science publication will at the very least demand that there is reliable evidence that other
 19 scientist were able to check as being bona fide, that indeed not only the alleged SARS-CoV-2
 20 virus (COVID-19) was isolated and purified but as per *Koch* postulate a person diagnosed not to
 21 have this alleged SARS-CoV-2 virus (COVID-19) and then having been injected with the
 22 alleged isolated/purified SARS-CoV-2 virus (COVID-19) ended up as like Patient 1!

23
 24 I may have missed it but nothing in the publication appears to indicate that a second person had
 25 been actually “infected” using the *Koch* postulate process.

26
 27 I understand that the so called 1918 “influenza” originally came from Ford Detrick but became
 28 known as the “Spanish Flu” because the media there were the once publishing about it. However
 29 numerous test in Fort Detrick proved that you could not infect another person.

30
 31 If the \$10,000 award by hindsight was wrongly awarded to Peter Doherty Institute then I view it
 32 should be reconsidered who really would have been entitled to the award and so the \$10,000
 33 prize.

34
 35 If China did release their alleged sequence about 26 January 2020 and Peter Instituted did so on
 36 about 25 January 2020 then what possible publicly available sequence could Peter Doherty
 37 Institute have compared their claim with?

38
 39 Obviously I at least consider this a very serious issue that Peter Doherty Institute made a claim
 40 which to me (acknowledging not to have any scientific or medical training) seems to be B.S.
 41 because it doesn’t show any procedure required to establish that the alleged SARS-CoV-2 virus
 42 actually was replicated into another person using the *Koch* postulate process.

43 Because as I understand it governments and others relied upon the Peter Doherty Institute claim
 44 it in my view may have in the long run caused untold harm causing many victims and also many
 45 people dying, where the claim was that the so called vaccines would prevent
 46 infection/transmission of SARS-CoV-2 (COVID-19) where in reality it in my view never was
 47 proven to exist.

48
 49 I can go to a children playground and find a tire in use by children. This doesn’t prove a bit that
 50 therefore those children are driving a motor vehicle, as the tire may simply be hanging of a rope
 51 for the children to play with. That may explain essentially what the inventor of the PCR test
 52 made clear, it is not a diagnostic tool at all. And the PCR test I understand was based upon the

19 QUOTE

20
21 *Posted on September 11, 2019*

22 **The Secret Speech of General Chi Haotian**

23 In 2005, **THE EPOCH TIMES** acquired a secret speech given by Defense Minister Chi
24 Haotian to high-level Communist Party Cadres sometime before his retirement in 2003.

25 Details given in Chi's speech coincide with previously unpublished defector testimony on
26 Sino-Russian military plans.

27 The speech follows:

28 Comrades,

29 I'm very excited today, because the large-scale online survey sina.com that was done for us
30 showed that our next generation is quite promising and our party's cause will be carried on.
31 In answering the question, "Will you shoot at women, children and prisoners of war," more
32 than 80 percent of the respondents answered in the affirmative, exceeding by far our
33 expectations.

34 Today I'd like to focus on why we asked sina.com to conduct this online survey among our
35 people. My speech today is a sequel to my speech last time, during which I started with a
36 discussion of the issue of the three islands, [where I] mentioned that 20 years of the idyllic
37 theme of "peace and development" had come to an end, and concluded that modernization
38 under the saber is the only option for China's next phase. I also mention we have a vital
39 stake overseas. Today, I'll speak more specifically on these two issues.

40 The central issue of this survey appears to be whether one should shoot at women, children
41 and prisoners of war, but its real significance goes far beyond that. Ostensibly, our
42 intention is mainly to figure out what the Chinese people's attitude toward war is: If these
43 future soldiers do not hesitate to kill even non-combatants, they'll naturally be doubly
44 ready and ruthless in killing combatants. Therefore, the responses to the survey questions
45 may reflect the general attitude people have towards war.

46 Actually, however, this is not our genuine intention. The purpose of the CCP Central
47 Committee in conducting this survey is to probe people's minds. We wanted to know: If
48 China's global development will necessitate massive deaths in enemy countries, will our
49 people endorse that scenario? Will they be for or against it?

1 As everybody knows, the essence of Comrade Xiaoping's thinking is "development is the
2 hard truth." And Comrade Jintao, has also pointed out repeatedly and emphatically that
3 "development is our top priority," which should not be neglected for even a moment. But
4 many comrades tend to understand "development" in its narrow sense, assuming it to be
5 limited to domestic development. The fact is, our "development" refers to the great
6 revitalization of the Chinese nation, which, of course, is not limited to the land we have
7 now but also includes the whole world.

8 Why do I put it this way?

9 Both Comrade Liu Huaqing, one of the leaders of the old generation in our Party, and
10 Comrade He Xin, a young strategist of our Party, have repeatedly stressed the theory
11 regarding the shift of the center of World Civilization. Our slogan of "revitalizing China"
12 has this way of thinking as its basis. You may look into the newspapers and magazines
13 published in recent years or go online to do some research to find out who raised the
14 slogan of national revitalization first. It was Comrade He Xin. Do you know who He Xin
15 is? He may look aggressive and despicable when he speaks in public, with his sleeves and
16 pants all rolled up, but his historical vision is a treasure our Party should cherish.

17 In discussing this issue, let us start from the beginning.

18 As everybody knows, according to the views propagated by Western scholars, humanity as
19 a whole originated from one single mother in Africa. Therefore, no race can claim racial
20 superiority. However, according to the research conducted by most Chinese scholars, the
21 Chinese are different from other races on earth. We did not originate in Africa. Instead, we
22 originated independently in the land of China. The Peking Man at Zhoukoudian that we are
23 all familiar with represents a phase of our ancestors' evolution. "The Project of Searching
24 for the Origins of the Chinese Civilization" currently undertaken in our country is aimed at
25 a more comprehensive and systematic research on the origin, process and development of
26 the ancient Chinese civilization. We use to say, "Chinese civilization has had a history of
27 five thousand years." But now, many experts engaged in research in varied fields including
28 archeology, ethnic cultures, and regional cultures have reached consensus that the new
29 discoveries such as the Hongshan Culture in the northeast, the Liangahn Cutlure in
30 Zhejiang province, the Jinsha Ruins in Sichuan province, and the Yongzhou Shun Emperor
31 Cultural Site in Hunan province are all compelling evidence of the exitence of China's
32 early civilizations, and they prove that China's rice-growing agricultural history alone can
33 be traced back as far as 8,000 to 10,000 years. This refutes the concept of "five thousand
34 years of Chinese civilization."

35 Therefore, we can assert that we are the product of cultural roots of more than a million
36 years, and a single Chinese entity of two thousand years. This is the Chinese entity of two
37 thousand years. This is the Chinese nation that calls itself, "descendants of Yan and
38 Huang," the Chinese nation that we are so proud of. Hitler's Germany had once bragged
39 that the German race was the most superior race on earth, but the fact is, our nation is far
40 superior to the Germans.

41 During our long history, our people have disseminated throughout the Americas and the
42 regions along the Pacific Rim, and they became Indians in the Americas and the East Asian
43 ethnic groups in the South Pacific.

44 We all know that on account of our national superiority, during the thriving and prosperous
45 Tang Dynasty our civilization was at the peak of the world. We were the center of the
46 world civilization, and no other civilization in the world was comparable to ours. Later on,
47 because of our complacency, narrow-mindedness, and the self-enclosure of our own
48 country, we were surpassed by Western civilization, and the center of the world shifted to
49 the West.

50 In reviewing history, one may ask: Will the center of the world civilization shift back to
51 China?

1 Comrade He Xin put it in his report to the Central Committee in 1988: If the fact is that the
2 center of leadership of the world was located in Europe as of the 18th Century, and later
3 shifted to the United States in the mid-20th century the center of leadership of the world
4 will shift to the East of our planet. And, “the East” of course mainly refers to China.

5 Actually, Comrade Lui Huaquing made similar points in the 1980s. Based on an historical
6 analysis, he pointed out that the center of world civilization is shifting. It shifted from the
7 East to Western Europe and later to the United States; now it is shifting back to the East.
8 Therefore, if we refer to the 19th century as the British century, and the 20th century as the
9 American century, then the 21st century will be the Chinese century.

10 To understand conscientiously this historical law and to greet the advent of the Chinese
11 Century is the historical mission of our Party. As we all know, at the end of the last
12 century, we built the Altar to the Chinese Century in Beijing.

13 At the very moment of the arrival of the new millennium, the collective leadership of the
14 Party Central Committee gathered there for a rally, upholding the torches of Zhoukoudian,
15 to pledge themselves to get ready to greet the arrival of the Chinese Century. We were
16 doing this to follow the historical law and setting the realization of the Chinese century as
17 the goal of our Party’s endeavors.

18 Later, in the political report of our Party’s Sixteenth National Congress, we established that
19 national revitalization should be our great objective and explicitly specified in our new
20 Party Constitution that our Party is the pioneer of the Chinese people. All these steps
21 marked a major development in Marxism, reflecting our Party’s courage and wisdom. As
22 we all know, Marx and his followers have never referred to any communist party as a
23 pioneer of a certain people; neither did they say that national revitalization could be used
24 as a slogan of a communist party. Even Comrade Mao Zedong, a courageous national hero,
25 only raised high the banner of “the global proletarian revolution,” but even he did not have
26 the courage to give the loudest publicity to the slogan of national revitalization.

27 We must greet the arrival of the Chinese Century by raising high the banner of national
28 revitalization. How should we fight for the realization of the Chinese Century? We must
29 borrow the precious experiences in human history by taking advantage of the outstanding
30 fruition of human civilization and drawing lessons from what happened to other ethnic
31 groups.

32 The lessons include the collapse of communism in the former Soviet Union and Eastern
33 Europe, as well as the defeats of Germany and Japan in the past. Recently there has been
34 much discussion of the lessons of the collapse of communism in the former Soviet Union
35 and Eastern European countries, so I will not dwell on them here. Today I’d like to talk
36 about the lessons of Germany and Japan.

37 As we all know, Nazi Germany also placed much emphasis on the education of the people,
38 especially the younger generation. The Nazi Party and government organized and
39 established various propaganda and educational institutions such as the “Guiding Bureau
40 of National Propaganda,” “Department of National Education and Propaganda,”
41 “Supervising Bureau of Worldview Study and Education,” and “Information Office,” all
42 aimed at instilling into the people’s minds, from elementary schools to colleges, the idea
43 that German people are superior, and convincing people that the historical mission of the
44 Aryan people is to become the “lords of the earth” whose right it is to “rule over the
45 world.” Back then the German people were much more united than we are today.

46 Nonetheless, Germany was defeated in utter shame, along with its ally, Japan. Why? We
47 reached some conclusions at the study meetings of the Politburo, in which we were
48 searching for the laws that governed the vicissitudes of the big powers, and trying to
49 analyze Germany and Japan’s rapid growth. When we decide to revitalize based on the
50 German model, we must not repeat the mistakes they made.

1 Specifically, the following are the fundamental causes for their defeat: First, they had too
 2 many enemies all at once, as they did not adhere to the principle of eliminating enemies
 3 one at a time; second, they were too impetuous, lacking the patience and perseverance
 4 required for great accomplishments; third, when the time came for them to be ruthless, they
 5 turned out to be too soft, therefore leaving troubles that resurfaced later on.

6 Let's presume that back then Germany and Japan had been able to keep the United States
 7 neutral and had fought a protracted war step by step on the Soviet front. If they had
 8 adopted this approach, gained some time to advance their research, eventually succeeded in
 9 obtaining the technology of nuclear weapons and missiles, and launched surprise attacks
 10 against the United States and the Soviet Union using them, then the United States and the
 11 Soviet Union would not have been able to defend themselves and would have had to
 12 surrender. Little Japan, in particular, made an egregious mistake in launching the sneak
 13 attack on Pearl Harbor. This attack did not hit the vital parts of the United States. Instead, it
 14 dragged the United States into the war, into the ranks of the gravediggers that eventually
 15 buried the German and Japanese fascists.

16 Of course, if they had not made these three mistakes and won the war, history would have
 17 been written in a different fashion. If that had been the case, China would not be in our
 18 hands. Japan might have relocated their capital to China and ruled over China. Afterwards,
 19 China and the whole of Asia under Japan's command would have brought into full play the
 20 oriental wisdom, conquered the West ruled by Germany and unified the whole world. This
 21 is irrelevant, of course. No more digressions.

22 So, the fundamental reason for the defeats of Germany and Japan is that history did not
 23 arrange them to be the "lords of the earth," for they are, after all, not the most superior
 24 race.

25 Ostensibly, in comparison, today's China is alarmingly similar to Germany back then.
 26 Both of them regard themselves as the most superior races; both of them have a history of
 27 being exploited by foreign powers and are therefore vindictive; both of them have the
 28 tradition of worshipping their own authorities; both of them feel that they have seriously
 29 insufficient living space; both of them raise high the two banners of nationalism and
 30 socialism and label themselves as "national socialism"; both of them worship "one state,
 31 one party, one leader, and one doctrine."

32 And yet, if we really are to make a comparison between Germany and China, then, as
 33 Comrade Jiang Zemin put it, Germany belongs to "pediatrics" – too trivial to be compared.
 34 How large is Germany's population? How big is its territory? And how long is its history?
 35 We eliminated eight million nationalist troops in only three years. How many enemies did
 36 Germany kill? They were in power for a transient period of little more than a dozen years
 37 before they perished, while we are still energetic after being around for more than eighty
 38 years. Our theory of the shifting center of civilization is of course more profound than
 39 Hitler's theory of "the lords of the earth." Our civilization is profound and broad, which
 40 has determined that we are so much wiser than they were.

41 Our Chinese people are wiser than the Germans because, fundamentally, our race is
 42 superior to theirs. As a result, we have a longer history, more people, and larger land area.
 43 On this basis our ancestors left us with the two most essential heritages, which are atheism
 44 and great unity. It was Confucius, the founder of our Chinese culture, who gave us these
 45 heritages.

46 This heritage determined that we have a stronger ability to survive than the West. That is
 47 why the Chinese race has been able to prosper for so long. We are destined "not to be
 48 buried by either heaven or earth" no matter how severe the natural, man-made, and
 49 national disasters. This is our advantage.

50 Take response to war as an example. The reason that the United States remains today is
 51 that it has never seen war on its mainland. Once its enemies aim at the mainland, these

1 enemies would reach Washington before its congress finishes debating and authorizes the
 2 president to declare war. But for us, we don't waste time on these trivial things. Comrade
 3 Deng Xiaoping once said, "The Party's leadership is prompt in making decisions. Once a
 4 decision is made, it is immediately implemented. There's no wasting time on trivial things
 5 like in capitalist countries. This is our advantage! Our Party's democratic centralism is
 6 built on the tradition of great unity. Although fascist Germany also stressed high-level
 7 centralism, they only focused on power of the top leader, but ignored the collective
 8 leadership of the central group. That's why Hitler was betrayed by many later in his life,
 9 which fundamentally depleted the Nazis of their war capacity.

10 What makes us different from Germany is that we are complete atheists, while Germany
 11 was primarily a Catholic and Protestant country. Hitler was only half atheist. Although
 12 Hitler also believed that ordinary citizens had low intelligence, and that leaders should
 13 therefore make decisions, and although German people worshipped Hitler back then,
 14 Germany did not have the tradition of worshipping sages on a broad basis. Our Chinese
 15 society has always worshipped sages, and that is because we don't worship any God. Once
 16 you worship a god, you can't worship a person at the same time, unless you recognize the
 17 person as the god's representative like they do in Middle Eastern countries. On the other
 18 hand, once you recognize a person as a sage, of course you will want him to be your
 19 leader.... This is the foundation of our democratic centralism.

20 The bottom line is, only China is a reliable force in resisting the Western parliament-based
 21 democratic system. Hitler's dictatorship in Germany was perhaps but a momentary mistake
 22 in history.

23 Maybe you have now come to understand why we recently decided to further promulgate
 24 atheism. If we let theology from the West into China and empty us from the inside, if we
 25 let all Chinese people listen to God and follow God, who will obediently listen to us and
 26 follow us? If the common people don't believe Comrade Hu Jintao is a qualified leader,
 27 question his authority, and want to monitor him, if the religious followers in our society
 28 question why we are leaving God in churches, can our Party continue to rule China?
 29 Germany's dream to be the "lord of the earth" failed, because ultimately, history did not
 30 bestow this great mission upon them. But the three lessons Germany learned from
 31 experience are what we ought to remember as we complete our historic mission and
 32 revitalize our race. The three lessons are: Firmly grasp the country's living space; firmly
 33 grasp the Party's control over the nation; and firmly grasp the general direction toward
 34 becoming the "lord of the earth."

35 Next, I'd like to address these three issues.

36 The first issue is living space. This is the biggest focus of the revitalization of the Chinese
 37 race. In my last speech, I said that the fight over basic living resources (including land and
 38 ocean) is the source of the vast majority of wars in history. This may change in the
 39 information age, but not fundamentally. Our per capita resources are much less than those
 40 of Germany's back then. In addition, economic development in the last twenty-plus years
 41 had a negative impact, and climates are rapidly changing for the worse. Our resources are
 42 in very short supply. The environment is severely polluted, especially that of soil, water,
 43 and air. Not only our ability to sustain and develop our race, but even its survival is gravely
 44 threatened, to a degree much greater than faced by Germany back then.

45 Anybody who has been to Western countries knows that their living space is much better
 46 than ours. They have forests alongside the highways, while we hardly have any trees by
 47 our streets. Their sky is often blue with white clouds, while our sky is covered by a layer of
 48 dark haze. Their tap water is clean enough for drinking, while even our ground water is so
 49 polluted that it can't be drunk without filtering. They have few people in the streets, and
 50 two or three people can occupy a small residential building; in contrast, our streets are
 51 always crawling with people, and several people have to share one room.

1 Many years ago, there was a book titled Yellow Catastrophes. It said that, due to our
 2 following the American style of consumption, our limited resources would not long
 3 support the population and society would collapse, once our population reaches 1.3 billion.
 4 Now our population has already exceeded this limit, and we are now relying on imports to
 5 sustain our nation. It's not that we haven't paid attention to this issue. The Ministry of
 6 Land Resources is specialized in this issue.

7 But the term 'living space' (lebensraum) is too closely related to Nazi Germany. The
 8 reason we don't want to discuss this too openly is to avoid the West's association of us
 9 with Nazi Germany, which could in turn reinforce the view that China is a threat.

10 Therefore, in our emphasis on He Xin's new theory, "Human rights are just living rights,"
 11 we only talk about "living," but not "space," so as to avoid using the term "living space."
 12 From the perspective of history, the reason that China is faced with the issue of living
 13 space is because Western countries established colonies ahead of Eastern countries.

14 Western countries established colonies all around the world, therefore giving themselves
 15 an advantage on the issue of living space. To solve this problem, we must lead the Chinese
 16 people outside of China, so that they could develop outside of China.

17 The second issue is our focus on the leadership capacity of the ruling party. We've done
 18 better on this than their party. Although the Nazis spread their power to every aspect of the
 19 German national government, they did not stress their absolute leadership position like we
 20 have. They did not take the issue of managing the power of the party as first priority,
 21 which we have. When Comrade Mao Zedong summarized the "three treasures" of our
 22 party's victory in conquering the country, he considered the most important "treasure" to
 23 be developing the Chinese Communist Party (CCP) and strengthening its leadership
 24 position.

25 We have to focus on two points to fortify our leadership position and improve our
 26 leadership capacity.

27 The first is to promote the "Three Represents" theory, stressing that our Party is the
 28 pioneer of the Chinese race, in addition to being the pioneer of the proletariat. Many
 29 citizens say in private, "We never voted for you, the Communist Party, to represent us.
 30 How can you claim to be our representatives?"

31 There's no need to worry about this issue. Comrade Mao Zedong said that if we could lead
 32 the Chinese people outside of China, resolving the lack of living space in China, the
 33 Chinese people will support us. At that time, we don't have to worry about the labels of
 34 "totalitarianism" or "dictatorship." Whether we can forever represent the Chinese people
 35 depends on whether we can succeed in leading the Chinese people out of China.

36 The second point, whether we can lead the Chinese people out of China, is the most
 37 important determinant of the CCP's leadership position.

38 Why do I say this?

39 Everyone knows that without the leadership of our Party, China would not exist today.

40 Therefore, our highest principle is to forever protect our Party's leadership position. Before
 41 June 4, we realized vaguely that as long as China's economy is developed, people would
 42 support and love the Communist Party. Therefore we had to use several decades of
 43 peacetime to develop China's economy. No matter what-isms, whether it is a white cat or a
 44 black at, it is a good cat if it can develop China's economy. But at that time, we did not
 45 have mature ideas about how China would deal with international disputes after its
 46 economy becomes developed.

47 Comrade Xiaoping said then that the main themes in the world were peace and
 48 development. But the June 4 riot gave our Party a warning and gave us a lesson that is still
 49 fresh.

50 The pressure of China's peaceful evolution makes us reconsider of these two main themes
 51 of our time. We see that neither of these two issues, peace and development, have been

1 resolved. The western oppositional forces always change the world according to their own
 2 visions; they want to change China and use peaceful evolution to overturn the leadership of
 3 our Communist Party. Therefore, if we only develop the economy, we still face the
 4 possibility of losing control.

5 The June 4 riot almost succeeded in bringing a peaceful transition; if it were not for the
 6 fact that a large number of veteran comrades were still alive and at a crucial moment they
 7 removed Zhao Ziyang and his followers, then we all would have been put in prison. After
 8 death we would have been too ashamed to report to Marx. Although we have passed the
 9 test of June 4, after our group of senior comrades pass away, without our control, peaceful
 10 evolution may still come to China like it did to the former Soviet Union. In 1956, they
 11 suppressed the Hungarian incident and defeated the attacks by Tito's revisionists of
 12 Yugoslavia, but they could not withstand Gorbachev thirty some years later. Once those
 13 pioneering senior comrades died, the power of the Communist Party was taken away by
 14 peaceful evolution.

15 After the June 4 riot was suppressed, we have been thinking about how to prevent China
 16 from peaceful evolution and how to maintain the Communist Party's leadership. We
 17 thought it over and over but did not come up with any good ideas. If we do not have good
 18 ideas, China will inevitably change peacefully, and we will all become criminals in history.
 19 After some deep pondering, we finally come to this conclusion: Only by turning our
 20 developed national strength into the force of a first striking outward – only by leading
 21 people to go out – can we win forever the Chinese people's support and love for the
 22 Communist Party. Our party will then stand on invincible ground, and the Chinese people
 23 will have to depend on the Communist Party. They will forever follow the Communist
 24 Party with their hearts and minds, as was written in a couplet frequently seen in the
 25 countryside some years ago: "Listen to Chairman Mao, follow the Communist Party!"
 26 Therefore, the June 4 riot made us realize that we must combine economic development
 27 with preparation for war and leading the people to go out! Therefore, since then, our
 28 national defence policy has taken a 180 degree turn and we have since emphasized more
 29 and more "combining peace and war." Our economic development is all about preparing
 30 for the needs of war! Publicly we still emphasize economic development as our center, but
 31 in reality, economic development has war as its center! We have made a tremendous effort
 32 to construct "The Great Wall Project" to build up, along our coastal and land frontiers as
 33 well as around large and medium-sized cities, a solid underground "Great Wall" that can
 34 withstand a nuclear war. We are also storing all necessary war materials. Therefore, we
 35 will not hesitate to fight a Third World War, so as to lead the people to go out and to
 36 ensure the Party's leadership position. In any event, we, the CCP, will never step down
 37 from the stage of history! **We'd rather have the whole world, or even the entire globe,
 38 share life and death with us than step down from the stage of history! Isn't there a "nuclear
 39 bondage" theory? It means that since nuclear weapons have bound the security of the entire
 40 world, all will die together if death is inevitable. In my view, there is another kind of
 41 bondage, and that is, the fate of our Party is tied up with that of the whole world. If we, the
 42 CCP, are finished, China will be finished, and the world will be finished.**

43 Our Party's historical mission is to lead the Chinese people to go out. If we take the long
 44 view, we will see that history led us on this path. First, China's long history has resulted in
 45 the world's largest population, including Chinese in China as well as overseas. Second,
 46 once we open our doors, the profit-seeking western capitalists will invest capital and
 47 technology in China to assist our development, so that they can occupy the biggest market
 48 in the world. Third, our numerous overseas Chinese help us create the most favorable
 49 environment for the introduction of foreign capital, foreign technology, and advanced
 50 experience into China. Thus, it is guaranteed that our reform and open-door policy will
 51 achieve tremendous success. Fourth, China's great economic expansion will inevitably

1 lead to the shrinkage of per-capita living space for the Chinese people, and this will
 2 encourage China to turn outward in search for new living space. Fifth, China's great
 3 economic expansion will inevitably come with significant development in our military
 4 forces, creating conditions for our expansion overseas. Ever since Napoleon's time, the
 5 West has been alert for the possible awakening of the sleeping lion that is China. Now, the
 6 sleeping lion is standing up and advancing into the world, and has become unstoppable!
 7 What is the third issue we should clinch firmly in order to accomplish our historical
 8 mission of national renaissance? It is to hold firmly onto the big "issue of America."
 9 This appears to be shocking, but the logic is actually very simple.

10 Comrade He Xin put forward a very fundamental judgment that is very reasonable. He
 11 asserted in his report to the Party Central Committee: The renaissance of China is in
 12 fundamental conflict with the Western strategic interest, and therefore will inevitably be
 13 obstructed by the western countries doing everything they can. So, Only by breaking the
 14 blockade formed by the western countries headed by the United States can China grow and
 15 move toward the world!

16 Would the United States allow us to go out to gain new living space? First, if the United
 17 States is firm in blocking us, it is hard for us to do anything significant to Taiwan,
 18 Vietnam, India, or even Japan, [so] how much more living space can we get? Very trivial!
 19 **Only countries like the United States, Canada and Australia have the vast land to**
 20 **serve our need for mass colonization.**

21 Therefore, solving the "issue of America" is the key to solving all other issues. First, this
 22 makes it possible for us to have many people migrate there and even establish another
 23 China under the same leadership of the CCP. America was originally discovered by the
 24 ancestors of the yellow race, but Columbus gave credit to the white race. We the
 25 descendants of the Chinese nation are entitled to the possession of the land! It is said that
 26 the residents of the yellow race have a very low social status in the United States. We need
 27 to liberate them. Second, after solving the "issue of America," the western countries of
 28 Europe would bow to us, not to mention **Taiwan**, Japan and other small countries.
 29 Therefore, solving the "issue of America" is the mission assigned to the CCP members by
 30 history.

31 I sometimes think how cruel it is for China and the United States to be enemies that are
 32 bound to meet on a narrow road! Do you remember a movie about Liberation Army
 33 Troops led by Liu Bocheng and Deng Xiaoping? The title is something like "Decisive
 34 Battle on the Central Plains." There is a famous remark in the movie that is full of power
 35 and grandeur: "The enemies are bound to meet on a narrow road, only the brave will win!"
 36 It is this kind of fighting to win or die spirit that enabled us to seize power in Mainland
 37 China. It is historical destiny that China and the United States will come to unavoidable
 38 confrontation on a narrow path and fight each other! **The United States, unlike Russia and**
 39 **Japan, has never occupied and hurt China, and also assisted China in its battle against the**
 40 **Japanese. But, it will certainly be an obstruction, and the biggest obstruction! In the long**
 41 **run, the relationship of China and the United States is one of a life-and-death struggle.**

42 One time, some Americans came to visit and tried to convince us that the relationship
 43 between China and the United States is one of interdependence. Comrade Xiaoping replied
 44 in a polite manner: "Go tell your government, China and the United States do not have
 45 such a relationship that is interdependent and mutually reliant." Actually, Comrade
 46 Xiaoping was being too polite, he could have been more frank, **"The relationship**
 47 **between China and the United States is one of life-and-death struggle."** Of course,
 48 right now it is not the time to openly break up with them yet. Our reform and opening to
 49 the outside world still rely on their capital and technology, we still need America.

50 Therefore, we must do everything we can to promote our relationship with America, learn
 51 from America in all aspects and use America as an example to reconstruct our country.

1 How have we managed our foreign affairs in these years? Even if we had to put on a
 2 smiling face in order to please them, even if we have to give them the right cheek after
 3 they had hit our left cheek, we still must endure in order to further our relationship with the
 4 **United States**. Do you remember the character of Wuxun in the movie the “Story of
 5 Wuxun”? In order to accomplish his mission, he endured so much pain and suffered so
 6 much beating and kicking! **The United States is the most successful country in the**
 7 **world today. Only after we have learned all of its useful experiences can we replace it**
 8 **in the future**. Even though we are presently imitating the American tone “China and the
 9 United States rely on each other and share honor and disgrace,” we must not forget that the
 10 history of our civilization repeatedly has taught us that one mountain does not allow two
 11 tigers to live together.

12 We also must never forget what Comrade Xiaoping emphasized: “Refrain from revealing
 13 ambitions and put others off the track.” The hidden message is: we must put up with
 14 America; we must conceal our ultimate goals, hide our capabilities, and await the
 15 opportunity. In this way, our mind is clear. Why have we not updated our national anthem
 16 with something peaceful? Why did we not change the anthem’s theme of war? **Instead,**
 17 **when revising the Constitution this time, for the first time we clearly specified**
 18 **“March of the Volunteers” is our national anthem. Thus we will understand why we**
 19 **constantly talk loudly about the “Taiwan issue” but not the “American issue.” We all**
 20 **know the principle of “doing one thing under the cover of another.” If ordinary**
 21 **people can only see the small island of Taiwan in their eyes, then you as the elite of**
 22 **our country should be able to see the whole picture of our cause. Over these years,**
 23 **according to Comrade Xiaoping’s arrangement, a large piece of our territory in the**
 24 **North has been given up to Russia; do you really think our Party Committee is a fool?**
 25 To resolve the issue of America we must be able to transcend conventions and restrictions.
 26 In history, when a country defeated another country or occupied another country, it could
 27 not kill all the people in the conquered land because back then you could not kill people
 28 effectively with sabers or long spears, or even with rifles or machine guns. Therefore, it
 29 was impossible to gain a stretch of land without keeping the people on that land. However,
 30 if we conquered America in this fashion, we would not be able to make many people
 31 migrate there.

32 **Only by using special means to “clean up” America will we be able to lead the**
 33 **Chinese people there. This is the only choice left for us. This is not a matter of**
 34 **whether we are willing to do it or not. What kind of special means is there available**
 35 **for us to “clean up America”?**

36 Conventional weapons such as fighters, canons, missiles and battleships won’t do; neither
 37 will highly destructive weapons such as nuclear weapons. **We are not as foolish as to**
 38 **want to perish together with America by using nuclear weapons**, despite the fact that
 39 we have been exclaiming that we will have the Taiwan issue resolved at whatever cost.
 40 **Only by using non-destructive weapons that can kill many people will we be able to**
 41 **reserve America for ourselves. There has been rapid development of modern**
 42 **biological technology, and new bio-weapons have been invented one after another. Of**
 43 course, we have not been idle, in the past years we have seized the opportunity to master
 44 weapons of this kind. We are capable of achieving our purpose of “cleaning up” America
 45 all of a sudden. When Comrade Xiaoping was still with us, the Party Central Committee
 46 had the perspicacity to make the right decision not to develop aircraft carrier groups and
 47 focus instead on developing lethal weapons that can eliminate mass populations of the
 48 enemy country.

49 From a humanitarian perspective, we should issue a warning to the American people and
 50 persuade them to leave America and leave the land they have lived in to the Chinese
 51 people. Or at least they should leave half of the United States to be China’s colony,

1 because America was first discovered by the Chinese. But would this work? If this strategy
 2 does not work, then there is only one choice left to us. That is, use decisive means to
 3 “clean up” America and reserve America for our use in a moment. Our historical
 4 experience has proven that as long as we make it happen, nobody in the world can do
 5 anything about us. Furthermore, if the United States as the leader is gone, then other
 6 enemies have to surrender to us.

7 **Biological weapons are unprecedented in their ruthlessness, but if the Americans do**
 8 **not die then the Chinese have to die. If the Chinese people are strapped to the present**
 9 **land, a total societal collapse is bound to take place. According to the computation of**
 10 **the author of Yellow Peril, more than half of the Chinese will die, and that figure**
 11 **would be more than 800 million people!** Just after the liberation, our yellow land
 12 supported nearly 500 million people, while today the official figure of the population is
 13 more than 1.3 billion. This yellow land has reached the limit of its capacity. One day, who
 14 knows how soon it will come, the great collapse will occur any time and more than half the
 15 population will have to go.

16 We must prepare ourselves for two scenarios. **If our biological weapons succeed in the**
 17 **surprise attack, the Chinese people will be able to keep their losses at a minimum in**
 18 **the fight against the United States.** If, however, the attack fails and triggers a nuclear
 19 retaliation from the United States, China would perhaps suffer a catastrophe in which more
 20 than half of its population would perish. That is why we need to be ready with air defense
 21 systems for our big and medium-sized cities. Whatever the case may be, we can only move
 22 forward fearlessly, for the sake of our Party and State and our nation’s future, regardless of
 23 the hardships we have to face and the sacrifices we have to make. The population, even if
 24 more than half dies, can be reproduced. But if the Party falls, everything is gone, and
 25 forever gone.

26 In Chinese history, in the replacement of dynasties, the ruthless have always won and the
 27 benevolent have always failed. The most typical example involved Xiang Yu the King of
 28 Chu, who, after defeating Liu Bang, failed to continue to chase after him and eliminate his
 29 forces, and his leniency resulted in Xiang Yu’s death and Liu’s victory Therefore, we
 30 must emphasize the importance of adopting resolute measures. In the future, the two rivals,
 31 China and the United States, will eventually meet each other in a narrow road, and our
 32 leniency to the Americans will mean cruelty toward the Chinese people. **Here some**
 33 **people may want to ask me: What about the several millions of our compatriots in the**
 34 **United States? They may ask: aren’t we against Chinese killing other Chinese?**
 35 **These comrades are too pedantic; they are not pragmatic enough. If we had insisted**
 36 **on the principle that the Chinese should not kill other Chinese, would we have**
 37 **liberated China? As for the several million Chinese living in the United States, this is**
 38 **of course a big issue. Therefore, in recent years, we have been conducting research on**
 39 **genetic weapons, i.e., those weapons that do not kill yellow people. But producing a**
 40 **result with this kind of research is extremely difficult.**

41 Of the research done on genetic weapons throughout the world, Israel is the most
 42 advanced. Their genetic weapons are designed to target Arabs and protect the Israelis. But
 43 even they have not reached the stage of actual deployment. We have cooperated with Israel
 44 on some research. Perhaps we can introduce some of the technologies used to protect
 45 Israelis and remold these technologies to protect the yellow people. But their technologies
 46 are not mature yet, and it is difficult for us to surpass them in a few years. If it has to be
 47 five or ten years before some breakthrough can be achieved in genetic weapons, we cannot
 48 afford to wait any longer.

49 Old comrades like us cannot afford to wait that long, for we don’t have that much time to
 50 live. Old soldiers of my age may be able to wait for five or ten more years, but those from

1 the period of the anti-Japanese War or the few old Red Army soldiers cannot wait any
2 longer.

3 Therefore, we have to give up our expectations about genetic weapons. Of course, from
4 another perspective, the majority of those Chinese living in the United States have become
5 our burden, because they have been corrupted by the bourgeois liberal values for a long
6 time and it would be difficult for them to accept our Party's leadership. If they survived the
7 war, we would have to launch campaigns in the future to deal with them, to reform them.

8 Do you still remember that when we had just defeated the Koumintang (KMT) and
9 liberated Mainland China, so many people from the bourgeois class and intellectuals
10 welcomed us so very warmly, but later we had to launch campaigns such as the
11 "suppression of the reactionaries" and "Anti-Rightist Movement" to clean them up and
12 reform them? Some of them were in hiding for a long time and were not exposed until the
13 Cultural Revolution. History has proved that any social turmoil is likely to involve many
14 deaths.

15 Maybe we can put it this way: death is the engine that moves history forward. During the
16 period of the three kingdoms, how many people died? When Genghis Khan conquered
17 Eurasia, how many people died? When Manchu invaded the interior of China, how many
18 people died? Not many people died during the 1911 Revolution, but when we overthrew
19 the Three Great Mountains, and during the political campaigns such as "suppression of the
20 reactionaries," "Three-Anti-Campaign," and "Five-Anti-Campaign," at least 20 million
21 people died. We were apprehensive that some young people today would be trembling with
22 fear when they hear about wars and people dying.

23 During wartime, we were used to seeing dead people. Blood and flesh were flying
24 everywhere, corpses were lying in heaps on the fields, and blood ran like rivers. We saw it
25 all. On the battlefields, everybody's eyes turned red with killing because it was a life-and-
26 death struggle and only the brave would survive.

27 **It is indeed brutal to kill one or two hundred million Americans. But that is the only**
28 **path that will secure a Chinese century in which the CCP leads the world.** We, as
29 revolutionary humanitarians, do not want deaths. But if history confronts us with a choice
30 between deaths of Chinese and those of Americans, we'd have to pick the latter, as, for us,
31 it is more important to safeguard the lives of the Chinese people and the life of our Party.
32 That is because, after all, we are Chinese and members of the CCP. Since the day we
33 joined the CCP, the Party, life has always been above all else! History will prove that we
34 made the right choice.

35 Now, when I am about to finish my speech, you probably understand why we wanted to
36 know, whether the people would rise against us if one day we secretly adopt resolute
37 means to "clean up" America. For over twenty years, China has been enjoying peace, and a
38 whole generation has not been tested by war. In particular, since the end of World War II,
39 there have been many changes in the formats of war, the concept of war and the ethics of
40 war. Especially since the collapse of the former Soviet Union and Eastern European
41 Communist states, the ideology of the West has come to dominate the world as a whole,
42 and the Western theory of human nature and western view of human rights have
43 increasingly been disseminated among the young people in China. Therefore, we were not
44 very sure about the people's attitude. If our people are fundamentally opposed to "cleaning
45 up" America, we will, of course, have to adopt corresponding measures.

46 Why didn't we conduct the survey through administrative means instead of through the
47 web? We did what we did for a good reason.

48 First of all, we did it to reduce artificial inference and to make sure that we got the true
49 thoughts of the people. In addition, it is more confidential **and won't reveal the true**
50 **purpose of our survey.** But what is most important is the fact that most of the people who
51 are able to respond to the questions online are from social groups that are relatively well-

1 educated and intelligent. They are the hard-core and leading groups that play a decisive
2 role among our people. If they support us, then the people as a whole will follow us. If they
3 oppose us, they will play the dangerous role of inciting people and creating social
4 disturbance.

5 What turned out to be very comforting is they did not turn in a blank test paper. In fact,
6 they turned in a test paper with a score of over 80. This is the excellent fruition of our
7 Party's work in propaganda and education over the past few decades.

8 Of course, a few people under western influence have objected to shooting at prisoners of
9 war and women and children. Is everybody crazy? Some others said, "The Chinese love to
10 label themselves as a peace-loving people, but actually they are the most ruthless people.
11 The comments are resonant of killing and murdering, sending chills to my heart."

12 Although there are not too many people holding this kind of viewpoint and they will not
13 affect the overall situation in any significant way, but we still need to strengthen the
14 propaganda to respond to this kind of argument.

15 That is to vigorously propagate Comrade He Xin's latest article, which has already been
16 reported to the central government. You may look it up on the website.

17 **If you get on the website using key words to search, you will find out that a while ago**
18 **comrade He Xin pointed out to the Hong Kong Business News during an interview**
19 **that: "The U.S. has a shocking conspiracy." According to what he had in hand, from**
20 **September 27 to October 1, 1995, the Mikhail Sergeevich Gorbachev Foundation,**
21 **funded by the United States, gathered 500 of the world's most important statesmen,**
22 **economic leaders and scientists, including George W. Bush (he was not the U.S.**
23 **president at the time), the Baroness Thatcher, Tony Blair, Zbigniew Brzezinski, as**
24 **well as George Soros, Bill Gates, futurist John Naisbitt, etc., all of the world's most**
25 **popular characters, in the San Francisco Fairmont hotel for a high-level roundtable**
26 **conference, discussing problems about globalization and how to guide humanity to**
27 **move forward into the 21st century. According to what He Xin had in hand, the**
28 **outstanding people of the world in attendance thought that in the 21st century a mere**
29 **20 percent of the world's population will be sufficient to maintain the world's**
30 **economy and prosperity, the other 80 percent or 4/5ths of the world's population will**
31 **be human garbage unable to produce new values. The people in attendance thought**
32 **that this excess 80 percent population would be a trash population and "high-tech"**
33 **means should be used to eliminate them gradually.**

34 **Since the enemies are secretly planning to eliminate our population, we certainly**
35 **cannot be infinitely merciful and compassionate to them. Comrade He Xin's article**
36 **came out at the right time, it has proven the correctness of our tit for tat battle**
37 **approach ... [and] Comrade Deng Xiaoping's great foresight to deploy against the**
38 **United States military strategy.**

39 Certainly, in spreading Comrade He Xin's views, we cannot publish the article in the Party
40 newspapers, in order to avoid raising the enemy's vigilance. He Xin's conversation may
41 remind the enemy that we have grasped the modern science and technology, including
42 "clean" nuclear technology as well as biological weapons technology, and we can use
43 powerful measures to eliminate their population on a large scale.

44 The last problem I want to talk about is of firmly seizing the preparations for military
45 battle.

46 Currently, we are at the crossroad of moving forward or backward. Some comrades saw
47 problems flooding everywhere in our country – the corruption problem, the state-owned
48 enterprise problem, the bank's bad accounts problem, environmental problems, society
49 security problems, education problems, the AIDS problem, various appeals problems, even
50 the riots problem. These comrades vacillated in the determination to prepare for military
51 battles. They thought: they should first grab the political reform problem, that is, our own

1 political reform comes first. After resolving the domestic problems, we can then deal with
2 the foreign military battle problem.

3 This reminds me of the crucial period in 1948 in the Chinese Revolution. At that time the
4 People's Liberation Army's "horses were drinking water" in the Yangtze River, but they
5 faced extremely complex situations and difficult problems everywhere in the liberated
6 areas, and the central authority received emergency reports daily. What to do? Should we
7 stop to manage rear areas and internal matters first before moving forward, or press on to
8 pass the Yangtze River with one vigorous effort? Chairman Mao, with his extraordinary
9 wisdom and mettle gave the marching order "Carry on the revolution to the end," and
10 liberated all of China. The previously thought "serious" conflicting problems were all
11 resolved in this great forward moving revolutionary wave.

12 **Now, it seems like we are in the same critical period as the "horses were drinking**
13 **water" in the Yangtze River days in the revolutionary era, as long as we resolve the**
14 **United States problem at one blow, our domestic problems will all be readily solved.**
15 **Therefore, our military battle preparation appears to aim at Taiwan but in fact is**
16 **aimed at the United States, and the preparation is far beyond the scope of attacking**
17 **aircraft carriers or satellites.**

18 Marxism pointed out that violence is the midwife for the birth of China's century. As war
19 approaches, I am full of hope for our next generation.

20 END QUOTE

21

23 QUOTE **Wuhan Scientist Thrown Off Roof**

24 [Wuhan Scientist Thrown Off Roof](#)

25 By [Dr. Joseph Mercola](#)

26 [Mercola.com](#)

27 June 29, 2023

28 Over the years, it's become clear that science can be a very hazardous occupation.
29 According to witnesses, a Wuhan Institute of Virology (WIV) scientist by the name of
30 Zhou Yusen was thrown to his death off the lab's roof in May 2020, just three months after
31 he'd filed a patent for a COVID vaccine.

32 The timing of the patent filing is perhaps as curious as his death. According to some
33 experts, the data included in the patent suggests he'd been working on the vaccine prior to
34 the SARS-CoV-2 outbreak, which authorities have insisted was a previously unknown
35 virus of zoonotic origin. According to a June 18, 2023, report by The Sun: 1

36 *"Zhou Yusen, 54, died in May 2020 while working for the People's Liberation Army and*
37 *alongside Wuhan scientists ... including Shi Zhengli — dubbed 'batwoman' for her work*
38 *on coronavirus in bats ...*

39 *U.S. investigators have now revealed that Zhou may have had knowledge of the lab leak*
40 *long before it was released to the world. Vaccination experts told investigators that it*
41 *would have been 'impossible' to generate the data Zhou had in the patent for the vaccine*
42 *unless he had been working on it for at least three months.*

43 *This could mean scientists in Wuhan were working on a COVID-19 vaccination in*
44 *November, before news of the virus had left China. The first case of COVID was reported*
45 *in Wuhan in December 2019 — but the World Health Organization did not declare a*
46 *pandemic until March 11, 2020.*

47 *It means the vaccine patent was filed just a short time after China first admitted there was*
48 *human-to-human transmission of COVID — and two weeks before a pandemic was*
49 *officially declared."*

50 Basically, if Yusen worked on a COVID-19 vaccine no later than November 2019, that
51 would further strengthen the claim that SARS-CoV-2 was created in a lab, and

1 subsequently escaped from that lab. In addition to that, we also have new evidence linking
2 SARS-CoV-2 to Chinese bioweapons research.

3 **SARS-CoV-2 Linked to Bioweapons Research**

4 According to an investigation² by The Sunday Times' Jonathan Calvert and George
5 Arbuthnott published June 10, 2023, scientists at the WIV were working in close
6 collaboration with the Chinese military to create a new mutant coronavirus shortly before
7 the COVID pandemic began:

8 *"Investigators who scrutinized top-secret intercepted communications and scientific*
9 *research believe Chinese scientists were running a covert project of dangerous*
10 *experiments, which caused a leak from the Wuhan Institute of Virology and started the*
11 *Covid-19 outbreak.*

12 *The U.S. investigators say one of the reasons there is no published information on the work*
13 *is because it was done in collaboration with researchers from the Chinese military, which*
14 *was funding it and which, they say, was pursuing bioweapons ... [Our] new investigation*
15 *paints the clearest picture yet of what happened in the Wuhan laboratory."*

16 According to Calvert and Arbuthnott, WIV researchers — and the Chinese military —
17 obtained "cutting-edge virus manipulation techniques" from Ralph Baric, Ph.D., a leading
18 U.S. coronavirus scientist. They also received funding for gain-of-function research from
19 the U.S. government through the EcoHealth Alliance.

20 The weaponization of a SARS-like virus appears to have begun in 2016, after miners died
21 from a SARS-like respiratory infection. Chinese researchers subsequently discovered two
22 new coronaviruses in a mineshaft in Mojiang, one of which is the closest relative to SARS-
23 CoV-2 found so far.

24 According to The Times, this event sparked off a classified bioweapons program under
25 which SARS-CoV-2 was eventually developed. This would explain why WIV researchers
26 were also working on a COVID vaccine well before the initial outbreak in Wuhan.

27 **Super-Lethal Coronavirus May Still Exist in Wuhan Lab**

28 Disturbingly, the evidence shows WIV researchers also created a coronavirus far more
29 lethal than SARS-CoV-2 — one with a 75% kill rate — and this research was in part
30 funded by EcoHealth grant money from the U.S. government.³ We can count ourselves
31 lucky that this wasn't the one that got out.

32 That specific virus — a fusion of two coronaviruses found in the Mojiang mineshaft called
33 WIV1 and SHC014 — was also highly infectious early in the illness, virtually
34 guaranteeing that an outbreak would be impossible to contain. Vaccines and drugs
35 developed against SARS were also ineffective against this extraordinary virus.

36 While U.S. funding agencies knew about EcoHealth's work on bat viruses, the Chinese
37 military may have been running a secret parallel bioweapons project that not even
38 EcoHealth's president Peter Daszak, who worked closely with Shi, knew about. Calvert
39 and Arbuthnott write:⁴

40 *"The root of this project goes back to an incident that allegedly drew the attention of the*
41 *Chinese military to the work of scientists in Wuhan. In 2012, the Wuhan institute's*
42 *researchers investigated an abandoned copper mine with a large bat colony in the*
43 *Mojiang region of south China.*

44 *Six men clearing out bat guano there were struck down by a mystery illness that caused*
45 *fever, coughs and pneumonia. All the men required hospital treatment and three died.*

46 *Tests on the men for various illnesses came back negative but they tested positive for*
47 *antibodies to an unknown coronavirus.*

48 *It has been possible, however, to piece together what happened from a master's thesis by a*
49 *medic at the hospital that treated the men and a PhD paper by a student of the director of*
50 *the Chinese Centre for Disease Control and Prevention.*

1 *The incident happened while the institute was working on EcoHealth's Predict*
 2 *programme, which was aimed at finding this type of virus crossover between animals and*
 3 *humans. But the Wuhan institute withheld information about the mine deaths from*
 4 *EcoHealth and the U.S. government."*

5 **At Least Nine Relatives of SARS-CoV-2 Exist**

6 Shi and her team reportedly spent four years collecting bat samples from the Mojiang
 7 mine. Among the pathogens found were 293 coronaviruses. In 2016, Shi published a paper
 8 describing a coronavirus found at the site that was from a lineage of SARS scientists had
 9 never seen before. She called it RaBtCoV/4991.

10 She left out some crucial facts, however. She made no mention of the miners who died
 11 after getting infected at the collection site, nor did she mention that she'd found **eight**
 12 **other SARS-related coronaviruses** from the same previously unknown family as
 13 RaBtCoV/4991.

14 Early in the COVID pandemic, RaBtCoV/4991 was identified as the closest relative to
 15 SARS-CoV-2, **but there were also eight others from that same family, the existence of**
 16 **which has been kept secret.**

17 Once the WIV was forced to admit they had the closest known relative to SARS-CoV-2 in
 18 their freezers, they tried throwing researchers off the trail by changing the name of
 19 RaBtCoV/4991 to RaTG13. This way, the virus could not be easily linked to the mine and
 20 the dead miners.

21 **Shadow Project**

22 Calvert and Arbutnott continue:5

23 *"As the world emerged from lockdown, US State Department investigators were given*
 24 *access to secret intelligence on what had been happening in China in the months and years*
 25 *before COVID emerged.*

26 *More than a dozen investigators were given unparalleled access to 'metadata, phone*
 27 *information and internet information' from intercepts collected by the U.S. intelligence*
 28 *services.*

29 *The investigators' report was published in early 2021. It made two assertions: that Wuhan*
 30 *scientists were conducting experiments on RaTG13 from the Mojiang mine, and that covert*
 31 *military research, including laboratory animal experiments, was being done at the institute*
 32 *before the pandemic ...*

33 *The Sunday Times has spoken to three members of the team. **The intelligence they saw***
 34 ***suggests the types of risky experiments undertaken on the Shitou cave SARS viruses***
 35 ***were also conducted in secret on RaTG13 and the other COVID-19-like viruses from the***
 36 ***mine.***

37 *'They were working with the nine different COVID variants,' one of the investigators said.*
 38 *They believe one virus at the Wuhan institute was an even closer match to COVID-19 than*
 39 *RaTG13. 'We are confident they were working on a closer unpublished variant — possibly*
 40 *collected in Mojiang,' the source added.*

41 *The investigators spoke to two researchers working at a U.S. laboratory who were*
 42 *collaborating with the Wuhan institute at the time of the outbreak. **They said the Wuhan***
 43 ***scientists had inserted furin cleavage sites into viruses in 2019 in exactly the way***
 44 ***proposed in Daszak's failed funding application to DARPA.***

45 *The investigators also saw evidence that the institute was conducting 'serial passaging'*
 46 *experiments on at least one of the mine viruses ... Dr. Steven Quay, a U.S. scientist who*
 47 *advised the State Department on its investigation ... believes COVID-19 was created by*
 48 *inserting a furin cleavage site into one of the mine viruses and then serial passaging it*
 49 *through humanized mice.*

50 *He submitted a statement to the US Senate explaining the process. 'You infect the mice,*
 51 *wait a week or so, and then recover the virus from the sickest mice. Then you repeat. In a*

1 matter of weeks this directed evolution will produce a virus that can kill every humanized
2 mouse.' This explains why from the beginning of the outbreak, he says, the pandemic virus
3 was so remarkably well adapted to infect humans.

4 *One of the reasons there is no published information on such work, according to all three*
5 *investigators, is because the shadow project on the mine viruses at the Wuhan institute was*
6 *being funded by the Chinese military."*

7 **Chinese Military Targeted Coronaviruses for Bioweapons Study**

8 The pair also cite a 2015 book written by People's Liberation Army researchers, published
9 by the Chinese military academy, which stated that SARS viruses represent a "**new era of**
10 **genetic weapons**" that can be "artificially manipulated into an emerging human disease
11 virus, then weaponized and unleashed."

12 According to one of the investigators interviewed by Calvert and Arbuthnott, the Chinese
13 military started conducting secret experiments on RaTG13 (formerly RaBtCoV/4991) in
14 2016, one year after the publication of that book, in which the authors — one of whom has
15 collaborated with WIV scientists on several occasions — detailed how SARS could be
16 weaponized by fusing it with other viruses and then using serial passaging to make it more
17 dangerous to humans.

18 Is that a coincidence? The investigators Calvert and Arbuthnott spoke to don't think so, in
19 part because the Chinese military was also working on a vaccine for this newly created
20 virus:6

21 *"The investigators believe the Chinese military had taken an interest in developing a*
22 *vaccine for the viruses so they could be used as potential bioweapons. If a country could*
23 *inoculate its population against its own secret virus, it might have a weapon to shift the*
24 *balance of world power.*

25 *The PLA had its own vaccine specialist, Zhou Yusen, a decorated military scientist at the*
26 *academy, who had collaborated with the Wuhan scientists on a study of the MERS*
27 *coronavirus and was working with them at the time of the outbreak.*

28 *Suspicion fell on him after the pandemic because he produced a patent for a COVID*
29 *vaccine with remarkable speed in February 2020, little more than a month after the*
30 *outbreak of the virus had first been admitted to the world by China ...*

31 *One of the U.S. investigators said testimony from scientists connected to the Wuhan*
32 *institute's collaborators suggested COVID-19 vaccine work was going on at the*
33 *laboratory before the outbreak.*

34 *In May 2020, aged just 54, Zhou appears to have died, a fact mentioned only in passing in*
35 *a Chinese-media report and in a scientific paper that placed the word "deceased" in*
36 *brackets after his name. Witnesses are said to have told the U.S. investigation that Zhou*
37 *fell from the roof of the Wuhan institute, although this has not been verified."*

38 **Patient Zero Identified**

39 In related news, tireless sleuths have also produced evidence showing that Patient Zero was
40 a Chinese doctor named Ben Hu, who had received funding from the National Institutes of
41 Allergy and Infectious Diseases (NIAID) to conduct research on novel bat coronaviruses,
42 including research to assess the pathogenicity of bat coronaviruses on transgenic mice with
43 human ACE2 receptors.7

44 As reported by the White Coat Waste Project (WCW), a transparency advocacy
45 organization, in mid-June 2023:8

46 *"Scientific and intelligence authorities and most Americans now believe that a lab leak in*
47 *Wuhan caused COVID. Still, finding Patient Zero remains key to definitively determining*
48 *what prompted the pandemic.*

49 *A WCW Freedom of Information Act (FOIA) investigation9 and 2021 lawsuit10 — paired*
50 *with other newly-leaked U.S. intelligence — further points to the Wuhan animal lab as*
51 *ground zero ...*

1 [In] January 2021, the State Department reported¹¹ that white coats at the Wuhan lab
2 who were working on coronavirus animal experiments **fell ill in November 2019** with
3 COVID-like symptoms, before the first case of COVID was even reported.

4 *A few months later, reports¹² detailed that in November 2019 three Wuhan lab
5 experimenters became so sick that they had to be hospitalized. Another report¹³ indicated
6 that the wife of a Wuhan white coat died in December 2019 from a COVID-like illness.*

7 *The identity of the sick Wuhan animal lab staffers has been kept a secret by U.S. and CCP
8 authorities ... until now. A new report¹⁴ based on a U.S. government source identifies the
9 three sick Wuhan lab staffers as Ben Hu, Yu Ping, and Yan Zhu. The source confirmed
10 their identities with '100%' certainty."*

11 **Patient Zero Was Involved in Risky Coronavirus Research**

12 According to the WCW, the three lab employees all worked on bat coronaviruses on
13 humanized mice, and Hu is named as the lead for NIAID-funded gain-of-function research
14 on SARS-like coronaviruses. The WCW recapped its findings:¹⁵

15 *"U.S. taxpayer-funded Wuhan white coats collect wild coronaviruses from bats in remote
16 caves in China without adequate protective gear, transport the viruses to a lab in a major
17 metropolitan area, do gain-of-function animal experiments to make the viruses more
18 contagious and deadly to humans, and then fall ill with COVID-like symptoms and their
19 identities and medical histories are covered-up.*

20 *Thanks to WCW's investigations and advocacy and work with lawmakers including Waste
21 Warrior Sen. Roger Marshall (R-KS), we're getting closer to finding the smoking gun that
22 establishes where COVID came from."*

23 One of the key features that makes SARS-CoV-2 so unique (and so infectious to humans)
24 is the presence of a furin cleavage site (FCS). And, according to Dr. Richard Ebright, a
25 molecular biologist and laboratory director at the Waksman Institute of Microbiology,
26 Patient Zero may have been responsible for the insertion of that specific feature. Ebright
27 told The Intercept:¹⁶

28 *"The significance of the fact that 'patient zero,' Ben Hu, received U.S. funding from NIH
29 and USAID in 2018-2019 is that NIH and USAID support to Hu potentially directly funded
30 the insertion of FCS sequences into SARS-like coronaviruses that had been proposed in
31 EcoHealth's/WIV's unsuccessful 2018 DARPA grant application.*

32 *Just as USAID and NIH support to Shi potentially funded the insertion of FCS sequences
33 into SARS-like coronaviruses that had been proposed in EcoHealth's/WIV's unsuccessful
34 2018 DARPA grant application."*

35 The DARPA grant application Ebright is referring to was a proposal by Shi, Baric and
36 Daszak, to insert a furin cleavage site into a coronavirus to make it capable of infecting
37 mammalian cells. **They already had proof-of-concept research showing it could be done.**
38 **DARPA rejected the proposal, but it appears this experimentation took place anyway, at**
39 **the WIV, under a secret bioweapons research program, with U.S. funding.**

40 **Ending Gain of Function Research Is the Answer**

41 The primary contention now is whether China does, in fact, have a secret bioweapons
42 program. As reported by The Conversation:¹⁷

43 *"The Sunday Times article claims to present new data, but it is not indisputable. And even
44 merely bringing up the issue of biowarfare with China would be diplomatically contentious
45 and ruffle a lot of political feathers.*

46 *As such, the international community will not want to take the dispute over COVID-19
47 forward unless they have definitive evidence of a Chinese biowarfare program. But, given
48 the nature of biological research, we may never be able to get that certainty."*

49 The Conversation reviews the potential avenues political leaders could take, such as filing
50 an official complaint through the United Nations that China may have violated the 1972

1 biological weapons convention. The UN secretary-general also has a mechanism for
 2 investigation of alleged use of biological weapons that would force an investigation.
 3 The problem with focusing on whether SARS-CoV-2 was intentionally developed as a
 4 biological weapon is that China is hardly the only country in violation of the bioweapons
 5 convention. The best answer, I think, would be to ban all forms of gain of function
 6 research globally, including low-tech techniques such as serial passaging, which doesn't
 7 involve genetic engineering.

8 Nature would never concoct the kinds of souped-up chimeras we now find in labs around
 9 the world, and most if not all serious pandemics are traceable back to labs, not zoonotic
 10 spillover.

11 Even if China was successfully charged with violating the bioweapons convention, it
 12 would do nothing to stop mad scientists from experimenting on pathogens to make them
 13 more lethal. There are any number of justifications for doing such research, including the
 14 overused and wholly false idea that we need to stay ahead of nature.

15 The fact is, nature would never concoct the kinds of souped-up chimeras we now find in
 16 labs around the world, and most if not all serious pandemics are traceable back to labs, not
 17 zoonotic spillover. That certainly goes for COVID-19 as well.

18 At present, there's no evidence whatsoever to support zoonotic spillover. Everything points
 19 to SARS-CoV-2 being created in a lab and then, somehow, getting out. 18 U.S. authorities
 20 clearly also helped cover up the lab leak, probably because they helped fund it.

21 **White House Slow-Walks Lab Leak Investigation**

22 Still to this day, the Biden administration seems to be more concerned about protecting
 23 China-U.S. political relations than getting to the truth, as it's delaying planned restrictions
 24 on investment in China to force it to declassify and share data related to the origin of
 25 COVID.

26 The White House has even overlooked blatant Chinese espionage over the U.S. mainland,
 27 ostensibly to "improve" relations with Beijing. On top of that, the director of National
 28 Intelligence, Avril Haines, failed to make public "all information relating to the origins of
 29 COVID-19" by the deadline, June 18, 2023, as ordered by Congress in March this
 30 year. 19-20 As reported by NBC News, June 16, 2023: 21

31 *"The Biden administration has delayed punitive economic measures against China and*
 32 *played down Beijing's intensifying intelligence-gathering to avoid jeopardizing its efforts*
 33 *to revive diplomatic talks between the two governments, according to former U.S. officials,*
 34 *congressional aides, Western diplomats and regional experts ...*

35 *'They want to calm the waters with China,' said a former U.S. official with knowledge of*
 36 *the administration's deliberations ... Administration officials have provided no public*
 37 *update since a Chinese surveillance balloon traversed the U.S. before being downed by an*
 38 *American fighter jet in February ...*

39 *A recently completed investigation of the balloon's debris found that Beijing's capabilities*
 40 *are far more sophisticated than the U.S. had believed, said a current senior U.S. official*
 41 *and a former senior U.S. official briefed on the findings. 'Their capabilities are*
 42 *significant,' one of the officials said, 'better than we thought they were' ...*

43 *The administration is also poised to miss a congressional deadline that expires Sunday*
 44 *[June 18, 2023] to declassify documents related to the origins of COVID-19. Republican*
 45 *lawmakers have accused the White House of dragging its feet on the issue.*

46 *They say that the administration's approach is misguided and that China is not holding*
 47 *back on retaliatory measures against the U.S., including imposing sanctions on the U.S.*
 48 *tech firm Micron Technology ...*

49 *An administration official said the Office of the Director of National Intelligence is*
 50 *currently carrying out a 'careful declassification process' and that 'getting to the bottom*

of the origins of COVID-19 remains a priority for the President and the United States.' They did not say when the administration will declassify the documents."
